SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition, Sourcing and Procurement C_S4CPR_2502 Prüfungsfragen mit Lösungen (Q53-Q58):

53. Frage

You want to inform purchasers automatically when an RFQ is close to the quotation deadline but only a low number of supplier quotations have been received. How can you notify purchasers easily in SAP S/4HANA Cloud Public Edition?

- A. By using the situation template in situation handling standard framework
- B. By defining a workflow using flexible workflows
- C. By developing an application using APIs to send notifications
- D. By creating new RFQs and sending with email

Antwort: A

Begründung:

To notify purchasers automatically when an RFQ is close to the quotation deadline but only a few quotations have been received, the Situation Handling Framework in SAP S/4HANA Cloud Public Edition is the most efficient solution. Below is an explanation of the correct answer:

* By using the situation template in situation handling standard framework (A): The Situation Handling Framework allows you to configure predefined templates to monitor specific conditions, such as low response rates to RFQs. When the condition is met, the system automatically notifies relevant users.

* By defining a workflow using flexible workflows (B): While flexible workflows can be configured for notifications, they require more setup and are less suited for real-time monitoring compared to the Situation Handling Framework.

* By developing an application using APIs to send notifications (C): Developing a custom application is time-consuming and unnecessary when standard tools like the Situation Handling Framework are available.

* By creating new RFQs and sending with email (D): Manually creating new RFQs and sending emails is inefficient and does not address the need for automated notifications.

54. Frage

What tools enable non-developers to create low/no-code extensions? Note: There are 2 correct answers to this question.

- A. SAP Cloud SDK
- B. SAP Build
- C. SAP Business Application Studio
- D. SAP Fiori extensibility apps

Antwort: B,D

55. Frage

What are the key process flows of service procurement? Note: There are 3 correct answers to this question.

- A. Manage invoices
- B. Manage purchase orders

- C. Manage service entry sheets
- D. Maintain quota arrangements
- E. Manage service contracts

Antwort: A,B,C

56. Frage

You need to create purchasing groups in your SAP S/4HANA Cloud Public Edition system that are relevant to your company. Which of the following assignments for purchasing groups is required?

- A. Purchasing group is not assigned to any organizational unit in the company structure
- B. You must assign the purchasing group to the plant
- C. You must assign the purchasing group to the company code
- D. You must assign the purchasing group to the responsible purchasing organization

Antwort: D

Begründung:

In SAP S/4HANA Cloud Public Edition, purchasing groups are organizational units that represent individuals or teams responsible for procurement activities. To ensure proper integration into the procurement process, purchasing groups must be assigned to the responsible purchasing organization.

* You must assign the purchasing group to the responsible purchasing organization (Option D):

Purchasing groups are linked to purchasing organizations to define which group is responsible for procurement within a specific purchasing organization. This assignment ensures that procurement processes are properly managed and executed. The SAP Organizational Structure Guide confirms this requirement.

* A. Purchasing group is not assigned to any organizational unit in the company structure:

Purchasing groups must be assigned to a purchasing organization to function effectively. Leaving them unassigned would disrupt procurement processes.

* B. You must assign the purchasing group to the plant: Plants are part of the logistics structure and are not directly linked to purchasing groups.

* C. You must assign the purchasing group to the company code: Company codes are financial organizational units and do not have a direct relationship with purchasing groups.

* SAP Organizational Structure Guide: Explains the relationship between purchasing groups and purchasing organizations in SAP S/4HANA Cloud Public Edition. <https://help.sap.com>

* SAP S/4HANA Cloud Procurement Guide: Provides details on configuring purchasing groups and their assignments.

57. Frage

What does the task list in My Outbox show?

- A. Your tasks that are not completed yet.
- B. Your tasks that the deadline were passed.
- C. Your tasks that are to be sent to your manager.
- D. Your completed and suspended tasks.

Antwort: A

Begründung:

The My Outbox task list in SAP S/4HANA Cloud Public Edition displays tasks assigned to the user that are still pending or incomplete. This feature helps users track their open tasks and ensures timely completion of activities within the system.

* Your tasks that are not completed yet (Option A): The My Outbox functionality is designed to show tasks that require action from the user but have not yet been completed. This includes tasks such as approvals, reviews, or other workflow-related activities. The SAP Fiori User Experience Guide confirms this behavior.

* A. Your completed and suspended tasks: Completed and suspended tasks are typically found in the "Completed Tasks" or "History" sections, not in the My Outbox task list.

* B. Your tasks that the deadline was passed: Overdue tasks may appear in the My Outbox list, but they are still considered incomplete tasks. The primary focus of My Outbox is to display tasks that are pending, regardless of whether they are overdue.

* D. Your tasks that are to be sent to your manager: Tasks that need to be escalated or forwarded to a manager are part of the workflow process but are not specifically displayed in the My Outbox task list.

* SAP Fiori User Experience Guide:Explains the functionality of the My Outbox task list and how it displays pending tasks.<https://help.sap.com>
