Your dream is very high, so you have to find a lot of material to help you prepare for the exam. ExamDiscuss Juniper JN0-105 Exam Materials can help you to achieve your ideal. ExamDiscuss Juniper JN0-105 exam materials is a collection of experience and innovation from highly certified IT professionals in the field. Our products will let you try all the problems that may arise in a really examinations. We can give you a guarantee, to ensure that candidates get a 100% correct answer.

Juniper Junos, Associate (JNCIA-Junos) Sample Questions (Q68-Q73):

NEW QUESTION # 68
Exhibit
user@router> show route 192.168.36.1
inet.O: 5 destinations, 6 routes (5 active, 0 holddown, 0 hidden) + = Active Route, - = Last Active, * = Both
192.168.36.1/32 *[Static/5] 00:00:31
> to 10.1.1.2 via ge-0/0/10.0 [OSPF/IO] 00:02:21, metric 1 > to 10.1.1.2 via ge-0/0/10.0 Referring to the exhibit, which route(s) will be selected by Junos for packet forwarding?

- A. The OSPF route will be selected.
- B. The static route will be selected.
- C. The Junos OS selects both routes.
- D. The Junos OS randomly selects one route.

Answer: B

Explanation:
Junos OS selects routes based on the route preference (also known as administrative distance). Static routes typically have a lower route preference than OSPF routes, meaning they are more preferred. Since the static route to 192.168.36.1/32 is shown with a preference of 5, it will be selected over the OSPF route for packet forwarding, assuming no other factors such as route filters or policies affect the routing decision.

NEW QUESTION # 69
Which prompt indicates that you are using configuration mode?

- A. #
- B. >
- C. %
- D. $

Answer: A

Explanation:
In Junos OS, the # prompt indicates that you are in configuration mode. This mode is used for making changes to the configuration of the device.
Reference:
"The # prompt indicates that you are in configuration mode."

NEW QUESTION # 70
You are creating a new policy to accept and redistribute routes into your IGP.
In this scenario, which match criteria would you use to identify the route prefixes to select?

- A. neighbor
- B. route-type
- C. instance
- D. route-filter

Answer: D

Explanation:
When creating a new policy to accept and redistribute routes into your Interior Gateway Protocol (IGP), the route-filter match criteria is used to identify the route prefixes to select. The route-filter statement specifies which prefixes should be matched in a policy. This allows for precise control over which routes are accepted and redistributed, facilitating efficient and secure routing

policies within the network.
References:
* "show | display set | match ge-0/0/2" indicating command examples and match criteria from Useful Juniper Commands.txt.
* Juniper official documentation: Routing Policy and Firewall Filters Configuration Guide.

NEW QUESTION # 71

You have logged on to a Junos device and are at the operational mode prompt.
Which two commands are used at this prompt? (Choose two.)

- A. show interface ge-0/0/0
- B. set interface ge-0/0/0 unit 0 family inet
- C. run show interface terse
- D. request system shutdown

Answer: A

Explanation:
At the operational mode prompt on a Junos device, you can use various commands to view the device's status and request system operations. Theshow interface ge-0/0/0command is used to display information about a specific interface, while therequest system shutdowncommand is used to properly shut down the device. The setcommand is used in configuration mode, not operational mode, and theruncommand is used to execute operational mode commands from configuration mode.

NEW QUESTION # 72

What are two advantages of using the Junos OS? (Choose two.)

- A. It is modular.
- B. It pushes your configuration changes "live" immediately.
- C. It supports up to a maximum of two previous configurations.
- D. It enables you to roll back to a previous configuration.

Answer: A,D

Explanation:
One of the key advantages of Junos OS is its ability to roll back to previous configurations. This feature allows administrators to revert to an earlier configuration state, which is invaluable for quickly recovering from configuration errors or undesired changes. Junos OS maintains an archive of previous configurations, enabling easy rollback to any saved state. Another significant advantage of Junos OS is its modular design.
The operating system is structured so that different processes and services run in separate protected memory spaces, enhancing the stability and reliability of the system. If one process fails, it does not affect the others, thereby minimizing the risk of system-wide failures.

NEW QUESTION # 73

......

Web-based Junos, Associate (JNCIA-Junos) (JN0-105) practice exam is a convenient format to evaluate and improve preparation for the exam. It is a JN0-105 browser-based application, which means you can access it from any operating system with an internet connection and a web browser. Unlike the desktop-based exam simulation software, the Junos, Associate (JNCIA-Junos) (JN0-105) browser-based practice test requires no plugins and software installation. It makes the Juniper JN0-105 online practice exam a perfect tool for those who do not want to go through complicated software installation on their device.
