## 500-710 Dumps Torrent - Valid 500-710 Test Camp

We don't just want to make profitable deals, but also to help our users pass the exams with the least amount of time to get 500-710 certificate. Choosing our 500-710 exam practice, you only need to spend 20-30 hours to prepare for the exam. Maybe you will ask whether such a short time can finish all the content, we want to tell you that you can rest assured, because our 500-710 Learning Materials are closely related to the exam outline and the questions of our 500-710 guide questions are related to the latest and basic knowledge. You will pass the 500-710 exam only with our 500-710 exam questions.

## Cisco Video Infrastructure Implementation Sample Questions (Q27-Q32):

### NEW QUESTION # 27

Which option is the first thing to occur when a source endpoint dials a destination endpoint?

- A. An invite is sent to the Cisco Meeting Server.
- B. An alert is sent to the SIP Server.
- C. An invite is sent to the SIP Server.
- D. An alert is sent to the Cisco Meeting Server.

**Answer: C**

#### NEW QUESTION # 28

Which two methods are used by the Expressway for bandwidth control? (Choose two)

- A. regions
- B. pipes
- C. zones
- D. subzones
- E. URL

**Answer: B,D**

#### NEW QUESTION # 29

Cisco Meeting Server uses four API commands to interact with the server. Which API command is used to modify a configuration setting on the Cisco Meeting Server?

- A. PUT
- B. DELETE
- C. POST
- D. GET

**Answer: A**

#### NEW QUESTION # 30

Which type of API is used to configure settings on the Cisco Meeting Server?

- A. REST
- B. JSON-RPC
- C. XML-RPC
- D. XMP-RPC
- E. SOAP

**Answer: A**

#### NEW QUESTION # 31

Which two statements about endpoint registration authentication are true? (Choose two.)

- A. The endpoint and Expressway must be configured and synchronized with an NTP server delivering an identical time stamp.
- B. When a subzone is set for "Treat as Authenticated", the endpoint must have the correct authentications configured.
- C. Authentication credentials can be stored in the local database of the Expressway.
- D. SIP endpoints always need authentication credentials.
- E. Expressways and endpoints do not need to be synchronized with identical NTP timestamps.

**Answer: C,E**

Explanation:

\* Authentication credentials can be stored in the local database of the Expressway. This is true because the Expressway can use its local authentication database to verify the credentials of incoming requests from devices or external systems<sup>1</sup>. Alternatively, the Expressway can also use external authentication methods, such as LDAP, SAML, or OAuth<sup>1</sup>.

\* SIP endpoints always need authentication credentials. This is false because the Expressway's authentication policy can be
