NEW QUESTION # 10

A distribution company uses Dynamics 365 Supply Chain Management.

A customer contacts the company to identify a defect in an ordered part. Additional quantities of the defective item are in stock. The defective items require a task that will trigger an action for the items and a label printed.

You need to configure the system.

Which features should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Nonconformance

Nonconformance

A nonconformance describes an item that has a quality problem. The nonconformance process lets you create a nonconformance order that describes a quantity of nonconforming material, the problem source, the problem type, and explanatory notes. You can define a classification of problem types to make analysis of nonconforming material easier. You can also print a nonconformance tag and a nonconformance report to guide the disposition of nonconforming material.
