질문 # 30

Which of the following are features of the clean core dashboard? Note: There are 2 correct answers to this question.

- A. It can be accessed by using SAP For Me.
- B. Customers can use the dashboard in the dev, test, and production tenants.
- C. It can be used in all SAP S/4HANA Cloud editions.
- D. Customers can grant access to the dashboard to partners.

정답: A,D

설명:

Comprehensive and Detailed In-Depth Explanation:

The clean core dashboard monitors system health and compliance with SAP's clean core strategy, minimizing customizations. Let's detail its features:

- * Option A (It can be accessed by using SAP For Me): Correct. SAP For Me serves as the entry point for dashboard access.
 - * SAP Documentation Excerpt: From the SAP SuccessFactors Integration Strategy Guide: "The clean core dashboard is accessible via SAP For Me, providing customers with a centralized view of system compliance with clean core principles."
 - * Reasoning: Logging into sapforme.com, users navigate to the SuccessFactors section to view clean core metrics (e.g., customization levels) for CSB. This is a unified SAP portal feature.
 - * Practical Example: For "Best Run," a consultant logs in on March 4, 2025, to check careers.bestrun.com's clean core score.
 - * Option D (Customers can grant access to the dashboard to partners): Correct. Partner collaboration is supported for optimization.
 - * SAP Documentation Excerpt: From the SAP SuccessFactors Integration Strategy Guide: "Customers can grant clean core dashboard access to partners, enabling collaboration on maintaining a standardized system environment."
 - * Reasoning: In SAP For Me > User Management, granting view-only access to a partner (e.g., a consultant) allows them to assess and suggest clean core improvements.
 - * Practical Example: "Best Run" shares access with their implementation partner to review API usage.
 - * Option B: Incorrect. The dashboard is specific to SuccessFactors, not all S/4HANA editions.
 - * Option C: Incorrect. It's limited to production in SuccessFactors, per security constraints.
- : SAP SuccessFactors - Integration Strategy Guide (Clean Core Dashboard).

질문 # 31

What are some of the ways that candidates can be added to a talent pool? Note: There are 3 correct answers to this question.

- A. Auto-populate from a saved search.
- B. Candidates can add themselves.
- C. Add from an email campaign.
- D. Add from the Applicant Workbench.
- E. Add from a Candidate Search.

정답: A,D,E

설명:

Comprehensive and Detailed In-Depth Explanation:

Talent pools store candidates for future roles:

- * Option A (Add from a Candidate Search): Correct. Recruiters can add candidates from search results in Recruiting Management.
 - * SAP Documentation Excerpt: From the Talent Pool Administration Guide: "Candidates identified via Candidate Search can be manually added to talent pools by recruiters to build a pipeline."
 - * Option B (Auto-populate from a saved search): Correct. Saved searches can automatically feed matching candidates into pools.
 - * SAP Documentation Excerpt: From the Talent Pool Administration Guide: "Saved searches can be configured to auto-populate talent pools with candidates meeting predefined criteria, streamlining pipeline management."
 - * Option D (Add from the Applicant Workbench): Correct. Recruiters can add applicants from the workbench post-application.
 - * SAP Documentation Excerpt: From the Recruiting Management Guide: "From the Applicant Workbench, recruiters can add candidates to talent pools, such as 'Silver Medalists,' for future consideration."
 - * Option C: Incorrect. Email campaigns engage candidates but don't directly add them to pools.
- : SAP SuccessFactors Recruiting: Candidate Experience - Talent Pool Administration Guide.

질문 # 32

What should you consider regarding mapping candidate statuses for Advanced Analytics? Note: There are 2 correct answers to this question.

- A. Any status that indicates that the candidate was NOT hired, such as Automatically Disqualified, does NOT need to be mapped.
- B. After saving the status mappings in Command Center, you can correct mapping errors as long as you do it during the same session.
- C. With some exceptions, if a status is NOT mapped when the OData integration is run, the sync will fail.
- D. Status mappings can only be completed when there is candidate data associated with each status on the Talent Pipeline.

정답: C,D

질문 # 33

What are some SAP-recommended guiding principles to achieve clean core operations? Note: There are 3 correct answers to this question.

- A. Establish regular housekeeping tasks and procedures.
- B. Define roles and responsibilities as part of a process transformation office.
- C. Establish release management.
- D. Establish an organizational structure, technical foundation, and transformation methodology
- E. Integrate clean core practices in the end-to-end value process chain.

정답: A,C,E

설명:

Comprehensive and Detailed In-Depth Explanation:

SAP's clean core strategy minimizes customizations to maintain system integrity and adaptability. Let's explore the guiding principles:

* Option A (Establish release management): Correct. Structured release management ensures updates are applied systematically, preserving clean core standards.

* SAP Documentation Excerpt: From the SAP SuccessFactors Integration Strategy Guide:

"Establishing release management is a guiding principle for clean core operations, ensuring that updates are applied systematically without disrupting standard functionality."

* Reasoning: For CSB, scheduling quarterly updates (e.g., patching via Command Center) with testing in Stage prevents conflicts with custom code, aligning with SAP's quarterly release cycles (e.g., Q1 2025).

* Practical Example: "Best Run" plans releases, reviewing release notes on sap.com to apply CSB enhancements cleanly.

* Option C (Establish regular housekeeping tasks and procedures): Correct. Routine maintenance prevents data or configuration clutter.

* SAP Documentation Excerpt: From the SAP SuccessFactors Integration Strategy Guide:

"Regular housekeeping tasks, such as data cleanup and configuration reviews, are recommended to maintain a clean core and prevent technical debt."

* Reasoning: Monthly tasks like archiving old jobs or reviewing field mappings in Admin Center keep careers.bestrun.com efficient.

* Practical Example: "Best Run" runs a cleanup script to remove expired requisitions, verified in a test tenant.

* Option D (Integrate clean core practices in the end-to-end value process chain): Correct.

Embedding clean core ensures process alignment with SAP standards.

* SAP Documentation Excerpt: From the SAP SuccessFactors Integration Strategy Guide:

"Integrating clean core practices into the end-to-end value process chain aligns customizations with SAP standards, enhancing system longevity."

* Reasoning: Using OData APIs for CSB integrations (e.g., job sync) instead of custom scripts maintains upgradability.

* Practical Example: "Best Run" adopts OData for Real Time Job Sync, avoiding legacy SOAP issues.

* Option B: Incorrect. A process transformation office is an organizational choice, not a core principle.

* Option E: Incorrect. This is an implementation approach, not a specific clean core guideline.

: SAP SuccessFactors - Integration Strategy Guide (Clean Core Principles).

질문 # 34

What are some leading practices regarding text on websites? Note: There are 3 correct answers to this question.

- A. Avoid using bulleted or numbered lists.
- B. Use a serif font (such as Times New Roman), rather than a sans-serif font (such as Arial).
- C. Use half the word count or less than conventional writing.
- D. Break up lengthy content and separate with headings.
- E. Use high contrast text, for example, black text on a white background.

정답: C,D,E

설명:

Comprehensive and Detailed In-Depth Explanation:

Text practices in Career Site Builder (CSB) enhance readability, accessibility, and engagement, aligning with web and WCAG 2.1 standards. Let's explore the options:

* Option A (Use high contrast text, for example, black text on a white background): Correct. High contrast ensures legibility for all users, including those with visual impairments.

* SAP Documentation Excerpt: From the Career Site Builder Accessibility Guide: "Use high contrast text, such as black on white, to ensure readability and compliance with accessibility guidelines like WCAG 2.1 for all candidates."

* Reasoning: On careers.bestrun.com, black job titles on a white background (contrast ratio > 4.5:

1) are readable via screen readers like JAWS and meet legal standards. This is configured in CSB

> Global Styles > Text Settings.

* Practical Example: "Best Run" sets job descriptions to black on white, improving visibility for a colorblind candidate.

* Option C (Break up lengthy content and separate with headings): Correct. Headings improve scannability and structure, aiding navigation.

* SAP Documentation Excerpt: From the Career Site Builder Administration Guide: "Break up lengthy content with headings (e.g., H2, H3) to enhance candidate comprehension and navigation on CSB pages."

* Reasoning: A job page with "Job Title" (H2), "Responsibilities" (H3), and "Requirements" (H3) allows quick scanning on careers.bestrun.com/job/123. This is added in CSB > Pages > Content Editor.

* Practical Example: "Best Run" uses headings to split a 500-word description, tested for readability.

* Option D (Use half the word count or less than conventional writing): Correct. Concise text suits web users' preference for quick consumption.

* SAP Documentation Excerpt: From the Career Site Builder Administration Guide: "Aim for half the word count of conventional writing to keep CSB content concise and engaging for candidates."

* Reasoning: Reducing a 200-word job summary to 100 words (e.g., "Join our sales team" vs. a verbose paragraph) on careers.bestrun.com improves retention. This is a content strategy applied during page creation.

* Practical Example: "Best Run" shortens "About Us" to 50 words, verified in a user test.

* Option B (Avoid using bulleted or numbered lists): Incorrect. Lists enhance readability by organizing information, a recommended practice.

* Option E (Use a serif font): Incorrect. Sans-serif fonts (e.g., Arial) are preferred for web clarity over serif (e.g., Times New Roman), per modern design standards.
