Our DevOps-Foundation exam questions have a very high hit rate, of course, will have a very high pass rate. Before you select a product, you must have made a comparison of your own pass rates. Our DevOps-Foundation study materials must appear at the top of your list. And our DevOps-Foundation learning quiz has a 99% pass rate. This is the result of our efforts and the best gift to the user. Our DevOps-Foundation Study Materials can have such a high pass rate, and it is the result of step by step that all members uphold the concept of customer first. If you use a trial version of DevOps-Foundation training prep, you will want to buy it!

Peoplecert DevOps-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Measurement, Metrics, and Reporting: This section of the exam measures the skills of DevOps engineers and covers metrics that help monitor and evaluate the performance of DevOps practices. Topics include speed, quality, culture, change lead time, cycle time, and the use of dashboards, value-driven metrics, and AIOps in reporting and decision-making.
Topic 2	<ul style="list-style-type: none">Automation, Architecting DevOps Toolchains: This section of the exam measures the skills of IT operations specialists and covers key automation principles within the DevOps toolchain. It focuses on CICD pipelines, Infrastructure as Code, containerisation, cloud-native architecture, platform engineering, and emerging technologies like Machine Learning and Generative AI in DevOps contexts.
Topic 3	<ul style="list-style-type: none">Key DevOps Practices: This section of the exam measures the skills of DevOps engineers and covers core DevOps practices including Continuous Integration, Continuous Testing, Continuous Delivery, and Continuous Deployment. It explores concepts such as Site Reliability Engineering, DevSecOps, Value Stream Management, Platform Engineering, and modern practices like ChatOps and observability.

Topic 4	<ul style="list-style-type: none"> Exploring DevOps: This section of the exam measures the skills of DevOps engineers and covers the foundations of DevOps, including its emergence as a critical discipline in the digital era. It introduces learners to the basic purpose, evolution, and significance of DevOps in modern software and infrastructure environments.
Topic 5	<ul style="list-style-type: none"> Sharing, Shadowing and Evolving: This section of the exam measures the skills of IT operations specialists and covers the collaborative and adaptive elements of DevOps in enterprise settings. It explores leadership, typical barriers and risks, and outlines how organisations can evolve their DevOps practices through continuous learning, peer shadowing, and experience-based transformation.
Topic 6	<ul style="list-style-type: none"> Core DevOps Principles: This section of the exam measures the skills of IT operations specialists and covers essential DevOps principles such as the Three Ways, the Theory of Constraints, and Chaos Engineering. It also introduces the concept of learning organisations, showing how systemic thinking supports continuous improvement.
Topic 7	<ul style="list-style-type: none"> Business and Technology Frameworks: This section of the exam measures the skills of IT operations specialists and covers various supporting frameworks that intersect with DevOps. These include Agile and Lean, IT Service Management, Value Stream Management, Site Reliability Engineering, Safety Culture, Learning Organisations, and Continuous Funding models that enable long-term adaptability.

New DevOps-Foundation Exam Dumps | Reliable DevOps-Foundation Test Price

Having more competitive advantage means that you will have more opportunities and have a job that will satisfy you. This is why more and more people have long been eager for the certification of DevOps-Foundation. There is no doubt that obtaining this DevOps-Foundation certification is recognition of their ability so that they can find a better job and gain the social status that they want. Most people are worried that it is not easy to obtain the certification of DevOps-Foundation, so they dare not choose to start. We are willing to appease your troubles and comfort you. We are convinced that our DevOps-Foundation test material can help you solve your problems. Compared to other learning materials, our products are of higher quality and can give you access to the DevOps-Foundation certification that you have always dreamed of. Now let me introduce our DevOps-Foundation test questions for you. I will show you our study materials.

Peoplecert PeopleCert DevOps Foundationv3.6Exam Sample Questions (Q35-Q40):

NEW QUESTION # 35

Which of the following sets of skills are essential for a DevOps professional?

- A. Business, Agile, infrastructure, communication
- B. **Business, technical, core (soft) skills, self-management**
- C. Business, Agile, ITSM, Lean and networking
- D. Business, development, cloud and containers, core skills

Answer: B

Explanation:

A DevOps professional needs:

Business skills: Understanding the business context and value.

Technical skills: Automation, coding, cloud, infrastructure.

Core (soft) skills: Collaboration, communication, empathy, learning.

Self-management: Time, priorities, feedback.

Other options miss the full blend or focus too much on tech or process.

Extract-style reference:

"DevOps success requires a blend of business, technical, and core (soft) skills, as well as the ability to self-manage and continuously learn."

- DevOps Handbook; Accelerate

PeopleCert DevOps Foundation v3.6: Holistic skillsets are emphasized for cross-functional teams.

NEW QUESTION # 36

An organization is using ChatOps to improve communication and collaboration.

How can this organization transfer incident-related data from its chat client to its IT service management tool?

- A. None of the above
- B. Use an Application Programming Interface (API)
- C. Manually cut and paste the data
- D. It doesn't need to as ChatOps is only used for minor incidents

Answer: B

Explanation:

ChatOps is the integration of chat platforms with tools and workflows, allowing teams to manage operations and incidents directly through chat.

* Using an API (Application Programming Interface) is the correct, scalable way to transfer incident-related data automatically from chat clients to ITSM (IT Service Management) tools, preserving traceability and reducing manual errors.

Why not manual cut/paste?

Manual processes are error-prone and slow; DevOps aims for automation and integration.

Extract-style reference:

"APIs enable seamless transfer of information between ChatOps platforms and ITSM tools, supporting automation, accuracy, and auditability in incident management."

- DevOps Handbook; ChatOps: Managing Operations and Collaboration in the Cloud, Jason Hand PeopleCert DevOps Foundation v3.6: Promotes APIs for integration, automation, and collaboration.

NEW QUESTION # 37

Successful DevOps relies on the adoption and integration of multiple frameworks including:

- A. Agile, ITSM, and Lean
- B. A shared vision, goals, and incentives
- C. Agile Service Management, Change Management, and Release Management
- D. Value Stream Management, Lean, Agile

Answer: A

Explanation:

DevOps is not a standalone framework-it draws from several methodologies and frameworks to achieve its goals. PeopleCert emphasizes the integration of:

* Agile for iterative delivery, customer collaboration, and responsiveness

* ITSM for effective service delivery and operational stability

* Lean for waste elimination, flow optimization, and continuous improvement. While Agile lists relevant processes, they are subsets rather than foundational frameworks. C describes cultural alignment but is not a set of frameworks. D includes valuable concepts but does not match the official trio highlighted in PeopleCert's materials.

Thus, B is correct.

The DevOps Handbook- Cross-Framework Integration

NEW QUESTION # 38

Which of the following could encourage the sharing of tools, knowledge, discoveries and lessons learned between development and operational teams?

- A. Common workspaces
- B. Hackathons
- C. Simulations

- D. All of the above

Answer: D

Explanation:

PeopleCert outlines multiple methods to encourage sharing and collaboration:

- * A: Common workspaces promote informal communication and rapid problem-solving.
- * B: Hackathons provide an engaging environment for innovation, cross-functional teamwork, and sharing solutions.
- * C: Simulations (e.g., Game Days) allow teams to practice scenarios, learn from each other, and share insights in a low-risk setting. Each of these fosters trust, transparency, and mutual learning. Using them together can amplify cultural change and skill growth. Thus, D-All of the above-is correct.

NEW QUESTION # 39

Which of the following is NOT a characteristic of DevOps?

- A. World-class stability, reliability, availability and security
- B. **Fast flow of unplanned work into production**
- C. Ensuring overall organizational success
- D. Working towards a common goal

Answer: B

Explanation:

A fast flow of unplanned work into production is not a characteristic of DevOps. In fact, DevOps practices strive to minimize unplanned work (like emergency changes or outages) through automation, testing, collaboration, and rigorous change control. The other options-ensuring organizational success, working toward a common goal, and world-class stability/reliability-are all key DevOps characteristics.
