- B. They build a consolidated backlog during the Realize phase
- C. To validate customer scopes during Fit-To-Standard workshops and provide the required configuration values for the Realize phase.

Answer: C

Explanation:

Level 3 Business Driven Configuration Questionnaires (BDCQs) are detailed tools used in the SAP Activate methodology to collect configuration data and validate the solution fit for SAP S/4HANA Cloud Public Edition.

* Option A: They build a consolidated backlog during the Realize phase. Incorrect. BDCQs are used in the Explore phase to gather configuration data, not to build a backlog in the Realize phase. The SAP S

/4HANA Cloud Implementation Guide states, "BDCQs are utilized in the Explore phase to collect configuration values, while backlogs are managed separately in SAP Cloud ALM during the Realize phase."

* Option B: To validate customer scopes during Fit-To-Standard workshops and provide the required configuration values for the Realize phase. Correct. Level 3 BDCQs are used during Fit-to-Standard workshops to validate scope and collect detailed configuration values for the Realize phase.

The SAP Activate Methodology Guide explains, "Level 3 BDCQs are employed during Fit-to-Standard workshops to validate customer scopes and gather detailed configuration values, which are then used to configure the solution in the Realize phase."

* Option C: To validate customer scopes and requirements against SAP S/4HANA Cloud Public Edition best practices. Incorrect. While BDCQs validate scopes, their primary role is to collect configuration data, not to validate requirements against best practices, which is done during Fit-to-Standard workshops. The SAP S/4HANA Cloud Study Guide clarifies, "BDCQs focus on configuration data collection, while best practice validation occurs through process demonstrations in Fit-to-Standard workshops." Extract from Official Documentation:

* SAP Activate Methodology Guide (SAP Community, <https://community.sap.com>): "Level 3 Business Driven Configuration Questionnaires are used in Fit-to-Standard workshops to validate customer scopes and collect configuration values, providing the foundation for solution configuration in the Realize phase."

* SAP S/4HANA Cloud Implementation Guide (SAP Help Portal, <https://help.sap.com>): "Level 3 BDCQs are detailed questionnaires that support Fit-to-Standard workshops by validating scope and gathering configuration data, ensuring accurate setup in the Realize phase." Additional Context:

Level 3 BDCQs are the most granular level of questionnaires, focusing on specific configuration details, making them critical for translating workshop outcomes into actionable configuration tasks. Their role in validating scope ensures alignment with customer needs while maintaining cloud compliance.
