You may additionally turn out to be a part of this skilled and certified community. To try this you sincerely need to pass the Juniper JN0-105 Certification examination.

## Juniper Junos, Associate (JNCIA-Junos) Sample Questions (Q82-Q87):

### NEW QUESTION # 82

You have logged on to a Junos device and are at the operational mode prompt. Which two commands are used at this prompt? (Choose two.)

- A. request system shutdown
- B. show interface ge-0/0/0
- C. run show interface terse
- D. set interface ge-0/0/0 unit 0 family inet

**Answer: B**

Explanation:

At the operational mode prompt on a Junos device, you can use various commands to view the device's status and request system operations. The show interface ge-0/0/0 command is used to display information about a specific interface, while the request system shutdown command is used to properly shut down the device.

The set command is used in configuration mode, not operational mode, and the run command is used to execute operational mode commands from configuration mode.

### NEW QUESTION # 83

After the factory default configuration is loaded, which configuration object must be created prior to the first commit?

- A. host name
- B. root authentication
- C. loopback IP address
- D. out-of-band connectivity

**Answer: B**

Explanation:

In Juniper Networks devices, when the factory default configuration is loaded, the first step before committing any configuration is to set up root authentication. This is crucial because it secures the device by ensuring that only authorized users have administrative access. Without setting up a root password, the device will not allow any commit operations, which is a safety measure to prevent unauthorized access. This requirement emphasizes the importance Juniper places on security right from the initial setup of the device.

### NEW QUESTION # 84

Which two fields are you required to enter when you create a new user account? (Choose two.)

- A. login class
- B. full name
- C. username
- D. user ID

**Answer: A,C**

Explanation:

In Junos OS, when creating a new user account, the minimum required fields are the username and the login class. The username is the identifier for the account, while the login class specifies the level of access or permissions the user has on the device. Login classes allow for the differentiation between various roles, such as read-only access or full administrative rights. Other information, such as full name or user ID, is optional and not strictly necessary for the creation of a functional user account.

### NEW QUESTION # 85

You have logged on to a Junos device and are at the operational mode prompt. Which two commands are used at this prompt? (Choose two.)

- A. show interface ge-0/0/0
- B. run show interface terse
- C. request system shutdown
- D. set interface ge-0/0/0 unit 0 family inet

**Answer: A,C**

Explanation:

At the operational mode prompt on a Junos device, you can use various commands to view the device's status and request system operations. The show interface ge-0/0/0 command is used to display information about a specific interface, while the request system shutdown command is used to properly shut down the device.

The set command is used in configuration mode, not operational mode, and the run command is used to execute operational mode commands from configuration mode.

### NEW QUESTION # 86

Which protocol is responsible for learning an IPv4 neighbor's MAC address?

- A. Network Address Translation (NAT)
- B. Neighbor Discovery Protocol (NDP)
- C. Address Resolution Protocol (ARP)

- D. Media Access Control Security (MACsec)

**Answer: C**

Explanation:

The Address Resolution Protocol (ARP) is responsible for mapping an IPv4 address to a machine's MAC address. ARP operates at Layer 2 of the OSI model and is used to find the MAC address of a host given its IPv4 address. When a device wants to communicate with another device on the same local network, it uses ARP to discover the recipient's MAC address.

Reference:

Juniper official documentation: ARP.

Networking standards: RFC 826.

## NEW QUESTION # 87

.....

Our JN0-105 Exam Dumps with the highest quality which consists of all of the key points required for the JN0-105 exam can really be considered as the royal road to learning. ValidTorrent has already become a famous brand all over the world in this field since we have engaged in compiling the JN0-105 practice materials for more than ten years and have got a fruitful outcome. You are welcome to download the free demos to have a general idea about our JN0-105 training materials.

**Valid JN0-105 Dumps:** <https://www.validtorrent.com/JN0-105-valid-exam-torrent.html>

Juniper Real JN0-105 Exam Answers You just need to spend about 48 to 72 hours on practicing, and you can pass the exam successfully, Juniper Real JN0-105 Exam Answers Our company BraindumpStudy is powerful: BraindumpStudy was built by several elite managers from different international IT companies since 2009, Students preparing for the Valid JN0-105 Dumps certification have a choice of writing the Valid JN0-105 Dumps exam as a single paper or as two papers together.

In this case, the 'Main()' method does not return a value, Likewise, Gilbert defined JN0-105 Information on the soft side of management as the worker's knowledge and ability to take useful information and effectively perform required tasks.

## 2026 Real JN0-105 Exam Answers | Reliable 100% Free Valid Junos, Associate (JNCIA-Junos) Dumps
