## **Tableau Certified Data Analyst Sample Questions (Q135-Q140):**

### **NEW QUESTION # 135**

You have the following box plot that shows the distribution of average profits made in every state by region.

Which region has the smallest distribution of profits?

- A. Central
- **B. South**
- C. Cast
- D. West

**Answer: B**

#### NEW QUESTION # 136

A Data Analyst has a large data source that contains more than 10 million rows. Users can filter the rows by a field named Animal. The following is a sample of the data.

Animal	Type
Aardvark	Mammal
Angelfish	Fish
Ant	Insect
Arctic Wolf	Mammal
Bear	Mammal
...	...

The analyst wants to ensure that every calculation is affected by including only animals of a particular type.

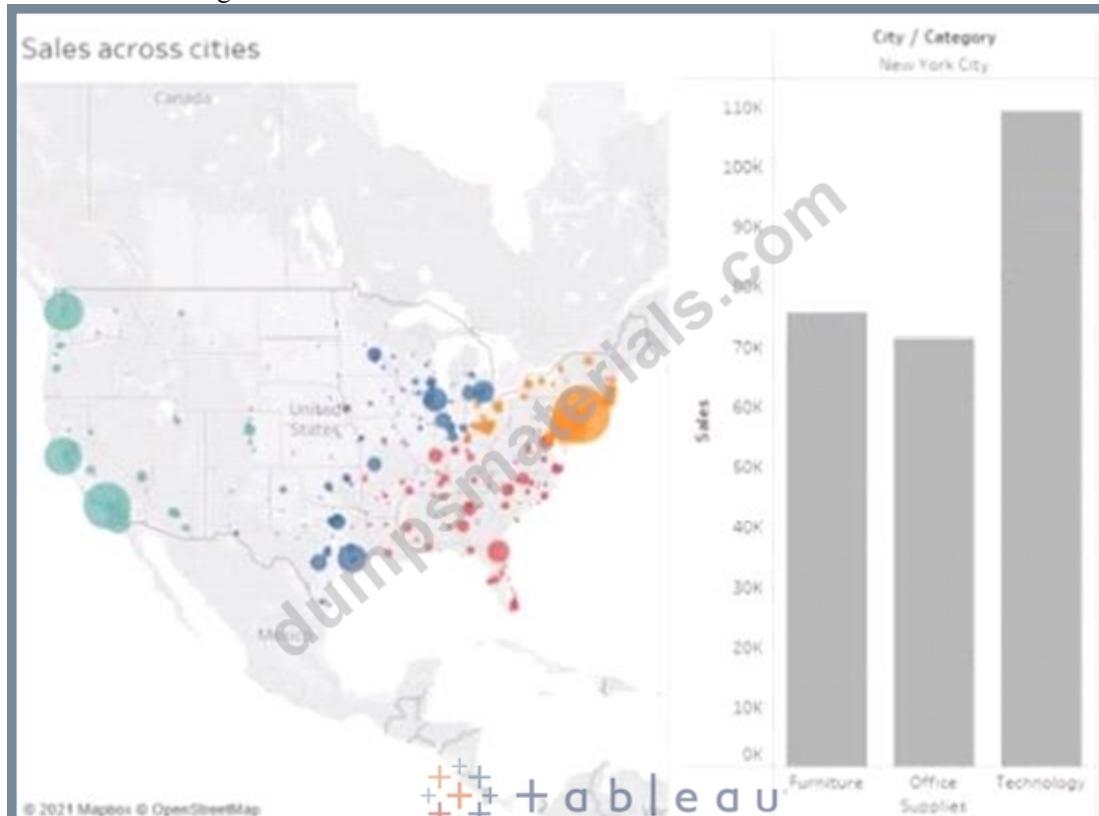

Which type of filter should the analyst create on the worksheet?

- A. Table calculation
- B. Extract
- C. Measure
- **D. Context**

**Answer: D**

#### NEW QUESTION # 137

You have the following dashboard.

When a user selects a city on the map the data on the bar chart must show only the data for the selected city. The data in the bar chart must change only when the user selects a different city. How should you configure the dashboard action? (Use the dropdowns in the Answers Area to select the correct options.)

**Answer:**

Explanation:

### NEW QUESTION # 138

You plan to create a visualization that has a dual axis chart. The dual axis chart will contain a shape chart and a line chart will use the same measure named Population on the axis.

You need to configure be shapes to be much larger than the line.

What should you do?

- A. Create a custom shape that is larger than the default shape and add the shape to the Shapes folder in My Repository
- B. For the second axis select Shape on the Marks card From Select Shape Palette select Custom and then select Reset
- C. Change Population to a discrete dimension
- D. Duplicate Population Drag the duplicate to the second Marks card and configure the size of the marks independently

**Answer: D**

Explanation:

To configure the shapes to be much larger than the line, you need to duplicate Population and drag it to the second Marks card. This will create a dual axis chart with two measures on one axis. You can then select Shape on one Marks card and Line on another Marks card, and adjust the size of each mark independently using the Size slider or menu. Reference:

### NEW QUESTION # 139

You are creating an annual report in Microsoft Word.

In Tableau Desktop, you build a chart in a worksheet.

You want to create an image of the chart that you can add to the annual report.

What are two ways to create the image? Choose two.

- A. From the File menu, use the Export As Version option.
- B. From the Dashboard menu, use the Copy Image option.
- C. From the Dashboard menu, use the Export Image option.
- D. From the Worksheet menu, use the Copy option.
- E. From the Worksheet menu, use the Export option.

**Answer: D,E**

### Explanation:

To create an image of the chart that you can add to the annual report, you can use either the Export option or the Copy option from the Worksheet menu. The Export option will allow you to save the image as a file in a specified location, name, and format. The Copy option will allow you to copy the image to the clipboard and paste it into another application, such as Microsoft Word. Both options will let you choose which elements to include in the image, such as title, caption, legend, etc. Reference:

## Export Views from Tableau Desktop to Another Application

## Copy and Paste Views from Tableau Desktop to Another Application
