AAPC CPC Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Overview of ICD-10-CM: This section of the exam measures the skills of medical coders and introduces the structure, format, and usage of the ICD-10-CM coding system. It reviews the purpose of ICD-10-CM in diagnosis reporting and prepares candidates to interpret chapters, code ranges, and conventions embedded in the system.
Topic 2	<ul style="list-style-type: none"> Anesthesia: This section of the exam measures the skills of medical coders and involves coding anesthesia services based on surgical site, complexity, and time. It tests the understanding of anesthesia modifiers and the importance of linking anesthesia codes with the correct primary procedures.
Topic 3	<ul style="list-style-type: none"> Musculoskeletal System: This section of the exam measures the skills of coding specialists and focuses on coding procedures involving bones, joints, muscles, and tendons. It covers surgeries, reductions, arthroscopies, and fracture treatments, emphasizing accurate mapping of procedures to anatomical areas.
Topic 4	<ul style="list-style-type: none"> Endocrine System and Nervous System: This section of the exam measures the skills of medical coders and assesses the ability to assign codes for surgeries involving glands, the brain, spinal cord, and peripheral nerves. Procedures like resections and electrical stimulation are part of the evaluated content.

Topic 5	<ul style="list-style-type: none"> • Accurate ICD-10-CM Coding: This section of the exam measures the skills of medical coders and focuses on the precise assignment of diagnosis codes using the ICD-10-CM system. The goal is to ensure accurate representation of patient conditions, proper sequencing, and a clear linkage between diagnoses and services.
Topic 6	<ul style="list-style-type: none"> • Pathology & Laboratory: This section of the exam measures the skills of medical coders and includes lab tests, specimen analysis, and pathological examination procedures. It ensures that coders understand how to apply codes for chemistry panels, cultures, and histopathological diagnostics.
Topic 7	<ul style="list-style-type: none"> • Evaluation & Management Services: This section of the exam measures the skills of coding specialists and covers office visits, hospital care, consultations, and other E • M services. It tests the understanding of time-based coding, medical decision-making, and history • exam components per current CMS guidelines.
Topic 8	<ul style="list-style-type: none"> • Introduction to CPT®, HCPCS Level II, and Modifiers: This section of the exam measures the skills of coding specialists and introduces candidates to CPT® coding for procedures, HCPCS Level II for supplies and services, and the correct use of modifiers. It helps learners distinguish between different code sets and understand their place in medical billing.
Topic 9	<ul style="list-style-type: none"> • Female Reproductive System and Maternity Care & Delivery: This section of the exam measures the skills of coding specialists and evaluates coding accuracy for gynecological and obstetric procedures. It includes deliveries, antepartum care, cesarean sections, and surgical procedures involving female reproductive anatomy.
Topic 10	<ul style="list-style-type: none"> • Respiratory System: This section of the exam measures the skills of medical coders and evaluates the ability to code procedures involving the nose, sinuses, larynx, trachea, bronchi, and lungs. Attention is given to services like endoscopies, excisions, and resections within the respiratory tract.
Topic 11	<ul style="list-style-type: none"> • Digestive System: This section of the exam measures the skills of coding specialists and evaluates the coding of surgeries and procedures involving the oral cavity, pharynx, esophagus, stomach, intestines, liver, pancreas, and related organs. Understanding endoscopic procedures is particularly critical here.
Topic 12	<ul style="list-style-type: none"> • Review of Anatomy: This section of the exam measures the skills of coding specialists and covers a high-level understanding of human anatomy. It includes organs, systems, directional terminology, and anatomical locations, enabling coders to link procedures and diagnoses to the correct bodily structures with accuracy and consistency.
Topic 13	<ul style="list-style-type: none"> • The Business of Medicine: This section of the exam measures the skills of medical coders and covers foundational knowledge regarding the healthcare system, reimbursement models, insurance payers, HIPAA compliance, and the ethical responsibilities coders hold within clinical and billing environments. It establishes the context in which coding decisions directly affect healthcare operations and financial outcomes.
Topic 14	<ul style="list-style-type: none"> • Hemic & Lymphatic Systems, Mediastinum, Diaphragm: This section of the exam measures the skills of medical coders and includes procedures related to the spleen, lymph nodes, bone marrow, as well as surgical interventions in the mediastinum and diaphragm. Coders must differentiate procedures by region and system accurately.
Topic 15	<ul style="list-style-type: none"> • Integumentary System: This section of the exam measures the skills of medical coders and covers procedures related to the skin and related structures. Topics include excisions, biopsies, repairs, and destruction services, focusing on accurate code selection and modifier usage for integumentary interventions.
Topic 16	<ul style="list-style-type: none"> • Applying the ICD-10-CM Guidelines: This section of the exam measures the skills of coding specialists and covers how to apply official ICD-10-CM guidelines to real-world coding scenarios. It emphasizes the hierarchy of instructional notes, general and chapter-specific rules, and how to make judgment calls within compliant coding frameworks.

AAPC Certified Professional Coder (CPC) Exam Sample Questions (Q137-Q142):

NEW QUESTION # 137

A patient in a radiology facility has an X-ray examination of her lumbosacral spine due to pain while playing golf. The radiologist takes a complete 7-view of the lumbosacral spine, including bending views. What CPTcode is reported?

- A. 0
- **B. 1**
- C. 2
- D. 3

Answer: B

Explanation:

1. Procedure and CPTCode Selection:

The patient underwent a 7-view X-ray of the lumbosacral spine, which included bending views. A complete set of views is captured. CPTCode 72114 is appropriate for a complete lumbosacral spine X-ray with a minimum of six views. This code includes comprehensive imaging, such as bending and other specialized views, which were taken in this scenario.

2. Rationale for Excluding Other Options:

Code 72020 is for a single-view X-ray of the spine, which is not adequate to describe a 7-view series.

Code 72080 is for a two- or three-view X-ray of the thoracolumbar spine, which does not cover the full set of seven views described in this scenario.

Code 72084 represents a complete thoracic spine study with multiple views but does not specifically cover the lumbosacral spine, which is the focus of this X-ray examination.

3. AAPC and CPTCoding Guidelines:

According to AAPC and CPTguidelines, 72114 is the correct choice for a complete lumbosacral spine study involving multiple views, including specialized views like bending.

Therefore, the correct answer is C. 72114.

NEW QUESTION # 138

The provider orders a bilirubin test for a patient with bowel flora disturbance. The lab determines the presence of bilirubin in a fecal sample.

What CPT code is reported for the test?

- A. 0
- B. 1
- **C. 2**
- D. 3

Answer: C

Explanation:

82252 = Bilirubin, feces

82247/82248 = Serum bilirubin

82239 = Fecal fat

NEW QUESTION # 139

A business requires drug testing for cocaine and methamphetamines prior to hiring a job candidate. A single analysis with direct optical observation is performed, followed by a confirmation for cocaine. Which codes are used for reporting the testing and confirmation?

- A. 80306 x 2, 80353
- B. 80305 x 2, 80353
- **C. 80305, 80353**
- D. 80306, 80375

Answer: C

Explanation:

For drug testing for cocaine and methamphetamines with a single analysis using direct optical observation and a subsequent confirmation for cocaine, the appropriate codes are:

* 80305 for the initial drug test (presumptive).

* 80353 for the confirmation test of cocaine.

NEW QUESTION # 140

A patient with severe diverticulitis in the sigmoid colon presents to surgery for a partial colectomy. The physician performs an exploratory laparoscopic laparotomy to verify the location of the diverticulitis. Once identified, it was noted that there was bleeding from the diverticulitis. The physician transects the descending colon and then transects at the line of the rectum.

The physician mobilizes the splenic flexure in order to create a colostomy with the proximal portion of the remaining colon. The distal portion of the colon is closed. The physician washes the patient's abdomen with saline, removes all trocars and instruments, and then closes the abdomen with sutures.

What CPT and ICD-10-CM codes are reported?

- A. 44206, 44213-51, K57.41
- B. 44212, 44213-51, K57.41
- **C. 44212, 44213, K57.33**
- D. 44206, 44213, K57.33

Answer: C

Explanation:

Procedure Coding (CPT):

44212 - Laparoscopic partial colectomy with end colostomy and closure of distal segment (Hartmann-type procedure) Correct because:

Sigmoid/descending colon resection

Proximal colostomy created

Distal rectal stump closed

44213 - Laparoscopic mobilization of splenic flexure

Separately reportable because:

Mobilization was necessary to exteriorize colon for colostomy

Not bundled into 44212

Modifier not required (no multiple-procedure discount with add-on logic) Diagnosis Coding (ICD-10-CM):

K57.33 - Diverticulitis of large intestine with perforation and bleeding, without abscess Documentation supports:

Diverticulitis

Active bleeding

No abscess reported

Why Other Options Are Incorrect:

A / B - 44206 = colectomy with anastomosis (not performed)

A / B - K57.41 includes abscess (not documented)

C - Missing splenic flexure add-on explanation

CPT & ICD-10-CM Guideline Alignment:

Hartmann procedure # anastomosis

Bleeding elevates diagnosis specificity

Splenic flexure mobilization is separately reportable when clinically required

NEW QUESTION # 141

A surgeon removes the right and left fallopian tubes and the left ovary via an abdominal incision. How is this reported?

- A. 58720-50
- **B. 0**
- C. 1
- D. 58700-50

Answer: B
