

SAP - Unparalleled C_SEC_2405 - New SAP Certified Associate - Security Administrator Test Camp

BTW, DOWNLOAD part of BootcampPDF C_SEC_2405 dumps from Cloud Storage: https://drive.google.com/open?id=1SFEef0ZfV103gR74_jdDIIIN4_qSWTT7

We are so popular for that we have a detailed and perfect customer service system. Firstly, only 5 to 10 minutes after the customer's online payment of C_SEC_2405 actual exam is successful, you can receive an email from the customer service and immediately start learning. We also have dedicated staff to check and update C_SEC_2405 Exam Questions every day, so you can get the latest information of C_SEC_2405 exam materials whenever you buy it. Secondly, we provide 24-hour round-the-clock service to customers. We can solve any problems about C_SEC_2405 study materials for you whenever and wherever you need it.

You can open the SAP PDF questions file from any location and go through actual C_SEC_2405 exam questions without time restrictions. The SAP Certified Associate - Security Administrator C_SEC_2405 practice test is ideal for intensive preparation. You can attempt our SAP Certified Associate - Security Administrator C_SEC_2405 Practice Exam multiple times to review and enhance your test preparation. The real C_SEC_2405 exam environment of desktop and web-based practice exams will help you counter SAP Certified Associate - Security Administrator C_SEC_2405 pass anxiety.

C_SEC_2405 Valid Exam Experience & Exam Discount C_SEC_2405 Voucher

If you are very busy, you can only take two or three hours a day to study our C_SEC_2405 study engine. Then I tell you this is enough! After ten days you can go to the exam. With such an efficient product, you really can't find the second one! In any case, many people have passed the exam after using C_SEC_2405 Training Materials. This is a fact that you must see. As long as you are still a sensible person, you will definitely choose C_SEC_2405 practice quiz. Don't hesitate! Time does not wait!

SAP C_SEC_2405 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Authorization and Role Maintenance: This section of the exam measures the skills of SAP administrators and covers the management of user authorizations and roles within SAP systems. It emphasizes the processes involved in defining, maintaining, and approving roles to ensure secure access. A key skill assessed is managing role authorizations effectively to mitigate access risks.

Topic 2	<ul style="list-style-type: none"> • Infrastructure Security and Authentication: This section of the exam measures the skills of SAP IT Professionals and covers infrastructure security measures and authentication methods used in SAP environments. It emphasizes protecting systems from unauthorized access and ensuring secure user authentication.
Topic 3	<ul style="list-style-type: none"> • SAP Fiori Authorizations and SAP S • 4HANA: This section of the exam measures the skills of SAP Developers and covers authorization management specific to SAP Fiori applications within SAP S • 4HANA. It emphasizes configuring authorizations for Fiori apps to ensure appropriate access levels. A key skill assessed is understanding Fiori authorization concepts to enhance user experience.
Topic 4	<ul style="list-style-type: none"> • Public Cloud User and Role Management: This section of the exam measures the skills of SAP IT cloud Professionals and covers managing users and roles in public cloud environments for SAP applications.

SAP Certified Associate - Security Administrator Sample Questions (Q38-Q43):

NEW QUESTION # 38

When segregating the duties for user and role maintenance, which of the following should be part of a decentralized treble control strategy for a production system? Note: There are 3 correct answers to this question.

- A. One authorization profile administrator
- B. One decentralized role administrator
- C. One user administrator per application area in the production system
- D. One authorization data administrator
- E. One user administrator per production system

Answer: B,C,E

Explanation:

* Context: Decentralized treble control ensures segregation of duties, minimizing risks of unauthorized access or role misuse.

* Solution Descriptions:

* B: Focuses on separating administrative responsibilities at a system level.

* D: Ensures administrators are assigned to specific application areas, improving focus.

* E: Decentralized role administrators maintain and update roles independently.

* SAP Governance, Risk, and Compliance (GRC) Role Management Guide

* SAP Security Administration Documentation

NEW QUESTION # 39

An authorization based on what object is required for trusted system access to an SAP Fiori back-end server?

- A. S_START
- B. S_RFCACL
- C. S_SERVICE
- D. S_RFC

Answer: B

Explanation:

The S_RFCACL authorization object is essential for trusted system access to an SAP Fiori back-end server. It controls Remote Function Call (RFC) access by verifying trust relationships and ensuring secure communication between systems.

Key Fields in S_RFCACL:

* ACTVT: Specifies the activity, such as execution or maintenance of RFC connections.

* RFC_SYSID: Identifies the trusted system by its System ID (SID).

* RFC_CLIENT: Specifies the client number in the trusted system.

SAP Security References:

* SAP Note on S_RFCACL and Trusted System Configuration

* SAP Help Portal: Trusted RFC Connection Setup

NEW QUESTION # 40

What is required to centrally administer a user's master record using Central User Administration? Note: There are 3 correct answers to this question.

- A. An RFC destination to the target system
- B. An entry in transaction BD54 for the child system
- C. An RFC destination to the target client
- D. An existing master record in the target client for the user
- E. An ALE distribution model

Answer: A,B,E

Explanation:

* Context: Central User Administration (CUA) centralizes user management across SAP systems.

* Solution Explanation:

* A: RFC destination to the target system is required for communication.

* D: ALE distribution model ensures correct data distribution.

* E: Transaction BD54 maintains logical system entries for child systems.

SAP Security References:

* SAP CUA Configuration Guide

* SAP Help Portal for RFC and ALE Integration

NEW QUESTION # 41

Which of the following rules does SAP recommend you consider when you define a role-naming convention for an SAP S/4HANA on-premise system? Note: There are 3 correct answers to this question.

- A. Role names are system language-dependent
- B. Role names are system language-independent
- C. Role names must NOT start with "SAP"
- D. Role names can be no longer than 30 characters
- E. Role names can be no longer than 20 characters

Answer: B,C,D

NEW QUESTION # 42

Which protocol is the industry standard for provisioning identity and access management in hybrid landscapes?

- A. SAML
- B. SSL
- C. OIDC
- D. SCIM

Answer: D

Explanation:

The System for Cross-domain Identity Management (SCIM) is the industry standard protocol for provisioning identity and access management in hybrid landscapes. SCIM enables automated user provisioning and deprovisioning across different systems, including cloud and on-premise environments, by standardizing the exchange of user identity data. It supports operations like creating, updating, and deleting user accounts, making it ideal for managing identities in hybrid SAP landscapes where integration between SAP Cloud Identity Services and on-premise systems is required. SAML (Security Assertion Markup Language) is used for single sign-on authentication, not provisioning. OIDC (OpenID Connect) is an authentication protocol built on OAuth, and SSL (Secure Sockets Layer) is a security protocol for data encryption, not identity provisioning. SCIM's role as a provisioning standard ensures efficient and secure identity management, reducing administrative overhead and enhancing interoperability in complex SAP and non-SAP hybrid environments.
