Reliable 1z0-071 Exam Question - Your Trusted Partner to Pass Oracle Database SQL
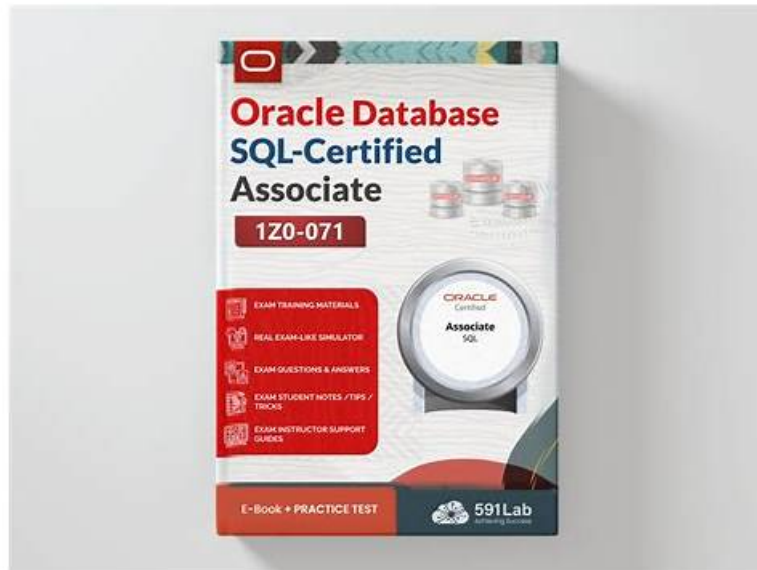

Our 1z0-071 preparationdumps are considered the best friend to help the candidates on their way to success for the exactness and efficiency based on our experts' unremitting endeavor. This can be testified by our claim that after studying with our 1z0-071 Actual Exam for 20 to 30 hours, you will be confident to take your 1z0-071 exam and successfully pass it. Tens of thousands of our loyal customers relayed on our 1z0-071 preparation materials and achieved their dreams.

Prerequisites

There are no official requirements for passing the Oracle 1z0-071 exam. However, it is recommended that the students have a good grasp of SQL syntax rules. They also need to be able to use general SQL functions, identify the result of fundamental DDL operations, and know how to implement SQL statements and functions.

Oracle 1z0-071 is a certification exam designed for IT professionals who want to validate their SQL knowledge and skills. 1z0-071 exam is intended to test the candidate's knowledge in the field of SQL and the Oracle database. It is an entry-level exam and is suitable for individuals who are just starting their career in the IT industry.

Perfect Reliable 1z0-071 Exam Question | 1z0-071 100% Free Test Sample Online

Our experts have great familiarity with 1z0-071 real exam in this area. With passing rate up to 98 to 100 percent, we promise the profession of them and infallibility of our 1z0-071 practice materials. So you won't be pestered with the difficulties of the exam any more. What is more, our 1z0-071 Exam Dumps can realize your potentiality greatly. Unlike some irresponsible companies who churn out some 1z0-071 study guide, we are looking forward to cooperate fervently.

Oracle Database SQL Sample Questions (Q27-Q32):

NEW QUESTION # 27
Examine the description of the PRODUCTStable:

Name	Null?	Type
PRODUCT_ID	NOT NULL	NUMBER(2)
PRODUCT_NAME		VARCHAR2(10)
UNIT_PRICE		NUMBER(3)
SURCHARGE		VARCHAR2(2)
EXPIRY_DATE		DATE
DELIVERY_DATE		DATE

Which three queries use valid expressions? (Choose three.)

- A. SELECT product_id, unit_price || 5 "Discount", unit_price + surcharge -
- B. SELECT product_id, (expiry_date - delivery_date) * 2 FROM products;
- C. discount FROM products;
  SELECT product_id, unit_price, 5 "Discount", unit_price + surcharge - discount
- D. SELECT product_id, (unit_price * 0.15 / (4.75 + 552.25)) FROM products;
- E. FROM products;
  SELECT product_id, unit_price, unit_price + surcharge FROM products;
- F. SELECT product_id, expiry_date * 2 FROM products;

Answer: C,E,F

NEW QUESTION # 28
Examine this partial statement:
SELECT ename, sal,comm FROM emp
Now examine this output:

ENAME	SAL	COMM
MARTIN	1250	1400
WARD	1250	500
ALIEN	1600	300
TURNER	1500	0
ADAMS	1100	
BLARE	2850	
CLARR	2450	
FORD	3000	
JAMES	950	
JONES	2975	
RING	5000	
MILLER	1300	
SCOTT	3000	
SMITH	800	

WHICH ORDER BY clause will generate the displayed output?

- A. ORDER BY NVL(enam,0) DESC, ename
- B. ORDER BY comm DESC NULLS LAST, ename
- C. ORDER BY NVL(comm,0) ASC NULLS LAST, ename
- D. ORDER BY NVL(comm,0) ASC NULLS FIRST, ename

Answer: A,B

NEW QUESTION # 29
You execute this query:

```
SELECT TO_CHAR(NEXT_DAY(LAST_DAY(SYSDATE), 'MON'), 'dd "Monday for" fmMonth rrrr')
   FROM DUAL;
```

What is the result?

- A. It generates an error.
- B. It returns the date for the first Monday of the next month.
- C. It executes successfully but does not return any result.
- D. It returns the date for the last Monday of the current month.

Answer: B

NEW QUESTION # 30

Viev the Exhibit and examine the structure of the PRODUCT INFORMATION and INVENTORIEStables.
You have a requirement from the supplies department to give a list containing PRODUCT _ID,SUPPLIER ID, and
QUANTITY_ON HAND for all the products where in QUANTITY ON HAND is lessthan five.
Which two SQL statements can accomplish the task? (Choose two)

- A. SELECT i.product id, i. quantity on hand, pi. supplier id
  FROM product information pi JOIN inventories i
  ON (pi.product id=i. product id)WHERE quantity on hand < 5;
- B. SELECT product id, quantity on hand, supplier id
  FROM product information
  NATURAL JOIN inventories AND quantity .on hand < 5;
- C. SELECT i. product id, i. quantity .on hand, pi. supplier_id
  FROM product_information pi JOIN inventories i
  ON (pi. product. id=i. product id) AND quantity on hand < 5;
- D. SELECT i. product_id, i. quantity_on hand, pi. supplier id
  FROM product information pi JOIN inventories i USING (product id) AND quantity .on hand < 5;

Answer: A,C

Explanation:
B: This query correctly joins the two tables on PRODUCT_ID and filters rows where QUANTITY_ON_HAND is less than five.
However, the syntax presented here might be incorrect due to improper placement of the condition within the ON clause; it should
be in a WHERE clause.
D: This query correctly joins the two tables on PRODUCT_ID and applies the condition in a WHERE clause, which is the proper
way to filter rows after performing the join.
Incorrect options:
A: The syntax uses NATURAL JOIN and AND incorrectly; also, conditions should be in a WHERE clause, not combined with the
JOIN clause.
C: Similar to A, this option incorrectly places a condition directly in the JOIN clause without using a WHERE clause.
Explanation:
Given the requirement to list PRODUCT_ID, SUPPLIER_ID, and QUANTITY_ON_HAND for products with
QUANTITY_ON_HAND less than five:

NEW QUESTION # 31

Examine the data in the EMPLOYEES table:

Which statement will compute the total annual compensation for each employee?

- A. select last _ name, (monthly_ salary * 12) + (monthly_ salary * 12 *monthly_ commission_ pct) AS annual_ camp FROM
  employees
- B. SELECT last _ name, (monthly_ salary * 12) + (monthly_ salary * 12 * NVL (monthly_ commission _pct, 0)) AS annual
  _comp
- C. SELECT last _ name, (monthly _ salary * 12) + (monthly_ commission _ pct * 12) AS FROM employees:
- D. SELECT last _ NAME (monthly_ salary + monthly _commission _ pct) * 12 AS annual_ comp FROM employees;

Answer: B

Explanation:

The correct way to compute the total annual compensation, which includes the monthly salary and the monthly commission (if any), is:

Option C: SELECT last_name, (monthly_salary * 12) + (monthly_salary * 12 * NVL(monthly_commission_pct, 0)) AS annual_comp FROM employees; This statement takes the monthly salary and multiplies it by 12 to get the annual salary, and then adds the annual commission which is the monthly salary multiplied by the commission percentage (if any, else 0) and then by 12.

Options A, B, and D are incorrect because:

Option A: Does not handle the case where the commission percentage is NULL which would result in NULL for the entire expression when added to the monthly salary.

Option B: Does not consider that the commission percentage might be NULL which could lead to incorrect calculations (or NULL values if commission is NULL).

Option D: Incorrectly adds the monthly commission percentage directly to the annual salary without considering that the percentage needs to be applied to the salary.

NEW QUESTION # 32

......

It is believe that employers nowadays are more open to learn new knowledge, as they realize that Oracle certification may be conducive to them in refreshing their life, especially in their career arena. A professional Oracle certification serves as the most powerful way for you to show your professional knowledge and skills. For those who are struggling for promotion or better job, they should figure out what kind of 1z0-071 Test Guide is most suitable for them. However, some employers are hesitating to choose. With our high-accuracy 1z0-071 test guide, our candidates can grasp the key points, and become sophisticated with the exam content. You only need to spend 20-30 hours practicing with our Oracle Database SQL learn tool, passing the exam would be a piece of cake.
