500-710 Learning Engine - New 500-710 Test Cram

P.S. Free & New 500-710 dumps are available on Google Drive shared by Exam4Labs: https://drive.google.com/open?id=1NJx73KE91DaAkaAknFRaONPJNUdOAY6X

Exam4Labs wants to win the trust of Cisco 500-710 exam candidates at any cost. To achieve this objective Exam4Labs is offering some top features with 500-710 exam practice questions. These prominent features hold high demand and are specifically designed for quick and complete Cisco Video Infrastructure Implementation (500-710) exam questions preparation.

Passing the Cisco 500-710 Exam leads to the Cisco Certified Specialist - Video Infrastructure Implementation certification. Cisco Video Infrastructure Implementation certification is valid for three years and indicates that the candidate has the knowledge and skills required to implement video infrastructure technologies in a Cisco environment efficiently. Cisco Video Infrastructure Implementation certification is recognized globally and can help IT professionals to advance in their careers by opening up new opportunities and demonstrating their expertise to their employers and clients.

100% Pass 2025 Cisco 500-710: Newest Cisco Video Infrastructure Implementation Learning Engine

If you are willing to buy our 500-710 dumps pdf, I will recommend you to download the free dumps demo first and check the accuracy of our 500-710 practice questions. Maybe there are no complete 500-710 study materials in our trial, but it contains the latest questions enough to let you understand the content of our 500-710 Braindumps. Please try to instantly download the free demo in our exam page.

Cisco Video Infrastructure Implementation Sample Questions (Q64-Q69):

NEW QUESTION #64

Which two statements about subzones are true? (Choose two.)

- A. Subzones require the use of endpoint authentication
- B. Endpoints are assigned to a particular subzone by their alias or IP subnet
- C. Subzones are used for routing calls to peers in other parts of the network
- D. Endpoints require the use of other endpoints for authentication
- E. Subzones are used for bandwidth and authentication control of a logical grouping of endpoints within the registration list of the Expressway

Answer: B,C

NEW QUESTION #65

Which method does the Conductor use to determine the source of an incoming call to a rendezvous type conference?

- A. source IP addresses
- B. management IP addresses
- C. conference IP addresses
- D. location IP addresses

Answer: D

NEW QUESTION #66

Which type of customization options are available on the Cisco Meeting Server?

- A. customizing aliases used
- B. branding the WebRTC clients
- C. customizing protocols used
- D. branding spaces

Answer: B

NEW QUESTION #67

Which port does the Cisco Meeting Server use for SIP signaling from the call bridge to the H.323 gateway?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

Explanation:

The Cisco Meeting Server uses port 5060 for SIP signaling from the call bridge to the H.323 gateway. This is because port 5060 is the default port for SIP signaling over UDP or TCP, and the Cisco Meeting Server supports both protocols for SIP signaling1. The call bridge communicates with the H.323 gateway using SIP signaling to establish and manage calls between SIP and H.323 endpoints2.

The other options are not correct because:

- * 4999: This is not a port used for SIP signaling, but for H.323 signaling over TCP. The Cisco Meeting Server uses port 4999 for H.323 signaling from the call bridge to the H.323 gateway1.
- * 5222: This is not a port used for SIP signaling, but for XMPP signaling over TCP. The Cisco Meeting Server uses port 5222 for XMPP signaling from the call bridge to the XMPP server1.
- * 6061: This is not a port used for SIP signaling, but for SIP signaling over TLS. The Cisco Meeting Server uses port 6061 for SIP signaling over TLS from the call bridge to the Expressway-C or the SIP proxy1.

NEW QUESTION #68

What is the maximum number of Expressways that can be clustered?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A

NEW QUESTION #69
