- A. log tampering
- B. data obfuscation

- C. reconnaissance attack
- D. brute-force attack

Answer: A

Explanation:
The event log shown in the exhibit isEvent ID 104, which in Windows indicates"The audit log was cleared."This is a significant indicator oflog tampering, a common post-exploitation technique used by attackers to hide their tracks after exfiltrating data or performing unauthorized actions.
The Cisco CyberOps Associate guide mentions:
