SAP C_SIGVT_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Exploring SAP Cloud Strategy: This section of the exam measures the skills of Cloud Strategy Analysts and focuses on SAP overall cloud vision, deployment models, and strategic direction. It includes understanding the value of cloud adoption, SAP portfolio of cloud solutions, and how organizations benefit from modern cloud architectures. The section validates foundational knowledge of SAP cloud ecosystem and its relevance to transformation.
Topic 2	<ul style="list-style-type: none"> Exploring the SAP Business Transformation Methodology: This section of the exam measures the skills of Transformation Consultants and introduces SAP structured methodology for guiding organizations through transformation programs. It covers the stages, principles, and frameworks used to support business evolution, ensuring candidates understand how SAP's methodology enables structured planning, execution, and adoption across transformation lifecycles.
Topic 3	<ul style="list-style-type: none"> Validating Business Processes with SAP Signavio: This section of the exam measures the skills of Business Process Analysts and covers the use of SAP Signavio to evaluate, analyze, and validate business processes during transformation projects. It focuses on understanding how process insights support decision-making and how Signavio helps identify gaps between current operations and desired outcomes. The section ensures candidates can apply Signavio tools to support business process optimization.
Topic 4	<ul style="list-style-type: none"> Monitoring Transformation Progress using SAP Cloud ALM: This section of the exam measures the capabilities of Cloud ALM Specialists and covers the use of SAP Cloud ALM to track project progress and operational performance. It explains how Cloud ALM supports implementation tasks, monitors system health, and provides visibility into key milestones. Candidates learn how to use the platform to support continuous governance and ensure transformation activities remain on track.

Topic 5	<ul style="list-style-type: none"> Using LeanIX for Enterprise Architecture Validation: This section of the exam measures the abilities of Enterprise Architects and focuses on using LeanIX to validate architecture landscapes. It includes understanding how LeanIX maps applications, data, and business capabilities to support modernization efforts. The domain emphasizes validating architecture readiness and ensuring that the existing IT landscape aligns with transformation goals.

SAP offers up-to-date SAP C_SIGVT_2506 practice material consisting of three formats that will prove to be vital for you. You can easily ace the C_SIGVT_2506 exam on the first attempt if you prepare with this material. The SAP C_SIGVT_2506 Exam Dumps have been made under the expert advice of 90,000 highly experienced professionals from around the globe. They assure that anyone who prepares from it will get SAP C_SIGVT_2506 certified on the first attempt.

SAP Certified Associate - Validating Business Transformation Sample Questions (Q17-Q22):

NEW QUESTION # 17

What is the primary purpose of the Application Landscape Report in SAP LeanIX?

- A. Identify active applications affected by the transformation
- B. Understand integration dependencies and their current status
- C. Visualize data flow between systems
- D. Understand application data quality

Answer: A,B

Explanation:

The Application Landscape Report in SAP LeanIX provides a consolidated view of all applications within the IT environment. It highlights which applications are active, which are impacted by transformation plans, and how they align with business capabilities. Additionally, it displays integration dependencies, helping stakeholders understand the connections between applications and the interfaces that may be influenced by change. While other reports focus on data quality or specialized views, this report centers on active applications and key integration relationships.

NEW QUESTION # 18

What does Cloud ALM Integration & Exception Monitoring track?

- A. Communication failures between systems
- B. Cloud API Changes
- C. Business partner roles
- D. Cross-system process adherence

Answer: A

NEW QUESTION # 19

What are the benefits offered by SAP Cloud ALM for businesses?

(3 correct answers)

- A. It reduces TCO of the solution landscape
- B. It supports only cloud implementation scenarios
- C. It is instantly available for use as a subscription service
- D. It supports process mining with plug & gain
- E. It is available to all customers with Enterprise Support Agreement or cloud contract

Answer: A,C,E

Explanation:

SAP Cloud ALM provides multiple operational and implementation benefits to businesses undergoing transformation. First, it is available to all customers who hold an SAP Enterprise Support Agreement or cloud subscription. This means there are no additional licensing fees, making Cloud ALM a highly accessible lifecycle management platform. Its broad availability encourages consistent adoption across organizations of all sizes.

Second, SAP Cloud ALM is instantly available as a cloud-native subscription service. There is no installation or infrastructure setup required. Customers can begin using Cloud ALM almost immediately after provisioning, accelerating project kickoff and reducing administrative overhead.

Third, one of its major benefits is that it reduces total cost of ownership (TCO) by minimizing on-premise infrastructure requirements and providing standardized, automated tools for monitoring, implementation, testing, and operations. This reduces the need for multiple separate ALM systems and allows customers to centralize lifecycle activities.

Option A is incorrect because process mining with Plug & Gain is a Signavio capability. Option D is incorrect because Cloud ALM supports both cloud and hybrid/on-premise scenarios through integration monitoring and operational support. Therefore, the correct benefits are B, C, and E.

NEW QUESTION # 20

What is the role of the SAP expert team during RISE implementation?

- A. To manage partners
- B. To perform legal due diligence
- C. To manage SAP licensing
- **D. To offer guidance and project onboarding**

Answer: D

NEW QUESTION # 21

What is used to run fit-to-standard workshops during the design phase?

- **A. Best practice content**
- B. Simplification lists
- C. Template roadmaps
- D. Compatibility lists

Answer: A

Explanation:

Fit-to-standard workshops rely on SAP Best Practice content to demonstrate standard business processes. This content includes ready-made process models, configuration guides, test scripts, and role definitions that help validate whether standard processes meet business requirements. Simplification and compatibility lists are used for system conversion impact analysis, not for fit-to-standard design activities. Therefore, best practice content is the correct basis for these workshops.

NEW QUESTION # 22
