

Network Appliance NetApp Storage Installation Engineer, ONTAP Professional Exam Sample Questions (Q85-Q90):

NEW QUESTION # 85

A customer wants to graphically manage a new clustered Data ONTAP system. Which tool should the customer use?

- A. OnCommand System Manager
- B. System Setup
- C. StorageGRID
- D. HostAgent

Answer: A

Explanation:

Graphical management of clustered Data ONTAP systems is performed using OnCommand System Manager, which provides a web-based interface for configuration, monitoring, and administration.

System Setup is used only for initial node setup, HostAgent is host-side software, and StorageGRID is an object storage platform unrelated to ONTAP cluster management.

OnCommand System Manager allows administrators to manage aggregates, volumes, LIFs, SAN objects, and system health through an intuitive GUI, making it the correct choice.

Therefore, the correct answer is B, as defined by NetApp.

NEW QUESTION # 86

You are setting up a LIF for the node management network. What will be the default failover policy in this scenario?

- A. system-defined
- B. local-only
- C. sfo-partner-only
- D. broadcast-domain-wide

Answer: B

Explanation:

Node management LIFs are used to manage individual nodes within an ONTAP cluster. These LIFs are designed to remain on the node they manage and are not intended to move during failover events.

By default, a node management LIF uses the local-only failover policy. This ensures that the LIF remains bound to ports on the same node and does not migrate to other nodes. This behavior preserves administrative clarity and prevents confusion when accessing node-specific management interfaces.

Other failover policies, such as broadcast-domain-wide or sfo-partner-only, are used for data or cluster management LIFs where mobility is required for availability. System-defined is not a failover policy type.

Therefore, the correct answer is C (local-only).

NEW QUESTION # 87

When you start a new Service Event Report, what must be entered first?

- A. the project number
- B. the case ID number
- C. the sales order number
- D. the node serial number

Answer: D

Explanation:

A Service Event Report (SER) is used to document installation, maintenance, or corrective actions performed on NetApp systems. The node serial number is the primary identifier used to associate the report with specific hardware.

Other identifiers such as case ID, project number, or sales order number are supplementary and may not always exist at the time the SER is created.

Therefore, the correct answer is C (the node serial number).

NEW QUESTION # 88

A customer is migrating data from a FAS8020 (ONTAP 9.5) to an AFF A250 MetroCluster IP system. Which two migration methods are supported? (Choose two.)

- A. Configure SnapMirror between the systems
- B. Use a host-based copy migration method
- C. Create a 4-node cluster and use vol move
- D. Controller swap

Answer: A,B

NEW QUESTION # 89

After the successful installation of a NetApp ONTAP cluster, the customer wants to view telemetry data and receive online information about risks and best-practice gaps. Which tool satisfies the customer's requirements?

- A. Spot by NetApp
- B. Interoperability Matrix Tool
- C. Cloud Manager
- D. Active IQ Digital Advisor

Answer: D

Explanation:

Active IQ Digital Advisor provides telemetry analysis, predictive risk detection, and best-practice recommendations based on AutoSupport data. It is specifically designed for proactive monitoring and risk mitigation.

NEW QUESTION # 90

.....

Our NS0-185 real exam materials have high appraisal in the market for their quality and high efficiency. Because satisfied customer is the best ads, and the word of mouth communication by the customers give others more sense of credibility than any other form of marketing communication. We know a satisfied customer will come back again for the same or different need to the company, so we always provide high-rank NS0-185 real exam materials over ten years. They have experienced all trials of the market these years approved by experts. Besides, they are easy to assimilate so if you get stuck in the bottleneck of review, and under the guidance of our NetApp Storage Installation Engineer, ONTAP Professional Exam exam question they are widely regarded as top notch in this area. Recently our NS0-185 Guide prep rise to the forefront in the field of practice materials. So if you need other NS0-185 real exam materials from us, we will not let you down not even once. Hope you pass the exam once successfully by our NetApp Storage Installation Engineer, ONTAP Professional Exam exam question and recommend them to your friends. We are sure you will be splendid!
