

100% Pass Quiz 2026 Relativity RCA Realistic Lead2pass

RelativityOne RCA Sample Quiz fully solved with verified solutions(100% pass)

Data In and Out

What does the Preview Choices and Folders option in the Relativity Desktop (RDC) check? Select all that apply.

- The number of folders you create in the browser.
 - The number of documents that are included in each folder.
 - The number of choices you create by importing the records.
 - The order in which folders display in the workspace. - answer The number of folders you create in the browser.
- The number of choices you create by importing the records.

Data In and Out -

T/F: You can change a field's type after you create the field. - answer False

Data In and Out -

What image types can be imported into Relativity? (Select all that apply.)

It is known to us that passing the RCA exam is very difficult for a lot of people. Choosing the correct study materials is so important that all people have to pay more attention to the study materials. If you have any difficulty in choosing the correct RCA preparation materials, here comes a piece of good news for you. The RCA Prep Guide designed by a lot of experts and professors from company are very useful for all people to pass the practice exam and help them get the Relativity certification in the shortest time. And our pass rate is high as more than 98%.

Probably you've never imagined that preparing for your upcoming certification RCA could be easy. The good news is that VCE4Dumps's dumps have made it so! The brilliant certification exam RCA is the product created by those professionals who have extensive experience of designing exam study material. These professionals have deep exposure of the test candidates' problems and requirements hence our RCA cater to your need beyond your expectations.

2026 100% Free RCA –Efficient 100% Free Lead2pass | Valid RCA Exam Fee

With all the above merits, the most outstanding one is 100% money back guarantee of your success. Our Relativity experts deem it impossible to drop the RCA exam, if you believe that you have learnt the contents of our RCA study guide and have revised your learning through the RCA Practice Tests. If you still fail to pass the exam, you can take back your money in full without any deduction. Such bold offer is itself evidence on the excellence of our RCA study guide and their indispensability for all those who

want success without any second thought.

Relativity Certified Administrator Sample Questions (Q12-Q17):

NEW QUESTION # 12

After adding a pie chart to a dashboard, what is one resulting action when you select multiple pieces of the pie?

- A. No other pivot charts can be changed.
- **B. Your selection becomes a condition added to the search panel.**
- C. The document list will highlight the documents that meet the condition.
- D. The new configuration is automatically saved as a new dashboard.

Answer: B

Explanation:

The correct answer is C. Your selection becomes a condition added to the search panel. Relativity's Pivot and dashboard documentation explains that pie charts support multi-select, typically using Ctrl + Click , and that selecting values from charts filters the document list. Relativity's Analytics guide further states that when you select values from a chart, a filter condition is set in the Search panel corresponding to your choice .

That matches option C most directly.

Option A is not the best answer because the effect is more than a temporary highlight; Relativity applies a filter condition to the active search context. Option B is unsupported by the documentation. Option D is also incorrect because dashboard configurations are not automatically saved as new dashboards merely by interacting with chart segments; dashboards must be explicitly saved by the user. Therefore, when you select multiple pieces of a pie chart, Relativity adds that selection as a condition in the search panel , which then drives the filtered results shown in the document list and related widgets.

NEW QUESTION # 13

What problem could you identify using the Imaging Warnings tab after imaging a set of documents?

- A. Native contains content that cannot be imaged.
- B. System was not able to image embedded images.
- C. Native was not imaged because it is password protected.
- **D. Possible cut-off content on imaged MSG or EML files.**

Answer: D

Explanation:

The correct answer is C. Possible cut-off content on imaged MSG or EML files. Relativity's official Imaging Warnings documentation states that the Imaging Warnings object identifies possible cut-off content on imaged MSG or EML files and stores that information. It further explains that users can review these items on the Imaging Warnings tab after imaging completes.

The other choices describe imaging failures or limitations, but they are not what the Imaging Warnings tab is specifically designed to identify. Password-protected failures and general non-imageable content are handled through other imaging or processing error mechanisms. The Imaging Warnings feature is much narrower and is specifically meant to flag the risk that content in imaged MSG or EML items may have been cut off in the rendered output. Therefore, the correct answer is C .

NEW QUESTION # 14

What is a prerequisite to migrate documents from one workspace to another using Relativity Integration Points RIP?

- A. RIP must be installed in the source and destination workspaces.
- B. RIP must be installed at the instance level.
- C. RIP is a standalone product and does not need to be installed.
- **D. RIP must be installed in the source workspace.**

Answer: D

Explanation:

The correct answer is C. RIP must be installed in the source workspace. Relativity's Integration Points documentation states that to use Integration Points successfully, you must install the application to at least one workspace . In the specific context of promoting data between workspaces, Relativity also states that you are not required to have Integration Points installed on the destination

workspace . That means the practical prerequisite is installation in the source workspace , not both source and destination. This rules out the other choices. Integration Points is not described as an instance-level-only install requirement, so option A is incorrect. Option B is too broad because the destination workspace installation is explicitly not required. Option D is also incorrect because Integration Points is an application that must be installed in a workspace to be used. Therefore, for migrating documents from one workspace to another with RIP, the required prerequisite is that Integration Points be installed in the source workspace .

NEW QUESTION # 15

How can you secure a workspace from a user?

- A. By changing the security settings of the user's IP address.
- B. By excluding the workspace name from a user's profile settings.
- C. By removing that user's security group from the workspace.
- D. By individually securing instance-level views from a user.

Answer: C

Explanation:

The correct answer is A. By removing that user's security group from the workspace. In Relativity, workspace access is granted through groups , not by attaching workspace rights directly to individual users. Relativity's official security documentation explains that you set permissions by adding groups to a workspace and configuring those group permissions there. Users then inherit access through their group memberships. As a result, the standard way to secure a workspace from a user is to remove the group that gives that user access, or remove the user from the relevant group. The other options do not reflect how Relativity security is structured. User profile settings do not control workspace visibility in the manner described. IP-based security is not the mechanism for ordinary workspace access control in this scenario. Instance-level view security is also too narrow and does not remove the user's overall workspace access; even if certain views were restricted, the user could still potentially access the workspace through other permitted objects or tabs. From an RCA perspective, this question tests a foundational principle: workspace security is group-based . Administrators grant or revoke access by managing the relationship between groups and workspaces, then managing which users belong to those groups. Therefore, to secure a workspace from a user, the correct action is to remove the user's access- granting security group from that workspace.

NEW QUESTION # 16

Which of these dtSearch queries would cause a syntax error on a search terms report STR?

- A. dog or not cat
- B. dog or cat
- C. dog not cat
- D. dog and not cat

Answer: C

Explanation:

The correct answer is B. dog not cat. Relativity's dtSearch syntax guidance explains that the NOT operator can be used by itself at the beginning of an expression, or in the middle of an expression only when combined with either AND or OR. Relativity gives examples such as apple OR NOT pear and applesauce and NOT pear as valid syntax. That means expressions like dog OR NOT cat and dog AND NOT cat are valid, while dog NOT cat is missing the required connector and therefore causes a syntax problem. Relativity's Search Terms Report error documentation further explains that STRs surface syntax errors when the search index cannot process the term because of invalid syntax. In this case, dog not cat violates the dtSearch operator rule, so it is the option most clearly expected to fail with a syntax error in a search terms report. Option A is a standard Boolean expression and is valid. Options C and D both include the required connector before NOT, which matches Relativity's documented dtSearch usage. Therefore, among the listed queries, dog not cat is the one that would cause a syntax error on an STR.

NEW QUESTION # 17

.....

In the era of rapid changes in the knowledge economy, do you worry that you will be left behind? Let's start by passing the RCA exam. Getting a RCA certificate is something that many people dream about and it will also bring you extra knowledge and economic benefits. The RCA latest question we provide all candidates that that is compiled by experts who have good knowledge of

exam, and they are very experience in compile study materials. Not only that, our team checks the update every day, in order to keep the latest information of RCA Exam Question.
