Apple Deployment and Management Exam Latest Material Can Help You Save Much Time - Itexamguide

The Apple Deployment and Management Exam (DEP-2025) questions are available in three easy-to-use forms. The first one is a Apple Deployment and Management Exam (DEP-2025) Dumps PDF form, and it is printable and portable. You can print Apple Deployment and Management Exam (DEP-2025) questions PDF or can access them by saving them on your smartphones, tablets, and laptops. The Apple Deployment and Management Exam (DEP-2025) dumps PDF format can be used anywhere, anytime and is essential for students who like to learn from their smart devices for Apple Deployment and Management Exam (DEP-2025) exam.

Apple Deployment and Management Exam Sample Questions (Q139-Q144):

NEW QUESTION # 139
What's required to use content caching on a Mac?

- A. An MDM solution
- B. A VPN configuration
- C. macOS 10.13 or later
- D. Supervision

Answer: C

Explanation:
Content caching requires a Mac running macOS 10.13 (High Sierra) or later, enabling it to cache content like app updates and iCloud data for network efficiency. An MDM solution (option A) can manage caching settings but isn't required to enable it.

Supervision (option C) is unrelated, as caching is a macOS feature, not a supervision requirement. A VPN configuration (option D) doesn't apply. The Apple Platform Deployment Guide specifies the macOS version requirement for content caching.

NEW QUESTION # 140

A user enrolled their personally owned iPhone in your MDM solution to access organizational services.
Which of these is cryptographically separated for managed and personal data?

- A. Keychain items
- B. Safari profiles
- C. Safari bookmarks
- D. Contacts

Answer: A

Explanation:
User Enrollment separates managed Keychain items. TheiOS Deployment Referencestates, "With User Enrollment, Keychain items associated with a Managed Apple ID are stored in a distinct cryptographic container." Options B, C, and D aren't separated unless tied to managed apps.
References:
iOS Deployment Reference, "User Enrollment" section.
Apple Platform Deployment Guide, "Data Separation" section.

NEW QUESTION # 141

What's required to deploy macOS configuration profiles to devices?

- A. User acceptance
- B. An MDM solution
- C. An Apple Developer account
- D. A VPN configuration

Answer: B

Explanation:
Deploying macOS configuration profiles to devices requires an MDM solution, which pushes the profiles remotely via APNs to enrolled devices, ensuring centralized management. An Apple Developer account (option A) is for app development, not profile deployment. User acceptance (option C) is needed for manual installation but not for MDM deployment, especially on supervised devices. A VPN configuration (option D) is unrelated. The Apple Platform Deployment Guide specifies MDM as the standard method for deploying profiles to macOS devices.

NEW QUESTION # 142

Which feature allows IT administrators to manage Bluetooth settings on a device?

- A. Configuration profiles
- B. Find My
- C. MDM
- D. iCloud

Answer: A

Explanation:
Configuration profiles allow IT administrators to manage Bluetooth settings, such as disabling Bluetooth entirely or restricting pairing with specific devices, enhancing security and compliance. These profiles are deployed via MDM or manually. Find My (option B) and iCloud (option C) are unrelated to Bluetooth management. MDM (option D) delivers profiles, but the profiles define the settings. The Apple Platform Deployment Guide details Bluetooth configuration via profiles.

NEW QUESTION # 143

Which type of declarations are defined in declarative device management?

- A. Security
- B. Activations
- C. Devices
- D. Enrollments

Answer: B

Explanation:
Declarative Device Management (DDM) modernizes MDM by allowing devices to proactively report state changes and apply configurations autonomously. Apple Learning materials specify that DDM revolves arounddeclarations- structured sets of data that describe desired management states. Among the types of declarations,Activationsare critical. Activations define which configurations or policies are applied under certain conditions, such as enforcing a passcode policy or requiringOS updates. Devices then self-manage against these declarations and report compliance back to the MDM. Other terms like "Devices" or "Enrollments" describe concepts withinMDM but are not types of declarations. "Security" is a policy outcome, not a declaration type. Therefore, the correct declaration type as described in Apple's DDM model isActivations.
