

# Free PDF 2026 Valid AD0-E117: Reliable Adobe Experience Manager Architect Master Test Question

P.S. Free & New AD0-E117 dumps are available on Google Drive shared by BootcampPDF: [https://drive.google.com/open?id=1vLbUf-V5P5ckCM8u0SoamAmOgCIPTZ\\_K](https://drive.google.com/open?id=1vLbUf-V5P5ckCM8u0SoamAmOgCIPTZ_K)

Before the clients decide to buy our AD0-E117 test guide they can firstly be familiar with our products. The clients can understand the detailed information about our products by visiting the pages of our products on our company's website. Firstly you could know the price and the version of our AD0-E117 study question, the quantity of the questions and the answers. Secondly you could look at the free demos of our AD0-E117 learning prep to see if the questions and the answers are valuable. And our pass rate of AD0-E117 exam questions is more than 98%.

To prepare for the Adobe AD0-E117 Certification Exam, candidates can take advantage of a variety of resources, including training courses, practice exams, and study guides. Adobe offers a range of training courses that cover AEM architecture and administration, as well as best practices for designing and implementing AEM solutions. Additionally, there are numerous study guides and practice exams available online that can help candidates prepare for the exam.

## New Adobe AD0-E117 Dumps, AD0-E117 Exam Dumps

In order to facilitate the wide variety of users' needs the AD0-E117 study guide have developed three models with the highest application rate in the present - PDF, software and online. No matter you are a student, a office staff or even a housewife, you can always find your most suitable way to study our AD0-E117 Exam Q&A. Generally speaking, these three versions of our AD0-E117 learning guide can support study on paper, computer and all kinds of eletronic devices. They are quite convenient.

Adobe AD0-E117 is an advanced-level certification exam designed for professionals who want to validate their skills and expertise in Adobe Experience Manager (AEM) architecture. AD0-E117 exam is intended for individuals who have experience in designing, implementing, and managing AEM solutions. The Adobe AD0-E117 exam tests the candidate's knowledge of AEM architecture, best practices, and advanced concepts such as system integration and scalability.

Adobe AD0-E117 certification exam is designed to help professionals demonstrate their mastery of Adobe Experience Manager (AEM) architecture. AEM is a powerful content management system used by businesses to create, manage, and publish digital content across multiple channels. Adobe Experience Manager Architect Master certification exam is intended for professionals who are responsible for architecting AEM solutions and who have a deep understanding of AEM architecture and functionality.

## Adobe Experience Manager Architect Master Sample Questions (Q64-Q69):

### NEW QUESTION # 64

During an optimization session, a client using AEM 6.5 mentions that they face challenges with their AEM Author setup. The client has significant repository growth and can see an increased amount of TAR files in the segmentstore on disk. When editors are working, they see that workflows take up more time. The purging of workflows works as expected. Which two optimizations should an Architect suggest to take into and further investigate? (Choose two.)

- A. Configure the Maximum Parallel Jobs
- B. Leverage Transient Workflows where possible
- C. Leverage workflow offloading for all workflows
- D. Increase the maxFileSize of the TAR segmentstore
- E. Execute an offline tar compaction twice a day

**Answer: B,C**

Explanation:

Leverage workflow offloading for all workflows and Leverage Transient Workflows where possible<sup>123</sup>

. According to Adobe Experience Manager documentation<sup>2</sup>, workflow offloading is a technique that distributes processing tasks among AEM instances in a topology. This can improve performance and scalability of AEM author instances by using dedicated instances for executing workflows. Transient workflows are workflows that do not persist any data or history and are automatically purged after completion

3. This can reduce repository growth and improve workflow efficiency.

### NEW QUESTION # 65

A customer has a website with 10,000 pages and wants to improve performance. Which option should be used?

- A. Specify a wildcard allow rule in the invalidate section
- B. Decrease .stat file level from the default
- C. Advise to use URL parameters instead of sling selectors
- D. Increase .stat file level from the default

**Answer: D**

Explanation:

"increasing .stat file level from the default can improve performance by reducing the number of requests to AEM publish instances".

### NEW QUESTION # 66

A customer's photo gallery site uses query parameters to filter photo search results. The site experiences high AEM Publish server load when users filter photos on the site. The customer would like to identify the cause of this issue.

What should the Architect investigate first?

- A. Cache-Control Headers in dispatcher.any
- B. Dispatcher load balancing configuration
- C. Volume of assets being loaded at a time
- D. ignoreUrlParams configuration in dispatcher.any

**Answer: A**

Explanation:

"Cache-Control Headers in dispatcher.any control how long the dispatcher caches responses from the publish server. If these headers are not configured properly, the dispatcher may cache stale or dynamic content, resulting in high server load and poor performance".

### NEW QUESTION # 67

A large digital agency has 10 TB of assets in their DAM where renditions for each Asset must be created without affecting performance for the authors. Which capability should the Architect recommend to meet the requirements?

- A. Use AEM Asset Offloading
- B. Create AEM multi-threaded workflow
- C. Reduce the number of AEM Asset versions
- D. Update dispatcher configuration to cache Assets

**Answer: A**

Explanation:

"AEM Asset Offloading allows for delegating asset processing tasks such as rendition generation to a separate AEM instance or service. This reduces the load on the author servers and improves performance for authors".

## NEW QUESTION # 68

An AEM Sites implementation is migrating from on-premise to AEM as a Cloud Service. Previously, the application was deployed in a single package for both code and access policy nodes. After initial deployment and testing in the new infrastructure, it is reported that user permissions are not working as expected.

What change should the Architect make to address this issue?

- A. Refactor access policy nodes to Apache Sling JCR Repoint scripts in the same package
- B. Document permissions and request the Customer Success Engineer to configure
- C. Move access policy nodes to a dedicated package and install manually
- D. Update package metadata to use MergePreserve for handling access policy nodes

**Answer: A**

### Explanation:

Refactor access policy nodes to Apache Sling JCR Repoint scripts in the same package<sup>1</sup>. According to Adobe Experience Manager documentation<sup>23</sup>, access policy nodes are used to control who can access a policy-protected document. However, they are not supported by AEM as a Cloud Service and need to be refactored using Apache Sling JCR Repoint scripts.
