Reliable and Guarantee Refund of SAP C-S4PM2-2507 Exam Questions

DumpStillValid also presents desktop-based SAP C-S4PM2-2507 practice test software which is usable without any internet connection after installation and only required license verification. SAP C-S4PM2-2507 Practice Test software is very helpful for all those who desire to practice in an actual SAP Certified Associate - Managing SAP S/4HANA Cloud Private Edition Projects (C-S4PM2-2507) exam-like environment.

SAP Certified Associate - Managing SAP S/4HANA Cloud Private Edition Projects Sample Questions (Q74-Q79):

NEW QUESTION # 74

Which type of testing should be done after a release upgrade has been implemented?

- A. Regression tests
- B. User acceptance tests
- C. String tests
- D. Integration tests

Answer: A

NEW QUESTION # 75

What does the Side-by-Side extensibility option mean?

- A. There are two SAP S/4HANA instances: one for standard code and another for custom developments
- B. SAP S/4HANA extensions are context-aware and focused on tight integration.
- C. Extend SAP S/4HANA using APIs published on SAP Business Accelerator Hub.
- D. Extending SAP S/4HANA using SAP ABAP Development Workbench.

Answer: C

Explanation:

Step 1 - Understanding the Question

The question refers to the Side-by-Side extensibility concept in SAP S/4HANA Cloud, which is one of the three extensibility approaches defined by SAP:

- * In-App extensibility- Extensions made directly inside the SAP S/4HANA system using key-user tools.
- * Classic extensibility- Custom developments using ABAP in the SAP core system.
- * Side-by-Side extensibility- Building and running extensions outside the SAP S/4HANA core on the SAP Business Technology Platform (BTP).

Step 2 - Evaluate Each Option

A). Extending SAP S/4HANA using SAP ABAP Development Workbench

- * This is classic extensibility, not Side-by-Side.
- * It modifies the core ABAP stack directly, which contradicts the clean-core principle for cloud environments.

Result: Incorrect.

B). Extend SAP S/4HANA using APIs published on SAP Business Accelerator Hub

- * Side-by-Side extensibility leverages SAP BTP for building external applications and services that communicate with SAP S/4HANA using standard APIs and events.
- * The APIs used for these extensions are published on the SAP Business Accelerator Hub (formerly API Business Hub).
- * This approach allows creating custom UIs, workflows, or integrations without modifying the core system.

Result: Correct - This defines the Side-by-Side extensibility model.

C). There are two SAP S/4HANA instances: one for standard code and another for custom developments

- * SAP does not create a separate instance for custom code in Side-by-Side extensibility.
- * Extensions are built externally on SAP BTP, not as a second SAP S/4HANA instance.

Result: Incorrect.

D). SAP S/4HANA extensions are context-aware and focused on tight integration

- * This describes the In-App extensibility model, where extensions are embedded within the core system and maintain contextual awareness.

Result: Incorrect.

NEW QUESTION # 76

Which of the following are dimensions of a clean core approach? Note: There are 3 correct answers to this question.

- A. Procedures
- B. Integrations
- C. Data
- D. Extensions
- E. Technologies

Answer: B,C,D

NEW QUESTION # 77

Which of the following are required for a new implementation of SAP S/4HANA Cloud Private Edition?

Note: There are 2 correct answers to this question.

- A. Nomination of a lead conversion expert for content activation
- **B. Access to the Software Update Manager tool**
- **C. Nomination of a lead configuration expert for content activation**
- D. Detailed Digital Discovery Assessment with SAP Best Practices

Answer: B,C

NEW QUESTION # 78

In a new implementation of SAP S/4HANA Cloud Private Edition, what tool is used for the initial one-time deployment of SAP Best Practices content?

- A. SAP Cloud ALM
- **B. SAP Solution Builder**
- C. SAP Central Business Configuration
- D. SAP SignaviProcess Navigator

Answer: B

Explanation:

Step 1 - Understanding the Question

The question asks which tool is used for the initial one-time deployment of SAP Best Practices content in a new implementation of SAP S/4HANA Cloud, Private Edition.

Step 2 - Explanation

* In SAP S/4HANA Cloud, Private Edition (similar to on-premise installations), SAP Best Practices are activated through the SAP Solution Builder.

* The Solution Builder imports and activates preconfigured business processes, master data, and configuration settings delivered by SAP.

* This activity is performed once during system setup by SAP during the Prepare or Explore phase.

Other options:

* SAP Cloud ALM- used for project execution and monitoring, not content deployment.

* SAP Signavio Process Navigator- process documentation and reference library.

* SAP Central Business Configuration- used for Public Edition, not Private Edition.

NEW QUESTION # 79

.....

Our C-S4PM2-2507 exam guide is suitable for everyone whether you are a business man or a student, because you just need 20-30 hours to practice on our C-S4PM2-2507 exam questions, then you can attend to your C-S4PM2-2507 exam. There is no doubt that you can get a great grade. If you follow our C-S4PM2-2507 learning pace, you will get unexpected surprises. What are you waiting for? Just choose SAP Certified Associate guide question to improve your knowledge to pass C-S4PM2-2507 exam, which is your testimony of competence. You will get what you are dreaming for.
