Compatible with iOS, Mac, Android, and Windows operating systems, it provides all the features of the desktop-based C_SEC_2405 Practice Exam software.

SAP Certified Associate - Security Administrator Sample Questions (Q26-Q31):

NEW QUESTION # 26

In the administration console of the Cloud Identity Services, which authentication providers are available?

Note: There are 2correct answers to this question.

- A. Concur
- B. FieldGlass
- C. Successfactors
- D. Ariba

Answer: C,D

Explanation:

* Context:SAP Cloud Identity Services provide integration with various authentication providers to facilitate secure access to SAP solutions.

* Solution Descriptions:

* SuccessFactors and Ariba are supported as authentication providers in the Cloud Identity Services Administration Console.

* Other options like FieldGlass and Concur are not natively listed as authentication providers in this context.

SAP Security References:

* SAP Cloud Identity Services Documentation

* SAP SuccessFactors and Ariba Integration Guides

NEW QUESTION # 27

Which authorization objects can be used to restrict access to SAP Enterprise Search models in the SAP Fiori launchpad? Note:

There are 2 correct answers to this question.

- A. S_ESH_CONN
- B. RSDDLTIPI
- C. SDDLVIEW
- D. S_ESH_ADMIN

Answer: A,C

Explanation:

To restrict access to SAP Enterprise Search models in the SAP Fiori launchpad, the authorization objects SDDLVIEW and S_ESH_CONN are used. SDDLVIEW controls access to data definition language (DDL) views, which are often underlying components of search models, ensuring that only authorized users can access or execute these views within the Fiori environment. S_ESH_CONN governs access to enterprise search connectors, which link search models to the Fiori launchpad, allowing administrators to restrict which users can utilize specific search functionalities. These objects provide granular control over search model access, aligning with security and segregation of duties requirements. S_ESH_ADMIN is used for administrative tasks related to enterprise search, not direct model access, and RSDDLTIPI is not a standard SAP authorization object. By leveraging SDDLVIEW and S_ESH_CONN, SAP ensures that search capabilities in the Fiori launchpad are securely managed, preventing unauthorized access to sensitive data while enabling efficient search functionality for authorized users.

NEW QUESTION # 28

Which solution analyzes an SAP system's administrative areas to safeguard against potential threats?

- A. SAP Enterprise Threat Detection
- B. SAP EarlyWatch Alert
- C. SAP Security Optimization Services
- D. SAP Code Vulnerability Analyzer

Answer: C

Explanation:

* Context: SAP Security Optimization Services help assess administrative and security configurations, providing tailored recommendations to safeguard SAP systems against threats.

* Solution Description:

* SAP Security Optimization Services analyze configurations, authorizations, and operational practices in SAP systems, identifying vulnerabilities and providing actionable recommendations for system hardening.

* Elimination of Other Options:

* A. SAP EarlyWatch Alert: Focuses on system performance, not specifically on administrative security.

* B. SAP Enterprise Threat Detection: Monitors runtime threats but does not assess administrative setups.

* C. SAP Code Vulnerability Analyzer: Analyzes code, not administrative areas.

SAP Security References:

* SAP Help Portal (Security Optimization Service Guidelines)

* SAP Support Notes related to system security audits

NEW QUESTION # 29

Which of the following rules does SAP recommend you consider when you define a role-naming convention for an SAP S/4HANA on-premise system? Note: There are 3 correct answers to this question.

- A. Role names must NOT start with "SAP"
- B. Role names are system language-independent
- C. Role names can be no longer than 20 characters
- D. Role names can be no longer than 30 characters
- E. Role names are system language-dependent

Answer: A,B,D

Explanation:

When defining a role-naming convention in an SAP S/4HANA on-premise system, SAP recommends the following rules:

- * Role Names Must NOT Start with "SAP" (A):
- * The prefix "SAP" is reserved for standard roles delivered by SAP.
- * Custom roles should use a different prefix to avoid confusion and potential conflicts during upgrades or support packages.
- * Role Names Are System Language-Independent (B):
- * Role names should be consistent across different language settings.
- * Using language-independent names ensures that roles are easily identifiable and maintainable regardless of the system's logon language.
- * Role Names Can Be No Longer Than 30 Characters (E):
- * The maximum length for role names is 30 characters.
- * Keeping within this limit ensures compatibility with SAP standards and avoids issues in role assignment and maintenance.
