## ASVAB Latest Test Guide & ASVAB Updated Testkings

There are three versions of our ASVAB exam questions: the PDF, Software and APP online. Now I want to introduce the online version of our ASVAB learning guide to you. The most advantage of the online version is that this version can support all electronic equipment. If you choose the online version of our ASVAB Study Materials, you can use our products by your any electronic equipment. We believe it will be very convenient for you, such as IPAD, phone and laptop.

### College Admission Armed Services Vocational Aptitude Battery (ASVAB) Sample Questions (Q10-Q15):

#### NEW QUESTION # 10

A man makes a 255-mile trip by car. He drives the first 2 hours at 45 miles per hour. At what speed must he then travel for the remainder of the trip in order to arrive at his destination 5 hours after he started?

- A. 31 miles per hour
- B. 51 miles per hour
- C. 50 miles per hour
- D. 55 miles per hour

**Answer: D**

Explanation:

The distance traveled by driving at 45 mph for 2 hours is  $2 \times 45$ , or 90 miles. The remainder of the 255 mile trip is  $255 - 90$ , or 165 miles. To finish the trip in 5 hours, the man has  $5 - 2$ , or 3, hours still to drive. To find the rate of travel for a distance of 165 miles driven in 3 hours, divide the distance by the time.

$$165 / 3 = 55 \text{ miles per hour}$$

#### NEW QUESTION # 11

A painter has painted a picture on a piece of canvas that measures 10 x 14 inches. In order to accommodate a frame, he has left an un-painted margin of 1 inch all the way around. What part of the canvas has been painted?

- A. 80%
- B. 25%
- C. 66%
- D. 75%

**Answer: A**

Explanation:

The area of the entire piece of canvas =  $10 \text{ inches} \times 14 \text{ inches} = 140 \text{ square inches}$ . The portion painted on equals  $8 \text{ inches} \times 12 \text{ inches} = 112 \text{ square inches}$ . (This is determined by subtracting 1 inch from the length of each side to account for the margin.) The portion used for painting can be expressed as a fraction:  $112/140$ . Reduce this fraction (divide 112 by 140) to determine that 80% of the canvas is covered with paint.

#### NEW QUESTION # 12

A security guard walks the equivalent of six city blocks when he makes a circuit around the building. If he walks at a pace of eight city blocks every 30 minutes, how long will it take him to complete a circuit around the building, assuming he doesn't run into any thieves?

- A. 20.00 minutes
- B. 22.50 minutes
- C. 24.00 minutes
- D. 3.75 minutes

**Answer: B**

Explanation:

Divide 30 by 8 to determine that the security guard takes 3.75 minutes to walk one city block. Multiply 3.75 by 6, the number of

blocks it takes to complete the circuit, to arrive at 22.50, or 22 1/2 minutes.

#### NEW QUESTION # 13

Which inorganic substance is present in the greatest quantity inside animal cells?

- A. water
- B. oxygen
- C. sodium chloride
- D. protein

**Answer: A**

#### NEW QUESTION # 14

The brushes in an alternator ride on

- A. the commutator.
- B. the stator.
- C. the heat sink.
- D. slip rings.

**Answer: D**

Explanation:

Two slip rings are mounted on the rotor shaft. Two brushes ride on the slip rings and deliver electrical energy to the rotor windings.

#### NEW QUESTION # 15

.....

Many people are afraid of walking out of their comfortable zones. So it is difficult for them to try new things. But you will never grow up if you reject new attempt.
