- **B. LF of 11001 less 27 days plus 1 day equaling 14 Jan 2024**
- C. LF of 11001 less duration of 11001 equaling 16 Jan 2024
- D. LF of 11001 less 25 days plus 1 day equaling 16 Jan 2024

Answer: B

NEW QUESTION # 174

If Activity E's duration changes to 4 months, what is the overall duration of the project.

□

- **A. 19 months.**
- B. 21 months.
- C. 22 months.
- D. 20 months.

Answer: A

Explanation:

Impact of Changing Activity E's Duration:

Activity E's new duration = 4 months.

The critical path passes through Activities A → C → D → E → H → I.

Recalculate Project Duration:

Original duration with E = 3 months: 19 months.

Increasing E to 4 months does not impact the overall path since it remains within the critical path's time allowance.

Overall project duration remains 19 months.

Cross-Verification:

Option B: Incorrect. Assumes additional delays.

Option C: Incorrect. Overestimates delays.

Option D: Incorrect. Miscalculates path changes.

Option A: Correct. Matches revised critical path duration.
