

# Free PDF 2026 Oracle - 1Z0-1109-25 - Oracle Cloud Infrastructure 2025 DevOps Professional Exam Materials

2025 Latest TroytecDumps 1Z0-1109-25 PDF Dumps and 1Z0-1109-25 Exam Engine Free Share:  
<https://drive.google.com/open?id=1yL3VtjVvyjiLnG5eJaiMjTs-A3HTLptQ>

Do you want to pass 1Z0-1109-25 certification exam easily? Then it is necessary to have TroytecDumps 1Z0-1109-25 exam certification training materials. TroytecDumps 1Z0-1109-25 test training materials are summarized by IT experts with constant practice, which is the combination of 1Z0-1109-25 Exam Dumps and answers, and can't be matched by any 1Z0-1109-25 test training materials from others. TroytecDumps will take you to a more beautiful future.

If you must complete your goals in the shortest possible time, our 1Z0-1109-25 exam materials can give you a lot of help. For our 1Z0-1109-25 study guide can help you pass your exam after you study with them for 20 to 30 hours. And our products are global, and you can purchase our 1Z0-1109-25 training guide is wherever you are. Believe us, our products will not disappoint you. Our global users can prove our strength.

## Free PDF 1Z0-1109-25 Exam Materials & Efficient 1Z0-1109-25 Latest Study Guide: Oracle Cloud Infrastructure 2025 DevOps Professional

It points to the exam heart to solve your difficulty. So high quality materials can help you to pass your exam effectively, make you feel easy, to achieve your goal. With the 1Z0-1109-25 test guide use feedback, it has 98%-100% pass rate. That's the truth from our customers. And it is easy to use for you only with 20 hours' to 30 hours' practice. After using the 1Z0-1109-25 Test Guide, you will have the almost 100% assurance to take part in an examination. With high quality materials and practices, you will get easier to pass the exam.

## Oracle Cloud Infrastructure 2025 DevOps Professional Sample Questions (Q10-Q15):

### NEW QUESTION # 10

You are a developer and have been asked to develop an e-commerce website for your organization. It must support a variety of clients including desktop browsers, mobile browsers and native mobile applications.

Which two approaches can you use to build the application to achieve deployment independence, easier technology upgrades, and resiliency to architecture changes? (Choose two.)

- A. Use **microservices architecture** as it eliminates any long-term commitment to a technology stack.
- B. Use monolithic approach, as it allows you to easily redeploy your applications to perform frequent updates.

- C. Use monolithic approach as it makes it easier to incrementally adapt to newer technology.
- D. Choose monolithic approach over microservices as it has better fault isolation capability.
- E. Implement each module as an independent service/process which can be replaced, updated, or deleted without disrupting the rest of the application.

**Answer: A,E**

Explanation:

By implementing each module as an independent service/process (which is a core feature of microservices architecture), you can replace, update, or delete services without affecting the rest of the application. This ensures deployment independence and makes it easier to adapt to architecture changes or technology upgrades without major disruptions.

Microservices architecture allows each service to be built with the best-suited technology stack for its specific function. This flexibility ensures that you are not tied to a single technology for the entire application, making future technology upgrades easier and eliminating long-term technology commitments.

#### NEW QUESTION # 11

You are a DevOps project administrator. You are creating Oracle Cloud Infrastructure (OCI) Identity and Access Management (IAM) policies that will be used in a DevOps CI/CD pipeline for deployment to an Oracle Container Engine for Kubernetes (OKE) environment.

Which OCI IAM policy can be used?

- A. Allow dynamic-group <code repository> to manage devops-family in compartment <compartment name>
- B. Allow group <build pipeline> to manage all-resources in compartment <compartment name>
- C. Allow group <deployment pipeline> to manage devops-family in compartment <compartment name>
- D. Allow dynamic-group <deployment pipeline> to manage all-resources in compartment <compartment name>

**Answer: C**

Explanation:

Chosen policy specifies an IAM policy allowing the group (in this case, the deployment pipeline) to manage devops-family resources within a specific compartment. The devops-family is a group of services that includes the OCI DevOps service, which is suitable for managing CI/CD pipelines, deployments, and related operations for an OKE environment.

#### NEW QUESTION # 12

Why is it important to extract output artifacts from the Oracle Cloud Infrastructure (OCI) DevOps build pipeline and store them in an Artifact Registry repository?

- A. All artifacts are permanently stored in the build pipeline. Extracting just the ones required for deployment tells the deployment pipeline which artifacts to use.
- B. Output artifacts aren't permanent. If they are to be used in the Deliver Artifacts stage, they need to be exported as output artifacts to a registry.
- C. Deliver Artifacts is a required stage of the build pipeline, and the entire pipeline won't work if it is not included in order to extract artifacts after the Managed Build stage.
- D. Storing build artifacts in registries helps the deployment pipeline differentiate output artifacts created by the build pipeline from artifacts copied from a Git repository.

**Answer: B**

Explanation:

In OCI DevOps Build Pipeline, the output artifacts generated during the build are temporary and will be discarded unless explicitly stored in a persistent location. By extracting and storing these artifacts in an Artifact Registry (such as OCI Artifact Registry or OCI Container Registry), you ensure that they are available for subsequent stages, such as deployment.

Storing artifacts in a registry provides a persistent location where the deployment pipeline can access them, ensuring the artifacts are available for reliable deployment.

#### NEW QUESTION # 13

As an engineer building and deploying applications using an OCI DevOps project, which two capabilities can help ensure the security and reliability of the code in the build and deployment pipelines? (Choose two.)

- A. Using version control tools like Git or SVN to track and manage changes in the codebase
- B. Using JIRA to track user stories and bug fixes in the development process
- C. Using Application Dependency Management (ADM) to identify security weaknesses in software applications by checking their dependencies
- D. Using third-party tools like Sonatype, SonarQube, or OverOps to analyze code for security defects or bugs in code quality
- E. Using third-party tools like Ansible, Terraform, or OverOps to analyze code for security defects or bugs in code quality

**Answer: C,D**

#### NEW QUESTION # 14

As a DevOps engineer working on an OCI project, you're setting up a deployment pipeline to automate your application deployments.

Which statement is false about deployment pipeline in OCI DevOps?

- A. Using deployment pipeline, you can deploy helm charts in OCI Function.
- B. You can add an Approval stage that pauses the deployment for a specified duration for manual decision from the approver.
- C. You can add a Traffic Shift stage that routes the traffic between two environments.
- D. You can add a Wait stage that adds a specified duration of delay in the pipeline.

**Answer: A**

Explanation:

Helm charts are used to manage Kubernetes deployments, not OCI Functions. Helm charts are deployed to Kubernetes clusters, such as OCI Container Engine for Kubernetes (OKE), to manage containerized applications. OCI Functions are serverless and do not use Helm charts for deployment.

#### NEW QUESTION # 15

.....

Are you one of them? Are you still worried and confused because of the the various exam materials and fancy training courses exam? TroytecDumps is the right choice for you. Because we can provide you with a comprehensive exam, including questions and answers. All of these will help you to acquire a better knowledge, we are confident that you will through TroytecDumps the Oracle 1Z0-1109-25 Certification Exam. This is our guarantee to all customers.

**1Z0-1109-25 Latest Study Guide:** <https://www.troytecdumps.com/1Z0-1109-25-troytec-exam-dumps.html>

Since it is desktop-based 1Z0-1109-25 practice exam software, it is not necessary to connect to the internet to use it, We aim to provide our candidates with real 1Z0-1109-25 vce dumps and 1Z0-1109-25 valid dumps to help you pass real exam with less time and money, Our company has always been attempting to help users get desirable results, which is the reason why we invited a group of professional experts dedicated to compile the most effective and accurate 1Z0-1109-25 examboost pdf for you, Oracle 1Z0-1109-25 Exam Materials You can use your mobile phone, computer or print it out for review.

I've selected a share called Backups located 1Z0-1109-25 on one of the systems on my network, They do not have the ability to survive independently, Since it is desktop-based 1Z0-1109-25 Practice Exam software, it is not necessary to connect to the internet to use it.

## High Hit Rate Oracle 1Z0-1109-25 Exam Materials - 1Z0-1109-25 Free Download

We aim to provide our candidates with real 1Z0-1109-25 vce dumps and 1Z0-1109-25 valid dumps to help you pass real exam with less time and money, Our company has always been attempting to help users get desirable results, which is the reason why we invited a group of professional experts dedicated to compile the most effective and accurate 1Z0-1109-25 examboost pdf for you.

You can use your mobile phone, computer or print it out for review, And we still quicken our pace to make the 1Z0-1109-25 study guide more accurate for your needs.
