- A. The early finish and late finish are circular
- B. It is the penultimate work required for the project
- C. The scheduler forgot to add the successor activities
- **D. It is the final activity for the required work for the project**

Answer: D

Explanation:

Activity 11001 Characteristics:

- * Activity 11001 (Spillway - Concrete) is logically defined as the final activity in the project.
- * Final activities in a project typically do not have successor activities since they signify project completion.

Exclusion of Other Options:

- * Option A: Circular logic does not apply since the scheduling logic is linear and follows standard precedence diagramming methods.
- * Option B: Activity 11001 is not penultimate but the final activity.
- * Option C: The scheduler's error is highly unlikely in a controlled environment following PSP principles.

Verification with PSP Guidelines:

The PSP Study Guide explains that final activities represent the culmination of a project's logical sequence and typically lack successors (Ref: PSP Study Guide, Chapter 2A: Logical Sequencing).
