AB-730日本語版トレーニング、AB-730絶対合格

AB-730試験の準備は精巧にまとめられており、非常に効率的です。時間と労力を節約できます。合格率とヒット率も非常に高く、数千人の受験者が当社のAB-730ガイドトレントを信頼し、試験に合格しています。候補者には非常に多くの保証を提供しており、AB-730学習教材を心配なく購入できます。そのため、当社Microsoftが提供するAB-730試験トレントを十分に理解し、最初の試行でAB-730試験に合格できることを願っています。

Microsoft AI Business Professional 認定 AB-730 試験問題 (Q44-Q49):

質問 # 44

You create a Microsoft 365 Copilot notebook and add a file named Process.docx from a local folder. Yesterday, you updated Process.docx in the local folder. What will occur when you chat in the notebook?

- A. The chat will reference only the original version of Process.docx.
- B. The chat will reference the most recent version of Process.docx.
- C. The chat will reference both versions of Process.docx.

正解: A

解説:

Microsoft 365 Copilot notebooks use the version of a file that was uploaded or attached at the time it was added to the notebook. When a document such as Process.docx is added from a local folder, Copilot references that uploaded snapshot of the file. If the file is later modified locally, the notebook does not automatically sync or refresh with the updated local version unless the updated file is re-uploaded.

Microsoft guidance on grounding and file references explains that Copilot works with the specific content stored in Microsoft 365 or the attached artifact within the notebook session. Since the updated version remains in the local folder and was not reattached, Copilot continues to use the originally added version.

Therefore, during subsequent chats in the notebook, Copilot references only the original uploaded version of Process.docx.

質問 # 45

You use Microsoft 365 Copilot to generate a training plan. You need to check if there are any existing training plans in your organization that are similar to the new training plan. What should you use in Copilot?

- A. Apps
- B. Search
- C. Pages
- D. Designer

正解: B

解説:

To check for existing similar training plans using Microsoft 365 Copilot, you can leverage its ability to scan your organization's data across apps like SharePoint, OneDrive, and Teams.

*-> 1. Direct Search with Copilot Chat

Use the Microsoft 365 Copilot Chat (Work mode) to perform a cross-tenant search. This is the most efficient way to identify overlapping content across different departments.

Prompt Idea: "Search my OneDrive, SharePoint, and Teams for any existing training plans or course outlines related to [Your Topic]. Summarize how they are similar to this new plan." Specific Check: Ask Copilot to "highlight

2. File Comparison in OneDrive

Etc.

users accept the AI-generated output without verifying its accuracy.

質問 # 47

Hotspot Question

You run a prompt by using the Researcher agent in Microsoft 365 Copilot.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
You can continue the conversation in Copilot in Word.	☐	☐
You can continue the conversation in Copilot for Teams.	☐	☐
You can continue the conversation in Copilot in Outlook.	☐	☐

正解:

解説:

Answer Area

Statements	Yes	No
You can continue the conversation in Copilot in Word.	☒	☐
You can continue the conversation in Copilot for Teams.	☒	☐
You can continue the conversation in Copilot in Outlook.	☒	☐

質問 # 48

You are using Microsoft 365 Copilot to enhance your productivity in Microsoft Excel.

Which two tasks can you achieve by using Copilot in Excel? Each correct answer presents a complete the solution.

NOTE: Each correct selection is worth one point.

- A. Customize the conditional formatting rules for your data.

- B. Build a pivot table based on your data.
- C. Generate a summary of key insights from your data.
- D. Insert a custom chart that has specific formatting.

正解: B、C

解説:

Microsoft 365 Copilot in Excel enhances productivity by enabling users to analyze, format, and visualize data instantly using natural language prompts. It automates complex tasks like formula generation, trend identification, and data cleaning, significantly reducing manual effort and speeding up decision-making. Key capabilities include generating pivot tables, creating charts, and summarizing data effortlessly.

Key Productivity Enhancements in Excel with Copilot:

[C] Data Analysis and Insights: Copilot can analyze complex datasets, identify trends, and generate insights without requiring manual setup, helping users make data-driven decisions faster.

Formula Generation and Manipulation: It suggests and creates complex formulas, functions, and data manipulation techniques, which speeds up calculations and analysis.

Data Cleaning and Formatting: Copilot automates the cleaning of inconsistent entries, such as removing duplicates or handling missing values, and enhances table formatting for easier interpretation.

[D] Visualization and Chart Creation: It can instantly generate charts and pivot tables based on conversational prompts, turning raw data into visual insights.

Workflow Automation: By acting as an AI assistant, it automates routine, time Reference:
