最新的 Salesforce Advanced Administrator Advanced-Administrator 免費考試真題 (Q53-Q58):

問題 #53

Dreamhouse Realty recently learned that the major listing service it utilizes can accept messages to a specific endpoint. The realtors want to utilize this to be able to quickly update the listing price on properties after it has been approved. What automation tool should the administrator configure?

- A. Email Alert
- B. Process Builder
- C. Platform Event
- **D. Flow**

答案：D

解題說明:

Explanation

Flow is the automation tool that should be configured to utilize the major listing service endpoint. Flow is a tool that allows administrators to automate complex business processes by building flows that can collect, update, or delete data, invoke Apex code, call external services, and more. Flow can use an Apex action or an HTTP request action to send messages to an external endpoint using REST API

問題 #54

Users at AW Computing use a custom object to manage order*. All profiles share a single page layout.

Customer Service and Sales users express frustration overseeing actions that-do not always apply to their situation on the page layout.

What should an administrator recommend?

- A. Make two separate Lightning record pages and assign them to the applicable profiles.
- B. Configure two separate permission sets and assign the appropriate permissions to each user.
- C. Use Dynamic Actions and conditional visibility to show the appropriate actions to the applicable users.
- D. Create separate record types for the Customer Service and Sales users' records.

答案: C

解題說明:

Dynamic actions are actions that appear on Lightning record pages based on criteria such as field values or user profiles. Dynamic actions allow administrators to customize which actions are available for users on different record types or page layouts without creating multiple page layouts for each scenario. By using dynamic actions and conditional visibility for accounts at AW Computing, administrators can show only relevant actions for customer service and sales users based on their situation. 問題 #55

In "Setup | Salesforce CRM Content | Settings", what will happen if you uncheck "Enable content pack creation"? Choose 5

- A. You can change description of "Content Pack"
- B. You can clone existing "Content Pack"
- C. Edit documents inside existing Content Pack
- D. You can delete "Content Pack"
- E. You can Change Language
- F. You can add , Edit Tags
- G. You can create New "Content Pack"
- H. You can change Title of "Content Pack"

答案: A,D,E,F,H

問題 #56

A new administrator at Cloud Kicks has reported that they are unable to use outbound change sets as requested.

What permission should be reviewed to determine if it is missing from the administrator user or profile?

- A. API Enabled
- B. Deploy Change Sets
- C. Create and Upload Change Sets
- D. Modify Metadata Through Metadata API Functions

答案: C

解題說明:

To use outbound change sets, a user needs to have the Create and Upload Change Sets permission on their profile or permission set. This permission allows users to create change sets in a sandbox or Developer Edition organization and upload them to another organization. References: https://help.salesforce.com/s/articleView?id=sf.changesets_create_upload_perm.htm&type=5

問題 #57

Suri only has the "read" permission for the case object on her profile. A criteria-based sharing rule gives her read/write access to product support cases. Will Suri be able to edit product support cases?

- A. No
- B. Yes

答案: A

問題 #58
