PL-300 Exam Labs, PL-300 Valid Exam Discount

We are confident in the ability of PL-300 exam torrent and we also want to our candidates feel confident in our certification exam materials. For this reason, all questions and answers in our PL-300 valid dumps are certified and tested by our senior IT professionals. And we guarantee that if you failed the certification exam with our PL-300 Pdf Torrent, we will get your money back to reduce your loss.

Microsoft Power BI Data Analyst Sample Questions (Q84-Q89):

NEW QUESTION # 84

You need to create a DAX measure in the data model that only allows users to see projections at the appropriate levels of granularity.

How should you complete the measure? To answer, drag the appropriate values to the correct targets. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Topic 1, Contoso Ltd,

Overview

Contoso Ltd. is a manufacturing company that produces sports equipment. Contoso holds quarterly board meetings for which financial analysts manually prepare Microsoft Excel reports, including balance sheets and profit and loss statements for each of the company's four business units.

Data for the reports comes from the sources shown in the following table.

The balance sheet data is unrelated to the profit and loss results other than they both relate to dates.

The balance sheet data is imported and includes the final monthly balances of each account in the format shown in the following table.

The balance sheet data always includes a row for each account for each month.

The product catalog shows how products roll up to product categories, which roll up to the business units the product list is provided in the format shown in the following table.

Revenue data is provided at the date and product level. Expense data is provided at the date and department level.

Contoso wants the reports and datasets refreshed with minimum manual effort.

The company wants to provide the board with 3 single package of reports that will contain custom navigation and links to supplementary information.

Maintenance, including maturity updating data and access, must be minimized as much as possible.

The reports must be made available to the board from powerbi.com. A group in Microsoft Azure Active Directory' (Azure AD), part of Microsoft Entra. will be used to share information with the board. Contoso identifies the following security requirements for analyst access:

- * Analysts must be able to access all balance sheet and product catalog data.
- * Analysts must be able to access only the profit and loss data of their respective business unit
- * Analysts must be able to create new reports from the dataset that contains the profit and loss data, but the reports built by the analysts must NOT be included in the quarterly reports for the board.
- * Analysts must NOT be able to share the quarterly reports with anyone.
- * Analysts must NOT be able to make new reports by using the balance sheet data.

You plan to relate the balance sheet table to a date table in Power BI in a many-to-one relationship based on the last day of the month. At least one of the balance sheet reports in the quarterly reporting package must show the ending balances for the quarter, as well as for the previous quarter.

The date table will contain the columns shown in the following table.

The definitions and attributes for the products departments, and business units must be consistent across all the reports. The board must be able to get the following information from the quarterly reports:

- * Revenue trends over time
 - * The ending balances of each account
 - * Changes in long-term liabilities from the previous quarter
 - * The percent of total revenue contributed by each product category
 - * A comparison of quarterly revenue versus the same quarter from the previous year
- The reports must be updated with the latest data by 5 AM each day.

Overview

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Existing Environment

Contoso, Ltd. is a manufacturing company that produces outdoor equipment Contoso has quarterly board meetings for which financial analysts manually prepare Microsoft Excel reports, including profit and loss statements for each of the company's four business units, a company balance sheet, and net income projections for the next quarter.

Data and Sources

Data for the reports comes from three sources. Detailed revenue, cost and expense data comes from an Azure SQL database.

Summary balance sheet data comes from Microsoft Dynamics 365 Business Central. The balance sheet data is not related to the profit and loss results; other than they both relate to dates.

Monthly revenue and expense projections for the next quarter come from a Microsoft SharePoint Online list. Quarterly projections relate to the profit and loss results by using the following shared dimensions: date, business unit, department, and product category.

Net Income Projection Data

Net income projection data is stored in a SharePoint Online list named Projections in the format shown in the following table.

Revenue projections are set at the monthly level and summed to show projections for the quarter.

Balance Sheet Data

The balance sheet data is imported with final balances for each account per month in the format shown in the following table.

There is always a row for each account for each month in the balance sheet data.

Dynamics 365 Business Central Data

Business Central contains a product catalog that shows how products roll up to product categories, which roll up to business units.

Revenue data is provided at the date and product level. Expense data is provided at the date and department level.

Business Issues

Historically, it has taken two analysts a week to prepare the reports for the quarterly board meetings. Also, there is usually at least one issue each quarter where a value in a report is wrong because of a bad cell reference in an Excel formula. On occasion, there are conflicting results in the reports because the products and departments that roll up to each business unit are not defined consistently.

Planned Changes

Contoso plans to automate and standardize the quarterly reporting process by using Microsoft Power BI. The company wants to how long it takes to populate reports to less than two days. The company wants to create common logic for business units, products, and departments to be used across all reports, including, but not limited, to the quarterly reporting for the board.

Technical Requirements

Contoso wants the reports and datasets refreshed with minimal manual effort. The company wants to provide a single package of reports to the board that contains custom navigation and links to supplementary information.

Maintenance, including manually updating data and access, must be minimized as much as possible.

Security Requirements

The reports must be made available to the board from powerbi.com. A mail-enabled security group will be used to share information with the board.

The analysts responsible for each business unit must see all the data the board sees, except the profit and loss data, which must be restricted to only their business unit's data. The analysts must be able to build new reports from the dataset that contains the profit and loss data, but any reports that the analysts build must not be included in the quarterly reports for the board. The analysts must not be able to share the quarterly reports with anyone.

Report Requirements

You plan to relate the balance sheet to a standard date table in Power BI in a many-to-one relationship based on the last day of the month. At least one of the balance sheet reports in the quarterly reporting package must show the ending balances for the quarter, as well as for the previous quarter.

Projections must contain a column named RevenueProjection that contains the revenue projection amounts. A relationship must be created from Projections to a table named Date that contains the columns shown in the following table.

The relationships between products and departments to business units must be consistent across all reports.

The board must be able to get the following information from the quarterly reports:

- * Revenue trends over time
- * Ending balances for each account
- * A comparison of expenses versus projections by quarter
- * Changes in long-term liabilities from the previous quarter
- * A comparison of quarterly revenue versus the same quarter during the prior year

NEW QUESTION # 85

You use Power BI Desktop to create a Power BI data model and a blank report. You need to add the Word Cloud visual shown in the following exhibit to the report.

The solution must minimize development effort.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

- 1 - From a web browser, download the PBIVIZ.
- 2 - Populate the drillthrough fields.
- 3 - Format the data colors and title.

NEW QUESTION # 86

You have a Power Bi model that contains a table named Date. The Date table contains the following columns:

- * Date
- * Fiscal year
- * Fiscal Quarter
- * Month Name
- * Calendar Year
- * Week Number
- * Month Number
- * Calendar Quarter

You need to create a calculated table based on the Date table. The calculated table must contain only unique combinations of values for Calendar Year, Calendar Quarter and Calendar Month. Which DAX function should you include in the table definition?

- **A. SUMMARIZE**
- B. CALCULATE
- C. ADDCOLUMNS
- D. DATATABLE

Answer: A

NEW QUESTION # 87

□ Each employee has one manager as shown in the ParentEmployeeID column, All reporting paths lead to the CEO at the top of the organizational hierarchy.

You need to create a calculated column that returns the count of levels from each employee to the CEO.

Which DAX expression should you use?

-
- A. Option A
- **B. Option B**
- C. Option D
- D. option C

Answer: B

NEW QUESTION # 88

You need to create relationships to meet the reporting requirements of the customer service department.

What should you create?

- A. a one-to-many relationship from Date[date_id] to Sales[sales_date_id] and another one-to-many relationship from Date[date_id] to Sales[sales_ship_date_id]
- B. a one-to-many relationship from Date[date_id] to Sales[sales_date_id] and another one-to-many relationship from Date[date_id] to Weekly_Returns[week_id]
- C. a one-to-many relationship from Sales[sales_date_id] to Date[date_id] and a one-to-many relationship from Sales[sales_ship_date_id] to Date[date_id]
- D. an additional date table named ShipDate, a many-to-many relationship from Sales[sales_date_id] to Date[date_id], and a many-to-many relationship from Sales[sales_ship_date_id] to ShipDate[date_id]
- **E. an additional date table named ShipDate, a one-to-many relationship from Sales[sales_date_id] to Date[date_id], and a one-to-many relationship from Sales[sales_ship_date_id] to ShipDate[date_id]**

Answer: E

Explanation:

Scenario: The customer service department requires a visual that can be filtered by both sales month and ship month independently.
