Latest Data-Con-101 Exam Materials: Salesforce Certified Data Cloud Consultant provide you creditable Practice Questions

If you want to pass the exam just one tome, then choose us. We can do that for you. Data-Con-101 training materials are high-quality, they contain both questions and answers, and it's convenient for you to check your answers after practicing. In addition, Data-Con-101 exam dumps are edited by professional experts, and they are familiar with dynamics of the exam center, therefore you can pass the exam during your first attempt. We offer you free demo to have a try for Data-Con-101 Training Materials, so that you can have a deeper understanding of the exam dumps.

Salesforce Certified Data Cloud Consultant Sample Questions (Q152-Q157):

NEW QUESTION # 152

An organization wants to enable users with the ability to identify and select text attributes from a picklist of options.
Which Data Cloud feature should help with this use case?

- A. Transformation formulas
- B. Value suggestion
- C. Data harmonization
- D. Global picklists

Answer: B

Explanation:

Value suggestion is a Data Cloud feature that allows users to see and select the possible values for a text field when creating segment filters. Value suggestion can be enabled or disabled for each data model object (DMO) field in the DMO record home. Value suggestion can help users to identify and select text attributes from a picklist of options, without having to type or remember the exact values. Value suggestion can also reduce errors and improve data quality by ensuring consistent and valid values for the segment filters. References: Use Value Suggestions in Segmentation, Considerations for Selecting Related Attributes

NEW QUESTION # 153

When creating a segment on an individual, what is the result of using two separate containers linked by an AND as shown below?
GoodsProduct | Count | At Least | 1
Color | Is Equal To | red
AND
GoodsProduct | Count | At Least | 1
PrimaryProductCategory | Is Equal To | shoes

- A. Individuals who purchased at least one of any 'red' product or purchased at least one pair of 'shoes'
- B. Individuals who made a purchase of at least one 'red shoes' and nothing else
- C. Individuals who purchased at least one of any red' product and also purchased at least one pair of 'shoes'
- D. Individuals who purchased at least one 'red shoes' as a single line item in a purchase

Answer: C

Explanation:

When creating a segment on an individual, using two separate containers linked by an AND means that the individual must satisfy both the conditions in the containers. In this case, the individual must have purchased at least one product with the color attribute equal to 'red' and at least one product with the primary product category attribute equal to 'shoes'. The products do not have to be the same or purchased in the same transaction. Therefore, the correct answer is A.
The other options are incorrect because they imply different logical operators or conditions. Option B implies that the individual must have purchased a single product that has both the color attribute equal to 'red' and the primary product category attribute equal to 'shoes'. Option C implies that the individual must have purchased only one product that has both the color attribute equal to 'red' and the primary product category attribute equal to 'shoes' and no other products. Option D implies that the individual must have purchased either one product with the color attribute equal to 'red' or one product with the primary product category attribute equal to 'shoes' or both, which is equivalent to using an OR operator instead of an AND operator.
Create a Container for Segmentation
Create a Segment in Data Cloud
Navigate Data Cloud Segmentation

NEW QUESTION # 154

A consultant is ingesting a list of employees from their human resources database that they want to segment on.
Which data stream category should the consultant choose when ingesting this data?

- A. Contact Data
- B. Other Data
- C. Engagement Data
- D. Profile Data

Answer: B

Explanation:
Categories of Data Streams:
Profile Data: Customer profiles and demographic information.
Contact Data: Contact points like email and phone numbers.
Other Data: Miscellaneous data that doesn't fit into the other categories.
Engagement Data: Interactions and behavioral data.
Reference: Salesforce Data Stream Categories
Ingesting Employee Data:
Employee data typically doesn't fit into profile, contact, or engagement categories meant for customer data.
"Other Data" is appropriate for non-customer-specific data like employee information.
Reference: Salesforce Data Ingestion Guide
Steps to Ingest Employee Data:
Navigate to the data ingestion settings in Salesforce Data Cloud.
Select "Create New Data Stream" and choose the "Other Data" category.
Map the fields from the HR database to the corresponding fields in Data Cloud.
Reference: Salesforce Data Ingestion Tutorial
Practical Application:
Example: A company ingests employee data to segment internal communications or analyze workforce metrics.
Choosing the "Other Data" category ensures that this non-customer data is correctly managed and utilized.
Reference: Salesforce Data Management Case Studies

NEW QUESTION # 155
An automotive dealership wants to implement Data Cloud.
What is a use case for Data Cloud's capabilities?

- A. Ingest customer interaction across different touch points, harmonize, and build a data model for analytical reporting.
- B. Implement a full archive solution with version management.
- C. Build a source of truth for consent management across all unified individuals.
- D. Use browser cookies to track visitor activity on the website and display personalized recommendations.

Answer: A

Explanation:
The most relevant use case for implementing Salesforce Data Cloud in an automotive dealership is ingesting customer interactions across different touchpoints, harmonizing the data, and building a data model for analytical reporting . Here's why:
1. Understanding the Use Case
Salesforce Data Cloud is designed to unify customer data from multiple sources, harmonize it into a single view, and enable actionable insights through analytics and segmentation. For an automotive dealership, this means:
Collecting data from various touchpoints such as website visits, service appointments, test drives, and marketing campaigns.
Harmonizing this data into a unified profile for each customer.
Building a data model that supports advanced analytical reporting to drive business decisions.
This use case aligns perfectly with Data Cloud's core capabilities, making it the most appropriate choice.
2. Why Not Other Options?
Option A: Implement a full archive solution with version management.
Salesforce Data Cloud is not primarily an archiving or version management tool. While it can store historical data, its focus is on unifying and analyzing customer data rather than providing a full-fledged archival solution with version control.
Tools like Salesforce Shield or external archival systems are better suited for this purpose.
Option B: Use browser cookies to track visitor activity on the website and display personalized recommendations.
While Salesforce Data Cloud can integrate with tools like Marketing Cloud Personalization (Interaction Studio) to deliver personalized experiences, it does not directly manage browser cookies or real-time web tracking.
This functionality is typically handled by specialized tools like Interaction Studio or third-party web analytics platforms.
Option C: Build a source of truth for consent management across all unified individuals.
While Data Cloud can help manage unified customer profiles, consent management is better handled by Salesforce's Consent Management Framework or other dedicated compliance tools.
Data Cloud focuses on data unification and analytics, not specifically on consent governance.
3. How Data Cloud Supports Option D
Here's how Salesforce Data Cloud enables the selected use case:
Step 1: Ingest Customer Interactions
Data Cloud connects to various data sources, including CRM systems, websites, mobile apps, and third-party platforms.
For an automotive dealership, this could include:

Website interactions (e.g., browsing vehicle models).
Service center visits and repair history.
Test drive bookings and purchase history.
Marketing campaign responses.
Step 2: Harmonize Data
Data Cloud uses identity resolution to unify customer data from different sources into a single profile for each individual.
For example, if a customer interacts with the dealership via email, phone, and in-person visits, Data Cloud consolidates these interactions into one unified profile.
Step 3: Build a Data Model
Data Cloud allows you to create a data model that organizes customer attributes and interactions in a structured way.
This model can be used to analyze customer behavior, segment audiences, and generate reports.
For instance, the dealership could identify customers who frequently visit the service center but haven't purchased a new vehicle recently, enabling targeted upsell campaigns.
Step 4: Enable Analytical Reporting
Once the data is harmonized and modeled, it can be used for advanced analytics and reporting.
Reports might include:
Customer lifetime value (CLV).
Campaign performance metrics.
Trends in customer preferences (e.g., interest in electric vehicles).
4. Salesforce Documentation Reference
According to Salesforce's official Data Cloud documentation:
Data Cloud is designed to unify customer data from multiple sources, enabling businesses to gain a 360- degree view of their customers.
It supports harmonization of data into a single profile and provides tools for segmentation and analytical reporting .
These capabilities make it ideal for industries like automotive dealerships, where understanding customer interactions across touchpoints is critical for driving sales and improving customer satisfaction.

NEW QUESTION # 156
Northern Trail Outfitters uploads new customer data to an Amazon S3 Bucket on a daily basis to be ingested in Data Cloud. Based on this, a calculated insight is created that shows the total spend per customer in the last
30 days.
In which sequence should each process be run to ensure that freshly imported data is ready and available to use for any segment?

- A. Identity Resolution > Refresh Data Stream > Calculated Insight
- B. Refresh Data Stream > Identity Resolution > Calculated Insight
- C. Calculated Insight > Refresh Data Stream > Identity Resolution
- D. Refresh Data Stream > Calculated Insight > Identity Resolution

Answer: B

Explanation:
To ensure that freshly imported data is ready and available for use in any segment, the processes should be run in the following sequence: Refresh Data Stream > Identity Resolution > Calculated Insight . Here's why:
Understanding the Requirement
Northern Trail Outfitters uploads new customer data daily to an Amazon S3 bucket, which is ingested into Data Cloud.
A calculated insight is created to show the total spend per customer in the last 30 days.
The goal is to ensure that the data is properly refreshed, resolved, and processed before being used in segments.
Why This Sequence?
Step 1: Refresh Data Stream
Before any processing can occur, the data stream must be refreshed to ingest the latest data from the Amazon S3 bucket.
This ensures that the most up-to-date customer data is available in Data Cloud.
Step 2: Identity Resolution
After refreshing the data stream, identity resolution must be performed to merge related records into unified profiles.
This step ensures that customer data is consolidated and ready for analysis.
Step 3: Calculated Insight
Once identity resolution is complete, the calculated insight can be generated to calculate the total spend per customer in the last 30 days.
This ensures that the insight is based on the latest and most accurate data.
Other Options Are Incorrect :
B). Refresh Data Stream > Calculated Insight > Identity Resolution : Calculated insights cannot be generated before identity

resolution because they rely on unified profiles.

C). Calculated Insight > Refresh Data Stream > Identity Resolution : Calculated insights require both fresh data and resolved identities, so this sequence is invalid.

D). Identity Resolution > Refresh Data Stream > Calculated Insight : Identity resolution cannot occur without first refreshing the data stream to bring in the latest data.

Conclusion

The correct sequence is Refresh Data Stream > Identity Resolution > Calculated Insight , ensuring that the data is properly refreshed, resolved, and processed before being used in segments.

NEW QUESTION # 157

......

Do you long to get the Data-Con-101 certification to improve your life? Are you worried about how to choose the Data-Con-101 learning product that is suitable for you? If your answer is yes, we are willing to tell you that you are a lucky dog, because you meet us, it is very easy for us to help you solve your problem. The Data-Con-101 latest question from our company can help people get their Data-Con-101 certification in a short time.

Exam Data-Con-101 Testking: https://www.practicedump.com/Data-Con-101_actualtests.html

Salesforce Reliable Data-Con-101 Test Experience We have a 24/7 customer support, Contrary to most of the Data-Con-101 exam preparatory material available online, PracticeDump's dumps can be obtained on an affordable price yet their quality and benefits beat all similar products of our competitors, The knowledge in our Exam Data-Con-101 Testking - Salesforce Certified Data Cloud Consultant torrent prep is very comprehensive because our experts in various fields will also update dates in time to ensure quality, you can get latest materials within one year after you purchase, Before you buy our Salesforce Data Cloud Salesforce Certified Data Cloud Consultant cram pdf, you can try our Data-Con-101 free demos to see our study material.

The full research program is expected to last four years, Of course, Data-Con-101 we don't mind if you buy more than one version, as long as you think it is suitable, We have a 24/7 customer support.

Contrary to most of the Data-Con-101 Exam preparatory material available online, PracticeDump's dumps can be obtained on an affordable price yet their quality and benefits beat all similar products of our competitors.

100% Pass Quiz 2026 Salesforce Data-Con-101: Salesforce Certified Data Cloud Consultant – Reliable Reliable Test Experience

The knowledge in our Salesforce Certified Data Cloud Consultant torrent prep is very comprehensive because Reliable Data-Con-101 Real Exam our experts in various fields will also update dates in time to ensure quality, you can get latest materials within one year after you purchase.

Before you buy our Salesforce Data Cloud Salesforce Certified Data Cloud Consultant cram pdf, you can try our Data-Con-101 free demos to see our study material, Besides, you can install the Salesforce Data-Con-101 soft test engine on your phone or i-pad, thus your spare time can be full made use of.
