

Hot Cisco 350-701 Latest Exam Dumps & Trustable Itcerttest - Leading Offer in Qualification Exams

P.S. Free & New 350-701 dumps are available on Google Drive shared by Itcerttest: <https://drive.google.com/open?id=1prPvFJ-Thv8-6DUhbvg7p-47CSy7GGTJ>

You may urgently need to attend 350-701 certificate exam and get the certificate to prove you are qualified for the job in some area. If you buy our 350-701 study materials you will pass the test almost without any problems. Our 350-701 study materials boost high passing rate and hit rate so that you needn't worry that you can't pass the test too much. We provide free tryout before the purchase. To further understand the merits and features of our 350-701 Practice Engine you could look at the introduction of our product in detail.

Cisco 350-701 SCOR: Target Audience

The Cisco 350-701 exam is created for those IT professionals who work in the networking field. The test is targeted at the engineers and architects specializing in unified communications, video, and voice. To pass this exam with flying colors, the applicants must demonstrate that they have the ability to operate and implement core security technologies, which include Cloud security, network security, secure network access, endpoint protection and detection, enforcement, and visibility. In addition, candidates should also have familiarity with TCP/IP networking and Ethernet. It is recommended that the students also have knowledge of Windows OS. In addition, they should know the fundamental concepts of networking security and possess expertise in Cisco IOS networking.

To prepare for the Cisco 350-701 Exam, candidates can take advantage of various study materials provided by Cisco, including training courses, books, and practice exams. Cisco also offers a range of online resources, including documentation, videos, and blogs, to help candidates prepare for the exam. Additionally, candidates can participate in online forums and discussion groups to interact with other professionals and gain insights into the exam.

Real 350-701 Dumps Free, Reliable 350-701 Dumps Sheet

To go with the changing neighborhood, we need to improve our efficiency of solving problems as well as the new contents of our

350-701 exam questions accordingly, so all points are highly fresh about in compliance with the syllabus of the exam. Our 350-701 Exam Materials can help you realize it. To those time-sensitive exam candidates, our high-efficient 350-701 study questions comprised of important news will be best help.

Cisco 350-701 exam covers a wide range of security technologies, including network security, cloud security, endpoint protection, secure network access, visibility, and enforcement. Candidates are expected to have a strong understanding of these security technologies and their implementation in real-world scenarios. 350-701 Exam also tests candidates' abilities to configure, manage, and troubleshoot these technologies, as well as their knowledge of security policies and best practices.

Cisco Implementing and Operating Cisco Security Core Technologies Sample Questions (Q134-Q139):

NEW QUESTION # 134

An engineer adds a custom detection policy to a Cisco AMP deployment and encounters issues with the configuration. The simple detection mechanism is configured, but the dashboard indicates that the hash is not 64 characters and is non-zero. What is the issue?

- A. The hash being uploaded is part of a set in an incorrect format
- B. The file being uploaded is incompatible with simple detections and must use advanced detections
- C. The engineer is attempting to upload a hash created using MD5 instead of SHA-256
- D. The engineer is attempting to upload a file instead of a hash

Answer: C

Explanation:

The issue is that the engineer is using the wrong hashing algorithm to generate the hash for the custom detection policy. Cisco AMP for Endpoints requires the use of SHA-256 hashes for simple custom detections, as stated in the Configure a Simple Custom Detection List on the AMP for Endpoints Portal document. SHA-

256 hashes are 64 hexadecimal characters long, while MD5 hashes are 32 hexadecimal characters long.

Therefore, if the engineer tries to upload a hash created using MD5, the dashboard will indicate that the hash is not 64 characters and is non-zero, as shown in the image below:

To resolve the issue, the engineer should use a tool or a website that can generate SHA-256 hashes from files, such as this one, and upload the correct hash to the custom detection list. NEW QUESTION # 135

Refer to the exhibit.

```
import requests
url = https://api.amp.cisco.com/v1/computers
headers = {
'accept' : application/json
'content-type' : application/json
'authorization' : Basic API Credentials
'cache-control' : "no cache"
}r
esponse = requests.request ("GET", url, headers = headers)
print (response.txt)
```

What will happen when this Python script is run?

- A. The compromised computers and malware trajectories will be received from Cisco AMP
- B. The compromised computers and what compromised them will be received from Cisco AMP
- C. The list of computers, policies, and connector statuses will be received from Cisco AMP The call to API of "https://api.amp.cisco.com/v1/computers" allows us to fetch list of computers across your organization that Advanced Malware Protection (AMP) sees
- D. The list of computers and their current vulnerabilities will be received from Cisco AMP

Answer: C

Explanation:

Reference:

api_host=api.apic.amp.cisco.com&api_resource=Computer&api_version=v1

NEW QUESTION # 136

Which cryptographic process provides origin confidentiality, integrity, and origin authentication for packets?

- A. AH
- **B. ESP**
- C. IKEv2
- D. IKEv1

Answer: B

NEW QUESTION # 137

In which cloud services model is the tenant responsible for virtual machine OS patching?

- A. UCaaS
- B. SaaS
- **C. IaaS**
- D. PaaS

Answer: C

Explanation:

ExplanationOnly in On-site (on-premises) and IaaS we (tenant) manage O/S (Operating System).

NEW QUESTION # 138

Drag and drop the common security threats from the left onto the definitions on the right.

Answer:

Explanation:

Explanation:

A picture containing application Description automatically generated
