What's more, part of that ExamCost AZ-800 dumps now are free: [https://drive.google.com/open?id=1zVEb2YuZyH9l\\_seTn2\\_8owcgeER5hJzH](https://drive.google.com/open?id=1zVEb2YuZyH9l_seTn2_8owcgeER5hJzH)

Our AZ-800 Test Guide is suitable for you whichever level you are in right now. Whether you are in entry-level position or experienced exam candidates who have tried the exam before, this is the perfect chance to give a shot. Not only from precious experience about the exam but the newest information within them. Our Administering Windows Server Hybrid Core Infrastructure study question will be a valuable investment with reasonable prices. Besides, they can be obtained within 5 minutes if you make up your mind.

Microsoft AZ-800 (Administering Windows Server Hybrid Core Infrastructure) Certification Exam is designed for IT professionals who have experience and knowledge of managing and administering Windows Server infrastructure in hybrid environments. AZ-800 exam measures the candidate's ability to manage Windows Server, Azure services, and other Microsoft hybrid solutions that are used in hybrid environments. AZ-800 exam aims to test the candidate's skills in deploying and managing various Microsoft server technologies in a hybrid environment, which includes on-premises, cloud-based, and hybrid scenarios.

The reality is that developing skills is a must, and earning a certification from a world-renowned vendor is one of the variants. If your aim is to get a position as a Windows Server Hybrid Administrator, then passing the AZ-800 Exam is what you need to do first of all. The second exam that you will need to sit for is AZ-801. Still, let's have a closer look at the AZ-800 test also known as Administering Windows Server Hybrid Core Infrastructure.

## AZ-800 Official Cert Guide & AZ-800 Test Pdf

You may be get refused by so many AZ-800 study dumps in the present market, facing so many similar AZ-800 study guide, so how can you distinguish the best one among them? We will give you some suggestions, first of all, you need to see the pass rate, for all the efforts we do to the AZ-800 Study Dumps is to pass. Our company guarantees the high pass rate. Second, you need to see the feedback of the customers, since the customers have used it, and they have the evaluation of the AZ-800 study guide.

## Microsoft Administering Windows Server Hybrid Core Infrastructure Sample Questions (Q233-Q238):

### NEW QUESTION # 233

You have an on-premises server named Server1 that runs Windows Server. You have an Azure virtual network that contains an Azure virtual network gateway. You need to connect only Server1 to the Azure virtual network. What should you use?

- A. Azure Network Adapter
- B. an ExpressRoute circuit
- C. Azure Extended Network
- D. a Site-to-SiteVPN

**Answer: D**

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows-server/manage/windows-admin-center/azure/use-azure-network-adap>

### NEW QUESTION # 234

You have 10 on-premises servers that run Windows Server.

You plan to use Azure Network Adapter to connect the servers to the resources in Azure.

Which prerequisites do you require on-premises and in Azure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows-server/manage/windows-admin-center/azure/use-azure-network-adapter>

### NEW QUESTION # 235

You deploy a single-domain Active Directory Domain Services (AD DS) forest named contoso.com.

You deploy five servers to the domain. You add the servers to a group named iTFarmHosts.

You plan to configure a Network Load Balancing (NLB) cluster named NLBcluster.contoso.com that will contain the five servers.

You need to ensure that the NLB service on the nodes of the cluster can use a group managed service account (gMSA) to authenticate.

Which three PowerShell cmdlets should you run in sequence? To answer, move the appropriate cmdlets from the list of cmdlets to the answer area and arrange them in the correct order.

**Answer:**

Explanation:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows-server/security/group-managed-service-accounts/create-the-key-distribution-services-kds-root-key>

<https://docs.microsoft.com/en-us/windows-server/security/group-managed-service-accounts/getting-started-with-group-managed-service-accounts>

### NEW QUESTION # 236

Task 10

You need to configure Hyper-V to ensure that running virtual machines can be moved between SRV1 and SRV2 without downtime.

You do NOT need to move any virtual machines at this time.

**Answer:**

Explanation:

See the solution of this Task below

Explanation:

One possible solution to configure Hyper-V to ensure that running virtual machines can be moved between SRV1 and SRV2 without downtime is to use Live Migration. Live Migration is a feature of Hyper-V that allows you to move a running virtual machine from one host to another without any noticeable interruption of service. To set up Live Migration between SRV1 and SRV2, you need to perform the following steps:

On both SRV1 and SRV2, open Hyper-V Manager from the Administrative Tools menu or by typing `virtmgmt.msc` in the Run box.

In the left pane, right-click on the name of the server and select Hyper-V Settings.

In the Hyper-V Settings dialog box, select Live Migrations in the navigation pane.

Check the box **Enable incoming and outgoing live migrations**.

Under **Authentication protocol**, select the method that you want to use to authenticate the live migration traffic between the servers.

You can choose either Kerberos or CredSSP. Kerberos does not require you to sign in to the source server before starting a live migration, but it requires you to configure constrained delegation on the domain controller. CredSSP does not require you to

configure constrained delegation, but it requires you to sign in to the source server through a local console session, a Remote Desktop session, or a remote Windows PowerShell session. For more information on how to configure constrained delegation, see [Configure constrained delegation](#).

Under **Performance options**, select the option that best suits your network configuration and performance requirements. You can choose either TCP/IP or Compression or SMB. TCP/IP uses a single TCP connection for the live migration traffic. Compression uses multiple TCP connections and compresses the live migration traffic to reduce the migration time and network bandwidth usage. SMB uses the Server Message Block (SMB) 3.0 protocol and can leverage SMB features such as SMB Multichannel and SMB Direct. For more information on how to choose the best performance option, see [Choose a live migration performance option](#).

Under **Advanced Features**, you can optionally enable the **Use any available network for live migration** option, which allows Hyper-V to use any available network adapter on the source and destination servers for live migration. If you do not enable this option, you need to specify one or more network adapters to be used for live migration by clicking on the **Add** button and selecting the network adapter from the list. You can also change the order of preference by using the **Move Up** and **Move Down** buttons.

Click **OK** to apply the settings.

Now, you have configured Hyper-V to enable live migration between SRV1 and SRV2. You can use Hyper-V Manager or Windows PowerShell to initiate a live migration of a running virtual machine from one server to another.

### NEW QUESTION # 237

You have a server named Server1 that runs Windows Server. Server1 has a single network interface and the Hyper-V virtual switches shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

### NEW QUESTION # 238

.....

The most attractive thing about a learning platform is not the size of his question bank, nor the amount of learning resources, but more importantly, it is necessary to have a good control over the annual propositional trend. The AZ-800 study materials through research and analysis of the annual questions, found that there are a lot of hidden rules are worth exploring, plus we have a powerful team of experts, so the rule can be summed up and use. The AZ-800 Study Materials can be based on the analysis of the annual questions, it is concluded that a series of important conclusions related to the qualification examination, combining with the relevant knowledge of recent years, then predict the direction which can determine this year's exam. AZ-800 study materials will improve the ability to accurately forecast the topic and proposition trend this year.
