Our company has forged a group of professional experts with the excelsior craftsmanship and a mature service system. The quality of our C_SEC_2405 Study Materials is high because our experts team organizes and compiles them according to the real exam’s needs and has extracted the essence of all of the information about the test.

SAP Certified Associate - Security Administrator Sample Questions (Q62-Q67):

NEW QUESTION # 62

Where do you configure the Social Media identity providers?

- A. In the SAP BTP Cockpit Account Explorer
- B. In the administration console for SAP Cloud Identity Services
- C. In the code editor of the SAP Business Application Studio

Answer: B

Explanation:

Social Media identity providers, such as Google or Facebook, are configured in the administration console for SAP Cloud Identity Services. This console provides a centralized interface for managing identity providers, allowing administrators to set up and configure external authentication sources for single sign-on (SSO). By integrating social media identity providers, organizations can enable users to authenticate using their social media credentials, streamlining access to SAP applications while maintaining security. The administration console supports configuring trust relationships, mapping attributes, and defining authentication policies for these providers. In contrast, the SAP Business Application Studio is used for application development, not identity provider configuration, and the SAP BTP Cockpit Account Explorer is focused on account and subaccount management, not specific identity provider settings. The administration console's role in SAP Cloud Identity Services ensures a secure and user-friendly authentication experience, aligning with SAP's identity management strategy for cloud-based solutions.

NEW QUESTION # 63

Which tool can you use to modify the entities schema content across multiple repositories?

- A. SAP Cloud Identity Services Schemas app
- B. SAP Business Application Studio
- C. SAP BTP Account Explorer
- D. SAP Cloud Identity Services Transformation Editor

Answer: A

NEW QUESTION # 64

When segregating the duties for user and role maintenance, which of the following should be part of a decentralized treble control strategy for a production system? Note: There are 3 correct answers to this question.

- A. One user administrator per application area in the production system
- B. One authorization profile administrator
- C. One decentralized role administrator
- D. One user administrator per production system
- E. One authorization data administrator

Answer: A,C,D

NEW QUESTION # 65

Which log types are available in the Administration Console of Cloud Identity Services? Note: There are 2 correct answers to this question.

- A. Performance logs
- B. Change logs
- C. Usage logs
- D. Troubleshooting logs

Answer: B,C

Explanation:

In the Administration Console of Cloud Identity Services, the following log types are available:

- * Change Logs (A): These logs capture all modifications made to configurations, user data, or system settings.
- * Usage Logs (D): Usage logs provide details on how the system is being utilized, including user access patterns and system resource usage.

SAP Security References:

- * SAP Cloud Identity Services Administration Guide
- * SAP Help Portal: Log Management in Cloud Identity Services

NEW QUESTION # 66

In SAP S/4HANA Cloud Public Edition, which of the following can you change in a derived business role if the "Inherit Spaces in Derived Business Roles" checkbox is NOT selected in the leading business role?

- A. Pages
- B. Business Role Template
- C. Restrictions
- D. Business Catalogs

Answer: D

Explanation:

If the "Inherit Spaces in Derived Business Roles" checkbox is not selected in the leading business role, you can still adjust Business Catalogs in the derived business role to refine access or align it with specific user requirements.
