Qlik Sense System Administrator Certification Exam - February 2021 Release Sample Questions (Q11-Q16):

NEW QUESTION # 11

A customer uses an older version of Qlik Sense Enterprise and needs to upgrade to the latest version. The server has Microsoft Windows Server 2008 R2.

What is the recommendation to be made to the customer?

- **A. Use the latest version of Qlik Sense and run in Windows compatibility mode**
- B. Upgrade to Windows Server to 2012 or later
- C. Use up to any version of Qlik Sense Enterprise 2018 at most
- D. Run the Windows Update tool to get all the necessary updates before installing the latest version of Qlik Sense

Answer: A

NEW QUESTION # 12

A user who can typically create new apps in personal work can no longer create new applications. The user's work stream is no longer displayed.

How can this problem be fixed?

- A. In the QMC, in the License Management tab, check if there is a Professional license asweled for this user
- B. In QMC, in the users tab, make sure it has the ContentAdmin rule
- C. In the QMC, in the License Management tab, check if there is an Analyzer license asweled for this user
- **D. In the QMC, in the Audit tab, check for any rules that are preventing this user**

Answer: D

NEW QUESTION # 13

Imagine a single server environment that has all services running. At some point users report that applications are very slow, all of them. The system administrator works remotely on support and realizes that there is actually a problem occurring. Due to performance issues, the system administrator has difficulties accessing the QMC. Additionally you receive an email stating that the server's memory ram has reached its limit.

What step can the system administrator take to check what is happening in the environment?

- **A. Inspect logs in %ProgramData%\Qlik\Sense\Log\Engine**
- B. Send a request via API at <http://<server.domain.com>/engine/performancecheck>
- C. Send a request via API at <https://<server.domain.com>/engine/healthcheck>
- D. Access <https://<server.domain.com>/qmc/audit>

Answer: A

NEW QUESTION # 14

A system administrator needs to upgrade their environment to the latest version of Qlik Sense Enterprise available. In order for you to have security in this process, you need to perform a backup.

What three items does the system administrator need to make sure to back up before continuing?

- A. Qlik Sense Applications
- **B. Qlik Sense Certificates**
- **C. Shared persistence file share**
- **D. Qlik Sense repository database**
- E. Qlik Sense folder in ProgramData

Answer: B,C,D

NEW QUESTION # 15

The IT manager asked if it is possible for a particular group of users to be prevented from creating new objects in already published applications. And if so, it suggests that the BasicUsers group be used.

How should the system administrator meet this requirement?

- A. - Resource filter: App_*
- **B. - Resource filter: App_***
- C. Inform the manager that this type of lock cannot be performed, since the professional license gives full access in order to create new objects and screens.
- D. - Resource filter: App_*

Answer: B

NEW QUESTION # 16
