Reliable Snowflake ARA-C01 Exam Tips & Exam ARA-C01 Outline

When you click into Prep4cram's site, you will see so many people daily enter the website. You can not help but be surprised. In fact, this is normal. Prep4cram is provide different training materials for a lot of candidates. They are using our training materials tto pass the exam. This shows that our Snowflake ARA-C01 Exam Training materials can really play a role. If you want to buy, then do not miss Prep4cram website, you will be very satisfied.

Snowflake ARA-C01 (SnowPro Advanced Architect Certification) Exam is designed for experienced architects who want to demonstrate their expertise in designing and implementing complex Snowflake solutions. SnowPro Advanced Architect Certification certification exam is part of the Snowflake Certification Program, which offers a range of certifications for professionals who work with Snowflake's cloud data platform.

Exam Snowflake ARA-C01 Outline | Test ARA-C01 Guide Online

You may never have thought that preparing for the upcoming ARA-C01 certification exam would be so simple. The good news is that the ARA-C01 exam material of our Prep4cram has been successful for all users who have used it to think that passing the exam

is a simple matter! After using our ARA-C01 exam materials, they all passed the exam easily and thought it was a valuable learning experience. Learn and practice our ARA-C01 exam questions during the preparation of the exam, it will answer all your doubts. This process of learning left a deep impression on candidates. The exciting ARA-C01 Exam Material is a product created by professionals who have extensive experience in designing exam materials. These professionals have an in-depth understanding of the candidate's questions and requirements, so our ARA-C01 exam questions meets and exceeds your expectations. Learn and practice our exams so that you can easily pass candidates and have a valuable learning experience.

Snowflake SnowPro Advanced Architect Certification Sample Questions (Q139-Q144):

NEW QUESTION # 139

Data is being imported and stored as JSON in a VARIANT column. Query performance was fine, but most recently, poor query performance has been reported.
What could be causing this?

- A. The recent data imports contained fewer fields than usual.
- B. The order of the keys in the JSON was changed.
- C. There were JSON nulls in the recent data imports.
- D. There were variations in string lengths for the JSON values in the recent data imports.

Answer: B

Explanation:
Data is being imported and stored as JSON in a VARIANT column. Query performance was fine, but most recently, poor query performance has been reported. This could be caused by the following factors:
* The order of the keys in the JSON was changed. Snowflake stores semi-structured data internally in a column-like structure for the most common elements, and the remainder in a leftovers-like column. The order of the keys in the JSON affects how Snowflake determines the common elements and how it optimizes the query performance. If the order of the keys in the JSON was changed, Snowflake might have to re-parse the data and re-organize the internal storage, which could result in slower query performance.
* There were variations in string lengths for the JSON values in the recent data imports. Non-native values, such as dates and timestamps, are stored as strings when loaded into a VARIANT column.
Operations on these values could be slower and also consume more space than when stored in a relational column with the corresponding data type. If there were variations in string lengths for the JSON values in the recent data imports, Snowflake might have to allocate more space and perform more conversions, which could also result in slower query performance.
The other options are not valid causes for poor query performance:
* There were JSON nulls in the recent data imports. Snowflake supports two types of null values in semi- structured data: SQL NULL and JSON null. SQL NULL means the value is missing or unknown, while JSON null means the value is explicitly set to null. Snowflake can distinguish between these two types of null values and handle them accordingly. Having JSON nulls in the recent data imports should not affect the query performance significantly.
* The recent data imports contained fewer fields than usual. Snowflake can handle semi-structured data with varying schemas and fields. Having fewer fields than usual in the recent data imports should not affect the query performance significantly, as Snowflake can still optimize the data ingestion and query execution based on the existing fields.
Considerations for Semi-structured Data Stored in VARIANT

NEW QUESTION # 140

There are two databases in an account, named fin_db and hr_db which contain payroll and employee data, respectively.
Accountants and Analysts in the company require different permissions on the objects in these databases to perform their jobs.
Accountants need read-write access to fin_db but only require read-only access to hr_db because the database is maintained by human resources personnel.
An Architect needs to create a read-only role for certain employees working in the human resources department.
Which permission sets must be granted to this role?

- A. MODIFY on database hr_db, USAGE on all schemas in database hr_db, USAGE on all tables in database hr_db
- B. USAGE on database hr_db, SELECT on all schemas in database hr_db, SELECT on all tables in database hr_db
- C. USAGE on database hr_db, USAGE on all schemas in database hr_db, SELECT on all tables in database hr_db
- D. USAGE on database hr_db, USAGE on all schemas in database hr_db, REFERENCES on all tables in database hr_db

Answer: C

NEW QUESTION # 141
Multi-cluster warehouses are best utilized for

- A. Scaling resources to improve concurrency for users/queries
- B. Improving the performance of data loading
- C. Improving the performance of slow-running queries

Answer: A

NEW QUESTION # 142
Every Snowflake table loaded by the Kafka connector has a schema consisting of two VARIANT columns.
Which are those?

- A. RECORD_METADATA
- B. RECORD_CONTENT
- C. RECORD_MESSAGE

Answer: A,B

NEW QUESTION # 143
An Architect is designing a file ingestion recovery solution. The project will use an internal named stage for file storage. Currently, in the case of an ingestion failure, the Operations team must manually download the failed file and check for errors.
Which downloading method should the Architect recommend that requires the LEAST amount of operational overhead?

- A. Use the get command in Snowsight to retrieve the file.
- B. Use the get command in SnowSQL to retrieve the file.
- C. Use the Snowflake Connector for Python, connect to remote storage and download the file.
- D. Use the Snowflake API endpoint and download the file.

Answer: D

NEW QUESTION # 144
......

The third format is desktop ARA-C01 practice exam software that can be accessed easily after installing it on your Windows PC or Laptop. These formats are there so that the students can use them as per their unique needs and prepare successfully for ARA-C01 the on first try. The ARA-C01 mock tests are specially built for you to evaluate what you have studied. These SnowPro Advanced Architect Certification (ARA-C01) practice exams (desktop and web-based) are customizable, which means that you can change the time and questions according to your needs. Our ARA-C01 practice tests teach you time management so you can pass the SnowPro Advanced Architect Certification (ARA-C01) certification exam.
