

# Latest Fortinet NSE6\_SDW\_AD-7.6 Exam Labs | NSE6\_SDW\_AD-7.6 Valid Test Book

FORM 2026 Test 02	ĐỀ THI HỌC KÌ II Môn: Tiếng Anh - Lớp 7
----------------------	--

Mark the letter A, B, C or D on your answer sheet to indicate the word whose underlined part differs from the other three in pronunciation in each of the following questions.

- Question 1. A. stair                      B. repair                      **C. train**                      D. fair  
 Question 2. A. healthy                      B. bread                      C. ahead                      **D. nearest**

Mark the letter A, B, C or D on your answer sheet to indicate the word that has different stress

- Question 3. A. solar                      B. hydro                      **C. prepare**                      D. candy  
 Question 4. A. recycle                      B. expensive                      **C. energy**                      D. polluting

Mark the letter A, B, C or D on your answer sheet to indicate the correct answer to each of the following questions.

- Question 5. Mary: "Do you think we will travel long distances by hyperloop in the future?" - Peter: "\_\_\_\_\_"  
 A. Yes, I will.                      **B. We certainly will.**                      C. You are right.                      D. Are you kidding?

Question 6. She often drives very \_\_\_\_\_ so she rarely causes accidents .

- A. carefully**                      B. careful                      C. caring                      D. careless

Question 7. In the future we .....drive normal cars any more.

- A. will                      B. are                      **C. won't**                      D. is

Question 8. The shoes are mine. They are not \_\_\_\_.

- A. hers'                      B. hers shoes                      **C. her shoes**                      D. her

Question 9. We went out for \_\_\_\_\_ meal last night. \_\_\_\_\_ restaurant we went was excellent.

- A. a/ A                      B. the/ The                      **C. a/ The**                      D. the/ A

Question 10. In some English speaking countries, turkey and pudding are \_\_\_\_\_ food at Christmas.

- A. national                      B. historical                      **C. traditional**                      D. Possible

Question 11. \_\_\_\_\_ is it to the supermarket? - About five hundred metres.

- A. How much                      **B. How far**                      C. How long                      D. How often

Question 12. Though \_\_\_\_\_ sources such as coal, oil and natural gas are cheap and easy to use, they are limited and will run out soon.

- A. non-renewable**                      B. available                      C. limited                      D. renewable

Read the following announcement and mark the letter A, B, C or D on your answer sheet to indicate the correct option that best fits each numbered blank from 13 to 16.

What's more, part of that Itcertkey NSE6\_SDW\_AD-7.6 dumps now are free: [https://drive.google.com/open?id=1iYWRkUneiwTiq0pQhjmGLh\\_HpWKgdk4j](https://drive.google.com/open?id=1iYWRkUneiwTiq0pQhjmGLh_HpWKgdk4j)

There are three versions of Fortinet NSE 6 - SD-WAN 7.6 Enterprise Administrator test torrent—PDF, software on pc, and app online, the most distinctive of which is that you can install NSE6\_SDW\_AD-7.6 test answers on your computer to simulate the real exam environment, without limiting the number of computers installed. The buying process of NSE6\_SDW\_AD-7.6 Test Answers is very simple, which is a big boon for simple people. After the payment of NSE6\_SDW\_AD-7.6 guide torrent is successful, you will receive an email from our system within 5-10 minutes; click on the link to login and then you can learn immediately with NSE6\_SDW\_AD-7.6 guide torrent.

We are constantly updating our practice material to ensure that you receive the latest preparation material based on the actual Fortinet NSE6\_SDW\_AD-7.6 exam content. Up to 1 year of free Fortinet NSE 6 - SD-WAN 7.6 Enterprise Administrator (NSE6\_SDW\_AD-7.6) exam questions updates are also available at Itcertkey. The Itcertkey offers a money-back guarantee (terms and conditions apply) for students who fail to pass their Fortinet NSE 6 - SD-WAN 7.6 Enterprise Administrator (NSE6\_SDW\_AD-7.6) exam on the first try.

>> Latest Fortinet NSE6\_SDW\_AD-7.6 Exam Labs <<

## Quiz Fortinet - NSE6\_SDW\_AD-7.6 Fantastic Latest Exam Labs

We can provide you with a safety and efficiency shopping experience when you choose Itcertkey NSE6\_SDW\_AD-7.6 test Camp Questions. You see, we use Paypal to do the payment, so the payment process is secured and your personal information is secret

and protected. In addition, the payment process is very easy to operate. You will receive an email attached with NSE6\_SDW\_AD-7.6 study pdf after your payment in about 5-10 minutes, then you can start your study immediately.

## Fortinet NSE 6 - SD-WAN 7.6 Enterprise Administrator Sample Questions (Q95-Q100):

### NEW QUESTION # 95

An SD-WAN member is no longer used to steer SD-WAN traffic. The administrator updated the SD-WAN configuration and deleted the unused member. After the configuration update, users report that some destinations are unreachable. You confirm that the affected flow does not match an SD-WAN rule.

What could be a possible cause of the traffic interruption?

- A. FortiGate administratively brings down interfaces when they are removed from the SD-WAN configuration.
- B. FortiGate, with SD-WAN enabled, cannot route traffic through interfaces that are not SD-WAN members.
- C. FortiGate can remove some static routes associated with an interface when the member is removed from SD-WAN.
- D. FortiGate removes the layer 3 settings for interfaces that are removed from the SD-WAN configuration.

**Answer: C**

Explanation:

When an SD-WAN member is deleted, FortiGate can also remove static routes that were tied to that interface.

If those routes are needed for destinations not covered by SD-WAN rules, traffic to those networks becomes unreachable. This explains why flows not matching SD-WAN rules are interrupted after the member was removed.

### NEW QUESTION # 96

(You are configuring SD-WAN to load balance network traffic and you want to take into account the link quality. Which two facts should you consider? Choose two answers.)

- A. You can select the lowest cost service level agreement (SLA) strategy and allow SD-WAN load balancing.
- B. When applicable, FortiGate load balances the traffic through all members that meet the SLA target.
- C. The best quality strategy supports only the round-robin hash mode.
- D. You can select the best quality strategy and allow SD-WAN load balancing.

**Answer: A,B**

Explanation:

When SD-WAN load balancing is required with link quality awareness, FortiOS relies on SLA-based strategies. These strategies evaluate link performance using performance SLAs (latency, jitter, packet loss, MOS) and then make forwarding decisions accordingly.

Option A is correct.

In FortiOS 7.6, when an SLA-based SD-WAN rule has load balancing enabled, FortiGate distributes traffic only across the members that meet the SLA targets. Any member that is out of SLA is excluded from load balancing. This behavior ensures that traffic is not forwarded over degraded links while still allowing load distribution across healthy paths.

Option C is correct.

The lowest cost (SLA) strategy is an SLA-based strategy that considers link quality while also allowing SD-WAN load balancing. When multiple members meet the SLA requirements and have equal cost, FortiGate can load balance traffic across them using the configured hash mode. This makes the lowest cost SLA strategy suitable when both link quality and load balancing are required.

Why the other options are incorrect:

\* Option B is incorrect because the best quality strategy is designed to select the single best-performing link based on SLA metrics. It does not support SD-WAN load balancing across multiple links.

\* Option D is incorrect because the best quality strategy does not support load balancing at all, so the statement about round-robin hash mode is invalid.

Therefore, the two correct facts to consider are A and C.

### NEW QUESTION # 97

Refer to the exhibit, which shows the SD-WAN rule status and configuration.

## SD-WAN rule status and configuration

```
branch1_fgt # diagnose sys sdwan service4 3

Service(3): Address Mode(IPV4) flags=0x4200 use-shortcut-sla use-shortcut
Tie break: cfg
Shortcut priority:2
Gen(43), TOS(0x0/0x0), Protocol(0): src(1->65535):dst(1->65535), Mode(priority),
link-cost-factor(packet loss), link-cost-threshold(10), health-check(HUB1_HC)
Members(3):
  1: Seq_num(4 HUB1-VPN1 HUB1), alive, latency: 96.349, selected
  2: Seq_num(5 HUB1-VPN2 HUB1), alive, latency: 141.278, selected
  3: Seq_num(6 HUB1-VPN3 HUB1), alive, latency: 190.984, selected
Src address(1):
  10.0.1.0-10.0.1.255

Dst address(1):
  10.0.0.0-10.255.255.255

branch1_fgt (service) # show
config service
edit 3
  set name "Corp"
  set mode priority
  set dst "Corp-net"
  set src "LAN-net"
  set health-check "HUB1_HC"
  set link-cost-factor packet-loss
  set link-cost-threshold 0
  set priority-members 4 5 6
next
```

Based on the exhibit, which change in the measured latency will first make HUB1-VPN3 the new preferred member?

- A. When HUB1-VPN3 has a latency of 80 ms
- B. When HUB1-VPN3 has a latency of 90 ms
- C. When HUB1-VPN3 has a lower latency than HUB1-VPN1 and HUB1-VPN2
- **D. When HUB1-VPN1 has a latency of 200 ms**

**Answer: D**

Explanation:

The rule is in priority mode with HUB1-VPN1 (seq 4) as the first preferred member, HUB1-VPN2 second, and HUB1-VPN3 third. Latency itself does not cause HUB1-VPN3 to become preferred unless a higher-priority member fails SLA. If HUB1-VPN1's latency exceeds the SLA threshold (here simulated by latency reaching 200 ms), FortiGate stops using it and moves down the priority list. That is when HUB1-VPN3 could become the active path.

### NEW QUESTION # 98

Within the context of SD-WAN, what does SIA correspond to?

- A. Secure Internet Authorization
- B. Local Breakout
- **C. Remote Breakout**
- D. Software Internet Access

**Answer: C**

Explanation:

"Secure internet access (SIA), also known as remote breakout, is another use case for SD-WAN."

### NEW QUESTION # 99

Refer to the exhibit.

```
config system sdwan
  config health_check
    edit "DNS"
      set server "4.2.2.1" "4.2.2.2"
      set detect-mode active
      set protocol ping
      set embed-measured-health enable
      set members 3 4
    config sla
      edit 1
        set link-cost-factor latency
        set latency-threshold 100
      end
    end
  next
end
```

The exhibit shows the health-check configuration on a FortiGate device used as a spoke. You notice that the hub FortiGate doesn't prioritize the traffic as expected.

Which two configuration elements should you check on the hub? (Choose two.)

- A. The performance SLA has the parameter priority-out-sla configured.
- **B. The performance SLA uses the same criteria.**
- C. This performance SLA uses the same members.
- **D. The performance SLA is configured with set embedded-measure accept.**

**Answer: B,D**

Explanation:

The hub must use a performance SLA with the same criteria as the spoke's health check. The spoke's health check is using ping (protocol ping) and measuring latency (link-cost-factor latency). For the hub to use the data sent by the spoke, its performance SLA must be configured to measure the same metrics. If the hub is looking for jitter or packet loss, it will not use the latency data sent by the spoke.

When a spoke sends embedded health data, the hub FortiGate must be configured to receive and use it. This is done by setting set embedded-measure accept within the performance SLA configuration on the hub. This setting explicitly tells the hub to trust and use the performance metrics received from the remote FortiGate (the spoke). Without this setting, the hub will likely ignore the embedded health data and rely on its own health checks, which could lead to incorrect traffic prioritization.

## NEW QUESTION # 100

.....

Luckily, we are going to tell you a good new that the demo of the NSE6\_SDW\_AD-7.6 study materials are easily available in our company. If you buy the study materials from our company, we are glad to offer you with the best demo of our study materials. You will have a deep understanding of the NSE6\_SDW\_AD-7.6 Study Materials from our company, and then you will find that the study materials from our company will very useful and suitable for you to prepare for you NSE6\_SDW\_AD-7.6 exam.
