Esri ArcGIS Utility Network Associate 2024 Sample Questions (Q57-Q62):

NEW QUESTION # 57

A field technician is using ArcGIS Field Maps with a published utility network. Which two actions are supported in Field Maps when interacting with the network?

- A. View associations and perform traces
- B. Apply validation rules and create subnetworks

- C. Offline editing and schema changes

Answer: A

Explanation:

In Field Maps, users can view associations and run traces. Offline editing workflows are not supported.

NEW QUESTION # 58

What is the key difference between a domain network and a structure network in ArcGIS Utility Network?

- A. Structure networks enforce connectivity, while domain networks enforce containment
- **B. Domain networks carry resources, while structure networks provide support**
- C. Domain networks define ranks, while structure networks manage terminal paths

Answer: B

Explanation:

Domain networks model the flow of resources (e.g., water, electricity), while structure networks provide physical support.

NEW QUESTION # 59

When modeling coincident point features in ArcGIS Utility Network, which of the following is a scenario where coincident placement is allowed?

- A. Junction class to Junction class
- **B. Junction class to Assembly class**
- C. Device class to Device class

Answer: B

Explanation:

Coincident points are allowed between junctions and assemblies, devices and structures, and structures with assemblies. They are not allowed between device-device or junction-junction.

NEW QUESTION # 60

Which topology type is supported by a hierarchical network, such as a water or gas utility system where multiple nested tiers may exist?

- **A. Mesh topology**
- B. Partitioned topology
- C. Radial topology

Answer: A

Explanation:

Hierarchical networks can use mesh topology to allow multiple flow paths and redundancy.

NEW QUESTION # 61

When creating association roles in ArcGIS Utility Network, what would an unspecified deletion semantic allow if a user attempts to delete a structure feature?

- A. Automatically deletes all associated features along with the structure
- **B. Allows deletion of the structure while keeping associated network features in place**
- C. Prevents deletion of the structure until all associated features are removed

Answer: B

Explanation:

Unspecified deletion semantic removes associations but leaves network features intact when the container or structure is deleted.

NEW QUESTION # 62

.....
