The questions are designed to be challenging and require the candidate to think critically about the concepts and principles of the framework.

## Scrum SAFe Practitioner Exam (6.0) Sample Questions (Q255-Q260):

### NEW QUESTION # 255

What team level event has its focus mostly on the next Iteration, but it allows time to discuss future Iterations and even Features for the next PI?

- **A. Backlog Refinement Session**
- B. Iteration Review
- C. Daily standup
- D. Iteration Retrospective

**Answer: A**

### NEW QUESTION # 256

During System Demo, Team B states that the most recent release failed because of poor version control. They share their plan for preventing similar mistakes from happening in the future. Which of the following SAFe Core Values is Team B demonstrating?

- **A. Transparency**
- B. Organize around value
- C. Visualizing work
- D. Siloed Thinking

**Answer: A**

Explanation:

Transparency is one of the four core values of SAFe that represents the foundational beliefs that are key to SAFe's effectiveness. Transparency means making all the work visible, along with its priorities, status, dependencies, and outcomes. Transparency also means being honest and open about the challenges, risks, failures, and learnings that occur during the development process. By stating the reason for the release failure and sharing their improvement plan, Team B is demonstrating transparency to the other teams and stakeholders in the System Demo. Transparency helps to build trust, collaboration, alignment, and continuous learning in the ART and the Solution Train. ### NEW QUESTION # 257

Team A has seven developers that can define and build any application the organization requires. Team A works with another team to test and deploy their work. Can Team A be considered a high-functioning Agile Team?

- **A. No, because they are not cross-functional**
- B. Yes, because they use another team to deploy
- C. No, because they have fewer than ten developers
- D. Yes, because they can build any application the organization requires

**Answer: A**

Explanation:

A high-functioning Agile Team is a cross-functional group of typically ten or fewer individuals with all the skills necessary to define, build, test, and deliver value to their customer<sup>1</sup>. Team A is not cross-functional because they depend on another team to test and deploy their work, which creates handoffs and delays in the value delivery process. A cross-functional team should be able to perform all the activities required to deliver a potentially releasable increment of value in each iteration<sup>2</sup>. Team A should collaborate with the other team to integrate their testing and deployment capabilities and form a single Agile Team that can deliver value

independently. References: Agile Teams - Scaled Agile Framework, 7 Qualities of High-Performing Agile Teams | AgileConnection

#### NEW QUESTION # 258

Why is it important to decouple deployment from release?

- A. To allow early access to specific groups of customers
- B. To make deploying of assets a business decision
- C. To enable releasing functionality on demand to meet business needs
- D. To remove the need to respond quickly to production issues

**Answer: C**

Explanation:

= Decoupling deployment from release means having the ability to deploy changes to a system without having to make a new release of the system. This can be a valuable capability when making changes to a system that is in production and needs to be rolled back quickly if there are problems. It also allows releasing functionality on demand to meet business needs, which is one of the aspects of the Continuous Delivery Pipeline in SAFe. By decoupling deployment from release, enterprises can achieve faster feedback, higher frequency, and greater safety in delivering value to customers. References: = Release on Demand, DevOps:

Why Is It Important to Decouple Deployment From Release?, Why Is It Important to Decouple Deployment from Release?, What a Lovely Decouple: Why Decoupling Deploy from Release Is a Game Changer

#### NEW QUESTION # 259

Which of the below are Core Competencies for Business Agility?

- A. Lean-Agile Leadership
- B. Continuous Learning Culture
- C. Organizational Agility
- D. Team and Technical Agility

**Answer: A,B,C,D**
