AACN Critical Care Nursing Exam Sample Questions (Q32-Q37):

NEW QUESTION # 32

An anxious father consults a nurse for guidance on how to answer the question, of his child Daniel who is only 5 years old. The

father said that Daniel asked "Where do babies come from?" What is the nurse's best response to the father?

- A. "Children usually ask for many questions but they do not look for an answer"
- B. "You should give full and detailed answers to all questions that Daniel may ask"
- **C. "You have to give a simple answer"**
- D. "That question indicates that Daniel is interested in sex"

Answer: C

Explanation:

Explanation: Topics related to sexuality should be answered with honesty. However, honesty does not mean imparting every fact of life associated with the question. When a child asks 1 question, he is looking for 1 answer. When he is ready, he will ask about the other pieces.

NEW QUESTION # 33

While assessing a 3 week old infant, which finding should a nurse report immediately:

- A. Irregular breathing pattern
- B. Increased cardiac rate when crying
- C. Abdominal respiration
- **D. Inspiratory grunting**

Answer: D

Explanation:

Explanation: Inspiratory grunt is abnormal and could be a sign of respiratory distress in this infant.

NEW QUESTION # 34

A nurse is preparing for the admission of a child with a diagnosis of acute-stage Kawasaki disease. The nurse expects to note which clinical manifestation of the acute stage of the disease:

- A. desquamation of the skin
- B. cracked lips
- C. swollen joints
- **D. conjunctival hyperemia**

Answer: D

Explanation:

Explanation: In the acute stage, the child has a fever, conjunctival hyperemia, red throat, swollen hands, rash, and enlargement of the cervical lymph nodes. In the subacute stage, cracking lips and fissures, desquamation of the skin on the tips of the fingers and toes, joint pain, cardiac manifestations, and thrombocytosis occur. In the convalescent stage, the child appears normal, but signs of inflammation may be present.

NEW QUESTION # 35

Angela, a school age girl, was bitten by a rabid dog. She is scheduled to receive antirabies vaccine/inoculations. The nurse is aware that rabies is a:

- **A. viral infection characterized by difficulty in swallowing and seizure**
- B. bacterial infection that causes encephalopathy
- C. a bacterial infection characterized by Opisthotonus
- D. a viral infection characterized by Opisthotonus

Answer: A

Explanation:

Explanation: These are characteristics of rabies infection that affects the nervous system. It is not a bacterial infection

NEW QUESTION # 36

Nurse Sophia is enjoying her lunch at the hospital canteen when a toddler at a nearby table chokes on a piece of food and appears slightly blue. Nurse Sophia should initially:

- A. start mouth to mouth resuscitation
- B. give water to help him swallow
- C. alert the emergency response
- D. do about 5 abdominal thrusts

Answer: D

Explanation:

Explanation: At this point, the most effective way to clear the airway of food is to perform abdominal thrusts.

NEW QUESTION # 37

.....
