NEW QUESTION # 157
During the assessment process, who is the final interpretation authority for recommended findings?

- A. Assessment Team Members
- B. C3PAO
- C. CMMC-AB
- D. OSC sponsor

Answer: C

Explanation:
Final Interpretation Authority in the CMMC Assessment ProcessDuring aCMMC Level 2 assessment, several entities are involved in the process, including theOrganization Seeking Certification (OSC), Certified Third-Party Assessment Organization (C3PAO), Assessment Team Members, and the CMMC Accreditation Body (CMMC-AB).
* Role of the C3PAO and Assessment Team:
* TheCertified Third-Party Assessment Organization (C3PAO)is responsible for conducting the assessment and makinginitial recommended findingsbased on NIST SP 800-171 security requirements.

* Assessment Team Members(Lead Assessor and support staff) conduct evaluations and submit their recommendations to the C3PAO.
* Final Interpretation Authority - CMMC-AB:
* The CMMC Accreditation Body (CMMC-AB) is responsible for ensuring consistency and accuracy in assessments.
* If there is any dispute or need for clarification regarding findings, CMMC-AB provides the final interpretation and guidance.
* This ensures uniformity in certification decisions across different C3PAOs.
* Why CMMC-AB is the Correct Answer:
* CMMC-AB has the ultimate authority over the quality assurance process for assessments.
* It reviews remediation requests, challenges, or disputes from the OSC or C3PAO and makes final determinations.
* The CMMC-AB maintains oversight to ensure assessments align with CMMC 2.0 policies and DFARS 252.204-7021 requirements.
* A. C3PAO- The C3PAO conducts the assessment and submits findings, but it does not have the final interpretation authority. Findings must pass through the CMMC-AB quality assurance process.
* C. OSC Sponsor- The OSC (Organization Seeking Certification) cannot interpret findings; they can only respond to identified deficiencies and appeal assessments through CMMC-AB channels.
* D. Assessment Team Members- The assessment team recommends findings but does not make final interpretations. Their role is limited to conducting evaluations, collecting evidence, and submitting reports to the C3PAO.

Answer: B

NEW QUESTION # 159

A dedicated local printer is used to print out documents with FCI in an organization. This is considered an FCI Asset Which function BEST describes what the printer does with the FCI?

* A. Distribute
* B. Process
* C. Manage
* D. Encrypt

Answer: B

Explanation:
Understanding the Role of an FCI Asset in CMMC A dedicated local printer used to print Federal Contract Information (FCI) is considered an FCI Asset. Under CMMC Level 1, FCI assets are required to meet basic cybersecurity controls to ensure that FCI is properly protected from unauthorized access.
Step-by-Step Breakdown:#1. Why "Process" is the Best Answer
* The printer receives digital FCI, converts it into a physical format (paper), and outputs the document.
* This aligns with the definition of "processing" in CMMC, which includes:
* Transforming or modifying data
* Generating output (e.g., printed documents)
* Using systems to interpret or manipulate information
#2. Why the Other Answer Choices Are Incorrect:

* (A) Encrypt#
* Aprinter does not encryptFCI-it simply prints it. Encryption applies todigital storage and transmission, not printing.
* (B) Manage#
* Managing FCI typically refers togovernance, access control, and oversight, which is not the function of a printer.
* (D) Distribute#
* While a printed documentcould be distributed, theprinter itself is not responsible for distributing FCI-it only processes the data for output.
* CMMC Assessment Guide (Level 1)confirms thatprocessing FCI includes using systems that convert or transform information, such as printers.
* NIST SP 800-171definesprocessingas an action thatchanges or manipulates information, which applies to printing.
Final Validation fromCMMC Documentation:

NEW QUESTION # 160
A server is used to store FCI with a cloud provider long-term. What is the server considered?

- A. In scope, because the cloud provider will be storing the FCI data
- B. Out of scope, because encryption is always used when the cloud provider stores the FCI data
- C. Out of scope, because the cloud provider stores the FCI data long-term
- D. In scope, because the cloud provider is required to be CMMC Level 2 certified

Answer: A

Explanation:
Assets that store, process, or transmit FCI or CUI are always in scope for CMMC. If a server with a cloud provider is used for long-term storage of FCI, that server is considered in scope because it directly holds covered data.
Supporting Extracts fromOfficial Content:
* CMMC Scoping Guide for Level 1: "Assets that store, process, or transmit FCI are in scope."
* CMMC Scoping Guide for Level 2: confirms the same rule applies for CUI.
Why Option A is Correct:
* The server stores FCI, making it automatically in scope.
* Option B is incorrect because long-term storage does not make an asset out of scope.
* Option C is incorrect - Level 1 (FCI) does not require a Level 2 certified provider.
* Option D is incorrect because encryption does not remove scope requirements.
