2026 Integration-Architect – 100% Free Valid Mock Exam | Pass-Sure Integration-Architect Latest Exam Question

If people buy and use the Integration-Architect study materials with bad quality to prepare for their exams, it must do more harm than good for their exams, thus it can be seen that the good and suitable Integration-Architect study materials is so important for people' exam that people have to pay more attention to the study materials. In order to help people pass the exam and gain the certification, we are glad to the Integration-Architect Study Materials from our company for you.

Salesforce Certified Integration Architect Sample Questions (Q114-Q119):

NEW QUESTION # 114

What is the first thing an Integration Architect should validate if a callout from a Lightning Web Component to an external endpoint is failing?

- A. The endpoint domain has been added to Cross-Origin Resource Sharing.
- B. The endpoint URL has been added to Remote Site Settings.
- C. The endpoint URL has added been to an outbound firewall rule.
- D. The endpoint URL has been added to Content Security Policies.

Answer: D

NEW QUESTION # 115

A company has an external system that processes and tracks orders. Sales reps manage their leads and opportunity pipeline in Salesforce. In the current state, the two systems are disconnected and processing orders requires a lot of manual entry on sales rep part. This creates delays in processing orders and incomplete data due to manual entry.

As a part of modernization efforts the company decided to integrate Salesforce and the order management system. The following technical requirements were identified:

1. Orders need to be created in real time from salesforce
2. Minimal customization*, and code should be written due to a tight timeline and lack of developer resources
3. Sales reps need to be able to see order history and be able to see most up to date information on current order status.
4. Managers need to be able to run reports in Salesforce to see daily and monthly order volumes and fulfillment timelines.
5. The legacy system is hosted on premise and is currently connected to the Enterprise Service Bus (ESB). The ESB is flexible enough to provide any methods and connection types needed by salesforce team
6. There are 1000 sales reps. Each user processes/creates on average 15 orders per shift. Most of the orders contain 20-30 line items.

How should an integration architect integrate the two systems based on the technical requirements and system constraints?

- A. Use Salesforce big object, SOAP API and Dataloader.
- B. Use Salesforce custom object, custom REST API and ETL.
- **C. Use Salesforce standard object, REST API and ETL.**
- D. Use Salesforce external object and OData connector.

Answer: C

NEW QUESTION # 116

Universal Containers is a global financial company that sells financial products and services including, bank accounts, loans, and insurance. UC uses Salesforce Service cloud to service their customer via calls, live chat.

The support agents would open bank accounts on the spot for customers who are inquiring about UC bank accounts.

UC Core banking system is the system of record for bank accounts and all accounts opened in salesforce have to be synced in real-time to the core banking system. Support agents need to inform the customers with the newly created bank account ID which has to be generated from the core banking system.

Which integration pattern is recommended for this use case?

- A. Use outbound message.
- B. Use salesforce platform event.
- **C. Use request and reply.**
- D. Use streaming API to generate push topic.

Answer: C

Explanation:

Explanation

Using request and reply is the recommended integration pattern for this use case because it allows the support agents to send a request to the core banking system and receive a response with the bank account ID in real-time. This way, the support agents can inform the customers with the newly created bank account ID without any delay or inconsistency. Using streaming API to generate push topic is not a good solution because it is used for event-driven integration, not for web-service integration. Using outbound message is also not a good solution because it is a Salesforce-specific feature that uses SOAP web services, which may not be compatible with the core banking system. Using Salesforce platform event is also not a good solution because it is used for event-driven integration, not for web-service integration. NEW QUESTION # 117

A company accepts payment requests 24x7. Once they accept a payment request, their service level agreement (SLA) requires them to make sure each payment request is processed by their Payment System. They track payment requests using a globally unique identifier created at the Data Entry Point. Their simplified flow is as shown in the diagram.

They encounter intermittent update errors when two or more processes try to update the same Payment Request record at the same time.

Which two recommendations should an integration architect make to improve their SLA and update conflict handling?

Choose 2 answers

- A. Data Entry Point and Middleware should automatically retry requests.
- B. Payment System and Middleware should automatically retry requests.
- **C. Payment System should process a payment request only once.**
- **D. Middleware should coordinate request delivery and payment processing.**

Answer: C,D

Explanation:

Middleware should coordinate request delivery and payment processing, and Payment System should process a payment request only once. This solution ensures that each payment request is delivered to the Payment System in a reliable and consistent manner, and avoids duplicate or conflicting updates to the same Payment Request record. Middleware can act as a mediator between the Data Entry Point and the Payment System, and implement logic to handle errors, retries, and acknowledgments. Payment System can use the globally unique identifier to check if a payment request has already been processed, and avoid processing it again.

NEW QUESTION # 118

A large business-to-consumer (B2C) customer is planning to implement Salesforce CRM to become a customer-centric enterprise. Below is the B2C customer's current system landscape diagram.

The goals for implementing Salesforce include:

- * Develop a 360-degree view of the customer.
- * Leverage Salesforce capabilities for marketing, sales, and service processes.
- * Reuse Enterprise capabilities built for quoting and order management processes.

Which three systems from the current system landscape can be retired with the implementation of Salesforce?

- **A. Email Marketing, Sales Activity, and Case Management**
- B. Sales Activity, Email Marketing, and Order Management
- C. Order Management, Case Management, and Email Marketing
- D. Sales Activity, Order Management, and Case Management

Answer: A

NEW QUESTION # 119

.....

When it comes to a swift Integration-Architect exam preparation with the best reward, nothing compares VCE4Plus Integration-Architect dumps. They are made with an aim to provide you the most relevant information and knowledge within a few days and ensure you a brilliant success. Each Integration-Architect Exam Dumps is unique and vitally important for your preparation. The work you are supposed to do have already been done by our highly trained professionals.

Integration-Architect Latest Exam Question: <https://www.vce4plus.com/Salesforce/Integration-Architect-valid-vce-dumps.html>

The feedback of our customers is enough to legitimize our claims on our Integration-Architect exam questions, It will save your progress and give a report of your mistakes which will surely be beneficial for your overall Integration-Architect exam preparation, Salesforce Valid Integration-Architect Mock Exam Also you don't need to spend lots of time on studying other reference books, and you just need to take 20-30 hours to grasp our exam materials well, Salesforce Valid Integration-Architect Mock Exam We will then verify the authenticity of documents submitted and arrange the refund after receiving the email and confirmation process.

While interviewing e-retailers to gain insight into their operations, Integration-Architect Reliable Braindumps Pdf we consistently heard two comments, In this lesson we will explore why and how we connect switches in a redundant manner.

Selecting Valid Integration-Architect Mock Exam - No Worry About Salesforce Certified Integration Architect

The feedback of our customers is enough to legitimize our claims on our Integration-Architect Exam Questions, It will save your progress and give a report of your mistakes which will surely be beneficial for your overall Integration-Architect exam preparation.

Also you don't need to spend lots of time on studying Integration-Architect Reliable Braindumps Pdf other reference books, and you just need to take 20-30 hours to grasp our exam materials well, We will then verify the authenticity of Integration-Architect documents submitted and arrange the refund after receiving the email and confirmation process.
