## ISACA Certified Information Systems Auditor Sample Questions (Q333-Q338):

### NEW QUESTION # 333

An IS auditor is reviewing standards and compliance requirements related to an upcoming systems audit. The auditor notes that the industry standards are less stringent than local regulatory standards. How should the auditor proceed?

- A. Coordinate with regulatory officers to determine necessary requirements.
- **B. Audit to the standards with the highest requirements.**
- C. Audit to the policies and procedures of the organization.
- D. Audit exclusively to the industry standards.

**Answer: B**

### NEW QUESTION # 334

The GREATEST risk posed by an improperly implemented intrusion prevention system (IPS) is:

- A. decreased network performance due to IPS traffic.
- B. that there will be too many alerts for system administrators to verify.
- **C. the blocking of critical systems or services due to false triggers.**
- D. reliance on specialized expertise within the IT organization.

**Answer: C**

Explanation:

An intrusion prevention system (IPS) prevents a connection or service based on how it is programmed to react to specific incidents. If the packets are coming from a spoofed address and the IPS is triggered based on previously defined behavior, it may block the service or connection of a critical internal system. The other choices are risks that are not as severe as blocking critical systems or services due to false triggers.

### NEW QUESTION # 335

Which of the following would prevent accountability for an action performed, thus allowing nonrepudiation?

- **A. Proper identification AND authentication**
- B. Proper authentication
- C. Proper identification, authentication, AND authorization
- D. Proper identification

**Answer: A**

Explanation:

Section: Protection of Information Assets

Explanation:

If proper identification and authentication are not performed during access control, no accountability can exist for any action performed.

### NEW QUESTION # 336

What is the PRIMARY benefit to executive management when audit, risk, and security functions are aligned?

- A. Reduced number of assurance reports
- **B. More effective decision making**

- C. More efficient incident handling
- D. More timely risk reporting

**Answer: B**

Explanation:

Section: Governance and Management of IT
