Reliable SAP C-ACDET-2506 Test Book & C-ACDET-2506 Learning Materials

As customer-oriented company, we believe in satisfying the customers at any costs. Instead of focusing on profits, we determined to help every customer harvest desirable outcomes by our C-ACDET-2506 training materials. So our staff and after-sales sections are regularly interacting with customers for their further requirements and to know satisfaction levels of them. We want to finish long term objectives through customer satisfaction and we have achieved it already by our excellent C-ACDET-2506 Exam Questions. In this era of cut throat competition, we are successful than other competitors. What is more, we offer customer services 24/7. Even if you fail the exams, the customer will be reimbursed for any loss or damage after buying our C-ACDET-2506 guide dump. One decision will automatically lead to another decision, we believe our C-ACDET-2506 guide dump will make you fall in love with our products and become regular buyers.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q46-Q51):

NEW QUESTION # 46

Which of the following classes are NOT frequently customized in SAP Ariba Strategic Sourcing solutions?

- A. **AbstractDocument**
- B. **ExtendedAddressRep**
- C. **ContractWorkspace**
- D. **SourcingProject**

Answer: A

Explanation:

Among the provided options, **AbstractDocument** is not frequently customized in SAP Ariba Strategic Sourcing projects. Commonly customized classes include **ContractWorkspace**, **ExtendedAddressRep**, and **SourcingProject**, as they relate directly to contracts, addresses, and sourcing projects—key business objects in the suite. **AbstractDocument** serves as a more generic superclass and typically does not require direct customization.

NEW QUESTION # 47

Which Activate phase is tied to performing configurations in your SAP Ariba Strategic Sourcing suite solution?

- A. Configure
- **B. Realize**
- C. Setup
- D. Deploy

Answer: B

Explanation:

The **Realize** phase is where the core configuration activities happen. During **Realize**, the project team sets up system parameters, creates templates, defines master data fields, and configures business processes in the SAP Ariba Strategic Sourcing suite. This phase includes building, unit testing, and preparing the system for user acceptance testing. **Deploy** is focused on cutover and go-live, while **Configure** and **Setup** are not formal SAP Activate phases for Ariba.

NEW QUESTION # 48

During a Bluefield migration, you discover missing flex master data templates. What do you do?

- A. Use reporting workaround
- B. Ignore them
- **C. Rebuild them manually in production**
- D. Defer to post-go-live

Answer: C

Explanation:

In a Bluefield deployment scenario, SAP Ariba requires that all Flex Master Data (FMD) templates and their associated data be present in the Production environment before migrating related configuration elements. If you find missing FMD templates during migration, the recommended approach is to manually recreate the missing templates in Production and load the relevant data. This is essential to maintain integrity because many custom fields depend on these templates, and missing templates can cause migration failures or broken references. Deferring or ignoring the issue risks operational disruptions and data inconsistencies. Reporting workarounds do not address template dependencies and therefore are ineffective. This aligns with SAP's guidance on master data migration within Bluefield scenarios to ensure successful, error-free deployments.

NEW QUESTION # 49

Which of the following applies in a greenfield deployment scenario when migrating configurations from your test site?

- A. if any configuration type fails during the migration process, you cannot create a new migration request.
- **B. You cannot make other configuration updates in ICM when a migration operation is in progress.**
- C. You can revert migrated configurations from the target site.
- **D. The status changes to Complete when migration is finished.**

Answer: B,D

NEW QUESTION # 50

What system is provided by SAP Free of charge and provides an outline of how to deploy SAP Ariba solutions with a task list and project management format?

- A. SAP Cloud Application Lifecycle Management
- B. SAP for Me
- **C. SAP Ariba Enablement Workbook**
- D. SAP Cloud Project Studio

Answer: C

NEW QUESTION # 51

.....
