問題 #170

You want to add a draft watermark to a dashboard as shown in the following exhibit.
Which type of object should you use?

- A. Web page
- **B. Image**
- C. Horizontal
- D. Sheet

答案： B

解題說明：

To add a draft watermark to a Tableau dashboard, you would use an image object. You can overlay this image across your dashboard, possibly with some transparency, to achieve the watermark effect without interfering with the readability of the dashboard content.

問題 #171

You have the following dataset:

Which grouping option should you use in Tableau Prep to group all five names automatically?

- A. Manual Selection
- **B. Common Characters**
- C. Spelling
- D. Pronunciation

答案： B

解題說明：

Common Characters: Find and group values that have letters or numbers in common. This option uses the ngram fingerprint algorithm that indexes words by their unique characters after removing punctuation, duplicates, and whitespace. This algorithm works for any supported language. This option isn't available for data roles. For example, this algorithm would match names that are represented as "John Smith" and "Smith, John" because they both generate the key "hijmno". Since this algorithm doesn't consider pronunciation, the value "Tom Jhinois" would have the same key "hijmno" and would also be included in the group.

問題 #172

You have the following dataset:

Which grouping option should you use in Tableau Prep to group all five names automatically?

- A. Spelling
- B. Pronunciation
- **C. Manual Selection**
- D. Common Characters

答案： C

問題 #173

A Data Analyst has a dataset that contains the following rows of sales data.

The analyst needs to return a value of TRUE if a month has sales greater than \$50,000; otherwise, the formula must return a value of FALSE.

Which two formulas achieve this goal? (Choose two.)

- A. MAX([Sales], 50000)
- **B. IF [Sales] > 50000 THEN TRUE ELSE FALSE END**
- C. SUM([Sales]) IN (50000)
- **D. [Sales] > 50000**

答案： B,D

問題 #174

You have the following box plot that shows the distribution of average profits made in every state by region.

Which region has the smallest distribution of profits?

- 答案: D

The box plot visualization displays the distribution of average profits by region. The distribution of profits is represented by the range of the box (interquartile range) and the whiskers (which often represent the total range excluding outliers). From the image provided, the South region has the smallest visible range within its box and the shortest whiskers, indicating the smallest distribution of average profits among the choices provided.
