

Databricks - Databricks-Certified-Data-Analyst-Associate - Databricks Certified Data Analyst Associate Exam— Professional Boot Camp

DOWNLOAD the newest BraindumpStudy Databricks-Certified-Data-Analyst-Associate PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=13zghO1c17j8FecnG3FcZKbU81pLaz546>

Our career is inextricably linked with your development at least in the Databricks-Certified-Data-Analyst-Associate practice exam's perspective. So we try to emulate with the best from the start until we are now. So as the most professional company of Databricks-Certified-Data-Analyst-Associate study dumps in this area, we are dependable and reliable. We maintain the tenet of customer's orientation. If you hold any questions about our Databricks-Certified-Data-Analyst-Associate Exam Prep, our staff will solve them for you 24/7. It is our duty and honor to offer help.

BraindumpStudy is an excellent platform where you get relevant, credible, and unique Databricks Databricks-Certified-Data-Analyst-Associate exam dumps designed according to the specified pattern, material, and format as suggested by the Databricks Databricks-Certified-Data-Analyst-Associate exam. To make the Databricks Databricks-Certified-Data-Analyst-Associate Exam Questions content up-to-date for free of cost up to 1 year after buying them, our certified trainers work strenuously to formulate the exam questions in compliance with the Databricks Certified Data Analyst Associate Exam (Databricks-Certified-Data-Analyst-Associate) dumps.

Databricks-Certified-Data-Analyst-Associate Exam Questions | Reliable Databricks-Certified-Data-Analyst-Associate Test Tips

There are many certificates for you to get but which kind of certificate is most authorized, efficient and useful? We recommend you the Databricks-Certified-Data-Analyst-Associate certificate because it can prove that you are competent in some area and boost outstanding abilities. If you buy our Databricks-Certified-Data-Analyst-Associate Study Materials you will pass the test smoothly and easily. On one hand, you can study the most professional and specialized knowledge in this field. On the other hand, you can gain the Databricks-Certified-Data-Analyst-Associate certification.

Databricks Databricks-Certified-Data-Analyst-Associate Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Data Management: The topic describes Delta Lake as a tool for managing data files, Delta Lake manages table metadata, benefits of Delta Lake within the Lakehouse, tables on Databricks, a table owner's responsibilities, and the persistence of data. It also identifies management of a table, usage of Data Explorer by a table owner, and organization-specific considerations of PII data. Lastly, the topic it explains how the LOCATION keyword changes, usage of Data Explorer to secure data.

Topic 2	<ul style="list-style-type: none"> SQL in the Lakehouse: It identifies a query that retrieves data from the database, the output of a SELECT query, a benefit of having ANSI SQL, access, and clean silver-level data. It also compares and contrasts MERGE INTO, INSERT TABLE, and COPY INTO. Lastly, this topic focuses on creating and applying UDFs in common scaling scenarios.
Topic 3	<ul style="list-style-type: none"> Data Visualization and Dashboarding: Sub-topics of this topic are about of describing how notifications are sent, how to configure and troubleshoot a basic alert, how to configure a refresh schedule, the pros and cons of sharing dashboards, how query parameters change the output, and how to change the colors of all of the visualizations. It also discusses customized data visualizations, visualization formatting, Query Based Dropdown List, and the method for sharing a dashboard.
Topic 4	<ul style="list-style-type: none"> Databricks SQL: This topic discusses key and side audiences, users, Databricks SQL benefits, complementing a basic Databricks SQL query, schema browser, Databricks SQL dashboards, and the purpose of Databricks SQL endpoints warehouses. Furthermore, the delves into Serverless Databricks SQL endpoint warehouses, trade-off between cluster size and cost for Databricks SQL endpoints warehouses, and Partner Connect. Lastly it discusses small-file upload, connecting Databricks SQL to visualization tools, the medallion architecture, the gold layer, and the benefits of working with streaming data.
Topic 5	<ul style="list-style-type: none"> Analytics applications: It describes key moments of statistical distributions, data enhancement, and the blending of data between two source applications. Moreover, the topic also explains last-mile ETL, a scenario in which data blending would be beneficial, key statistical measures, descriptive statistics, and discrete and continuous statistics.

Databricks Certified Data Analyst Associate Exam Sample Questions (Q64-Q69):

NEW QUESTION # 64

In which of the following situations should a data analyst use higher-order functions?

- A. When custom logic needs to be applied to simple, unnested data
- B. When custom logic needs to be applied at scale to array data objects
- C. When built-in functions are taking too long to perform tasks
- D. When built-in functions need to run through the Catalyst Optimizer
- E. When custom logic needs to be converted to Python-native code

Answer: B

Explanation:

Higher-order functions are a simple extension to SQL to manipulate nested data such as arrays. A higher-order function takes an array, implements how the array is processed, and what the result of the computation will be. It delegates to a lambda function how to process each item in the array. This allows you to define functions that manipulate arrays in SQL, without having to unpack and repack them, use UDFs, or rely on limited built-in functions. Higher-order functions provide a performance benefit over user defined functions. Reference: Higher-order functions | Databricks on AWS, Working with Nested Data Using Higher Order Functions in SQL on Databricks | Databricks Blog, Higher-order functions - Azure Databricks | Microsoft Learn, Optimization recommendations on Databricks | Databricks on AWS

NEW QUESTION # 65

A business analyst has been asked to create a data entity/object called sales_by_employee. It should always stay up-to-date when new data are added to the sales table. The new entity should have the columns sales_person, which will be the name of the employee from the employees table, and sales, which will be all sales for that particular sales person. Both the sales table and the employees table have an employee_id column that is used to identify the sales person.

Which of the following code blocks will accomplish this task?

- A. ☐
- B. ☐

- C. ☐
- D. ☐

Answer: C

Explanation:

The SQL code provided in Option D is the correct way to create a view named `sales_by_employee` that will always stay up-to-date with the sales and employees tables. The code uses the `CREATE OR REPLACE VIEW` statement to define a new view that joins the sales and employees tables on the `employee_id` column. It selects the `employee_name` as `sales_person` and all sales for each employee, ensuring that the data entity/object is always up-to-date when new data are added to these tables.

NEW QUESTION # 66

A data analyst needs to use the Databricks Lakehouse Platform to quickly create SQL queries and data visualizations. It is a requirement that the compute resources in the platform can be made serverless, and it is expected that data visualizations can be placed within a dashboard.

Which of the following Databricks Lakehouse Platform services/capabilities meets all of these requirements?

- A. Databricks SQL
- B. Databricks Notebooks
- C. Delta Lake
- D. Databricks Machine Learning
- E. Tableau

Answer: A

Explanation:

Databricks SQL is a serverless data warehouse on the Lakehouse that lets you run all of your SQL and BI applications at scale with your tools of choice, all at a fraction of the cost of traditional cloud data warehouses¹. Databricks SQL allows you to create SQL queries and data visualizations using the SQL Analytics UI or the Databricks SQL CLI². You can also place your data visualizations within a dashboard and share it with other users in your organization³. Databricks SQL is powered by Delta Lake, which provides reliability, performance, and governance for your data lake⁴. Reference:

Databricks SQL

Query data using SQL Analytics

Visualizations in Databricks notebooks

Delta Lake

NEW QUESTION # 67

Delta Lake stores table data as a series of data files, but it also stores a lot of other information.

Which of the following is stored alongside data files when using Delta Lake?

- A. Table metadata
- B. Data summary visualizations
- C. Owner account information
- D. None of these
- E. Table metadata, data summary visualizations, and owner account information

Answer: A

Explanation:

Delta Lake is a storage layer that enhances data lakes with features like ACID transactions, schema enforcement, and time travel. While it stores table data as Parquet files, Delta Lake also keeps a transaction log (stored in the `_delta_log` directory) that contains detailed table metadata.

This metadata includes:

Table schema

Partitioning information

Data file paths

Transactional operations like inserts, updates, and deletes

Commit history and version control

This metadata is critical for supporting Delta Lake's advanced capabilities such as time travel and efficient query execution. Delta

Lake does not store data summary visualizations or owner account information directly alongside the data files.

NEW QUESTION # 68

A data analyst has a managed table `table_name` in database `database_name`. They would now like to remove the table from the database and all of the data files associated with the table. The rest of the tables in the database must continue to exist.

Which of the following commands can the analyst use to complete the task without producing an error?

- A. `DELETE TABLE database_name.table_name;`
- **B. `DROP TABLE database_name.table_name;`**
- C. `DROP DATABASE database_name;`
- D. `DELETE TABLE table_name FROM database_name;`
- E. `DROP TABLE table_name FROM database_name;`

Answer: B

NEW QUESTION # 69

.....

You can trust the Databricks-Certified-Data-Analyst-Associate practice test and start this journey with complete peace of mind and satisfaction. The Databricks-Certified-Data-Analyst-Associate exam PDF questions will not assist you in Databricks Certified Data Analyst Associate Exam (Databricks-Certified-Data-Analyst-Associate) exam preparation but also provide you with in-depth knowledge about the Databricks Certified Data Analyst Associate Exam (Databricks-Certified-Data-Analyst-Associate) exam topics. This knowledge will be helpful to you in your professional life. So Databricks Certified Data Analyst Associate Exam (Databricks-Certified-Data-Analyst-Associate) exam questions are the ideal study material for quick Databricks Databricks-Certified-Data-Analyst-Associate exam preparation.
