Quiz Palo Alto Networks - NetSec-Pro - Palo Alto Networks Network Security Professional–Reliable High Quality

DOWNLOAD the newest PDFVCE NetSec-Pro PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1k-fuxG7wh7_hiy3OJyL2LRKkR-FZta3W

You can take Palo Alto Networks Network Security Professional (NetSec-Pro) practice exams (desktop and web-based) of PDFVCE multiple times to improve your critical thinking and understand the Palo Alto Networks NetSec-Pro test inside out. PDFVCE has been creating the most reliable Palo Alto Networks Dumps for many years. And we have helped thousands of Palo Alto Networks aspirants in earning the Palo Alto Networks Network Security Professional (NetSec-Pro) certification.

Palo Alto Networks NetSec-Pro Exam Syllabus Topics:

Topic	Details
Topic 1	• NGFW and SASE Solution Functionality: This part assesses the knowledge of firewall administrators and network architects on the functions of various Palo Alto Networks firewalls including Cloud NGFWs, PA-Series, CN-Series, and VM-Series. It covers perimeter and core security, zone security and segmentation, high availability, security and NAT policy implementation, as well as monitoring and logging. Additionally, it includes the functionality of Prisma SD-WAN with WAN optimization, path and NAT policies, zone-based firewall, and monitoring, plus Prisma Access features such as remote user and network configuration, application access, policy enforcement, and logging. It also evaluates options for managing Strata and SASE solutions through Panorama and Strata Cloud Manager.
Topic 2	• Network Security Fundamentals: This section of the exam measures skills of network security engineers and covers key concepts such as application layer inspection for Strata and SASE products, differentiating between slow and fast path packet inspection, and the use of decryption methods including SSL Forward Proxy, SSL Inbound Inspection, SSH Proxy, and scenarios where no decryption is applied. It also includes applying network hardening techniques like Content-ID, Zero Trust principles, User-ID (including Cloud Identity Engine), Device-ID, and network zoning to enhance security on Strata and SASE platforms.
Topic 3	• Connectivity and Security: This part measures the skills of network engineers and security analysts in maintaining and configuring network security across on-premises, cloud, and hybrid environments. It covers network segmentation, security and network policies, monitoring, logging, and certificate management. It also includes maintaining connectivity and security for remote users through remote access solutions, network segmentation, security policy tuning, monitoring, logging, and certificate usage to ensure secure and reliable remote connections.

Free PDF Quiz NetSec-Pro - Professional Palo Alto Networks Network Security Professional High Quality

PDFVCE also offers the NetSec-Pro web-based practice exam with the same characteristics as desktop simulation software but with minor differences. It is online Palo Alto Networks Certification Exam which is accessible from any location with an active internet connection. This Palo Alto Networks Network Security Professional NetSec-Pro Practice Exam not only works on Windows but also on Linux, Mac, Android, and iOS. Additionally, you can attempt the OMG NetSec-Pro practice test through these browsers: Opera, Safari, Firefox, Chrome, MS Edge, and Internet Explorer.

Palo Alto Networks Network Security Professional Sample Questions (Q31-Q36):

NEW QUESTION # 31
Which step is necessary to ensure an organization is using the inline cloud analysis features in its Advanced Threat Prevention subscription?

- A. Configure Advanced Threat Prevention profiles with default settings and only focus on high-risk traffic to avoid affecting network performance.
- B. Enable SSL decryption in Security policies to inspect and analyze encrypted traffic for threats.
- C. Update or create a new anti-spyware security profile and enable the appropriate local deep learning models.
- D. Disable anti-spyware to avoid performance impacts and rely solely on external threat intelligence.

Answer: C

Explanation:
To fully leverage inline cloud analysis in Advanced Threat Prevention, security profiles (e.g., anti-spyware) must be updated or newly created to enable local deep learning and inline cloud analysis models.
"To activate inline cloud analysis, update your Anti-Spyware profile to enable advanced inline detection engines, including deep learning-based models and cloud-delivered signatures." (Source: Inline Cloud Analysis and Deep Learning) This ensures real-time protection from sophisticated threats beyond static signatures.

NEW QUESTION # 32
Which two tools can be used to configure Cloud NGFWs for AWS? (Choose two.)

- A. Cloud service provider's management console
- B. Cortex XSIAM
- C. Prisma Cloud management console
- D. Panorama

Answer: A,D

Explanation:
Cloud NGFW for AWS can be configured using Panorama for centralized management, as well as the AWS management console for native integration and configuration.
"You can configure Cloud NGFW for AWS using Panorama for centralized security management, or directly through the AWS management console to deploy and manage security services for your AWS resources." (Source: Cloud NGFW for AWS Guide)

NEW QUESTION # 33
What are two recommendations to ensure secure and efficient connectivity across multiple locations in a distributed enterprise network? (Choose two.)

- A. Employ centralized management and consistent policy enforcement across all locations.
- B. Use Prisma Access to provide secure remote access for branch users.
- C. Implement a flat network design for simplified network management and reduced overhead.
- D. Create broad VPN policies for contractors working at branch locations.

Answer: A,B

Explanation:
Prisma Access for secure remote access
"Prisma Access extends consistent security and optimized connectivity to branch locations, enabling secure access for mobile and branch users." (Source: Prisma Access Overview) Centralized management for consistent policy enforcement
"Centralized management using Strata Cloud Manager or Panorama ensures security policies and updates are uniformly applied across distributed locations, preventing policy drift and security gaps." (Source: Strata Cloud Manager Best Practices) These two practices are foundational for modern, distributed enterprise networks to maintain security posture and performance.

NEW QUESTION # 34
Which security profile provides real-time protection against threat actors who exploit the misconfigurations of DNS infrastructure and redirect traffic to malicious domains?

- A. Antivirus
- B. Anti-spyware
- C. URL Filtering
- D. Vulnerability Protection

Answer: B

Explanation:
TheAnti-spyware profileincludes DNS-based protections like sinkholing and detection of DNS queries to malicious domains, offering real-time protection against attacks that exploit DNS misconfigurations.
"The Anti-Spyware profile protects against DNS-based threats by sinkholing DNS queries to malicious domains and detecting suspicious DNS activity, thus blocking data exfiltration and C2 communication." (Source: Anti-Spyware Profiles)

NEW QUESTION # 35
How can a firewall administrator block a list of 300 unique URLs in the most time-efficient manner?

- A. Use application groups to block the App-IDs.
- B. Use application filters to block the App-IDs.
- C. Block multiple predefined URL categories.
- D. Import the list into a custom URL category.

Answer: D

Explanation:
For large lists of specific URLs, creating acustom URL categoryand importing the list is the most efficient approach for granular URL filtering.
"You can create custom URL categories to define specific URLs or patterns and enforce policies for these categories. This is the most efficient way to handle large sets of URLs." (Source: Custom URL Categories) This approach saves time compared to manual rule creation or using generic application filters.
