AI-102 Certification Book Torrent | Valid AI-102 Test Discount

BONUS!!! Download part of Prep4away AI-102 dumps for free: https://drive.google.com/open?id=1lCEIj_RjTq9ticuX7B0TSY3h0HnzNb86

I just want to share with you that here is a valid AI-102 exam cram file with 100% pass rate and amazing customer service. If you are not sure about your exam, choosing our AI-102 exam cram file will be a good choice for candidates. We sell products by word of mouth. We are famous for our high pass-rate AI-102 Exam Cram. If you try to use our study materials one time, you will know how easy to pass exam with our AI-102 exam cram file. Our business policy is "products win by quality, service win by satisfaction".

Microsoft AI-102 certification exam is an excellent opportunity for professionals who want to showcase their skills and knowledge in designing and implementing AI solutions using Microsoft Azure services. AI-102 exam covers various topics related to AI and Azure services, and passing the exam validates the candidate's ability to solve real-world problems. Designing and Implementing a Microsoft Azure AI Solution certification also provides a competitive edge to professionals and helps them advance their careers in the field of Artificial Intelligence.

The Microsoft AI-102 Exam focuses on various Azure services that are used to build AI solutions. The candidates are expected to have a good understanding of Azure Machine Learning, Cognitive Services, and Bot Framework. AI-102 exam also covers topics related to data storage, data processing, and data visualization using Azure services.

Microsoft AI-102 Certification Book Torrent offer you accurate Valid Test Discount to pass Designing and Implementing a Microsoft Azure AI Solution exam

After taking a bird's eye view of applicants' issues, Prep4away has decided to provide them with the real AI-102 Questions. These AI-102 dumps pdf is according to the new and updated syllabus so they can prepare for AI-102 certification anywhere, anytime, with ease. A team of professionals has made the product of Prep4away after much hard work with their complete potential so the candidates can prepare for Designing and Implementing a Microsoft Azure AI Solution (AI-102) practice test in a short time.

Microsoft Designing and Implementing a Microsoft Azure AI Solution Sample Questions (Q310-Q315):

NEW QUESTION # 310
You have an Azure subscription that contains an Azure OpenAl resource. Multiple different models are deployed to the resource.
You are building a chatbot by using Chat playground in Azure Al Studio.
You need to ensure that the chatbot generates text in concise formal business language. The solution must meet the following requirements:
* Reduce the cost of running the language model.
* Maintain the size of the chatbot history window.
Which two settings should you configure? To answer, select the appropriate settings in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Scenario Recap:
* You have an Azure OpenAI resource with multiple deployed models.
* You are using the Chat playground to build a chatbot.
* Requirements:
* Generate text in concise, formal business language.
* Reduce cost of running the model.
* Maintain the size of the chatbot history window (i.e., context length).
In the Chat playground setup panel, you can configure System message instructions.
Example:
You are an AI assistant that responds in concise formal business language.
This controls tone, style, and response behavior.
So one setting is: System message / Instructions.
Costs in Azure OpenAI are tied to:
* The model used (larger models = more expensive).
* The context window size (token usage).
Since we must maintain the size of the chat history window, we cannot shrink context length.
Therefore, to reduce cost: select a smaller/cheaper deployed model (e.g., GPT-3.5 instead of GPT-4).
So the second setting is: Deployment (model selection).
* Configure Deployment # choose a smaller/cheaper model.
* Configure System message instructions # specify "concise formal business language." Microsoft References:
* Azure OpenAI Chat playground
* Best practices for reducing token cost

NEW QUESTION # 311
You are planning the product creation project.
You need to recommend a process for analyzing videos.
Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order. (Choose four.)

Answer:

Explanation:

https://docs.microsoft.com/en-us/azure/media-services/video-indexer/video-indexer-output-json-v2

NEW QUESTION # 312
You plan to deploy a containerized version of an Azure Cognitive Services service that will be used for text analysis.
You configure https://contoso.cognitiveservices.azure.com as the endpoint URI for the service, and you pull the latest version of the Text Analytics Sentiment Analysis container.

You need to run the container on an Azure virtual machine by using Docker.
How should you complete the command? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Reference:
https://docs.microsoft.com/en-us/azure/cognitive-services/text-analytics/how-tos/text-analytics-how-to-install-containers?
tabs=sentiment

NEW QUESTION # 313

You are building an image sharing app that will use Azure AI to prevent users from sharing sexually explicit images.
You need to ensure that inappropriate images are identified correctly. The solution must minimize development effort.
What should you use?

- A. Azure AI Studio
- B. Vision Studio in Azure AI Vision
- C. Visual Studio
- D. Azure AI Content Safety Studio

Answer: D

Explanation:
You want to prevent users from sharing sexually explicit images and minimize development effort.
Azure AI Content Safety Studio provides a no-code, browser-based experience to test and tune image moderation using the
Content Safety service. It supports out-of-the-box classification for Sexual, Hate, Violence, and Self-harm categories, lets you
adjust severity thresholds, review results, and export settings or sample code with minimal engineering work.
Other options:
* A. Visual Studio - an IDE, not a moderation service.
* B. Vision Studio in Azure AI Vision - focuses on vision tasks (OCR, image analysis). For policy
/compliance moderation of explicit content, Content Safety is the correct service.
* D. Azure AI Studio - general hub for building generative AI apps; not the specialized moderation experience.
Microsoft References
* Azure AI Content Safety overview and image moderation concepts.
* Content Safety Studio quickstart and scenarios.
* Content categories (Sexual, Hate, Violence, Self-harm).

NEW QUESTION # 314

Match the Azure services to the appropriate locations in the architecture.
To answer, drag the appropriate service from the column on the left to its location on the right. Each service may be used once,
more than once, or not at all.
NOTE: Each correct match is worth one point.

Answer:

Explanation:

NEW QUESTION # 315
