

認定するMB-335試験関連赤本 &合格スムーズMB-335 日本語版受験参考書 |効率的なMB-335赤本合格率

さらに、Topexam MB-335ダンプの一部が現在無料で提供されています: <https://drive.google.com/open?id=1IDrBWRdsfxRPfkOcUhPpLazneL0WgfCz>

当社Topexamは多くの優秀な専門家や教授がいます。過去数年、これらの専門家と教授は、すべての顧客向けにMB-335試験問題を設計するために最善を尽くしました。さらに重要なことは、最終的にMB-335試験問題でMB-335認定を取得すると、人生の楽しみと人間関係の改善、ストレスの軽減、全体的な生活の質の向上という大きなメリットが得られることです。そのため、MB-335試験に合格し、関連する認定を取得するために全力を尽くすことは非常に重要です。

Microsoft MB-335 Exam Syllabus Topics:

Section	Weight	Objectives
		- Configure advanced planning and supplementary functions
Topic 1: Implement additional supply chain management features	10-15%	1. Master planning and Planning Optimization 2. Use Copilot capabilities in Supply Chain Management 3. Service management and mixed reality integration 4. Vendor rebates and trade agreements
		- Set up production parameters and resources
Topic 2: Configure production prerequisites	20-25%	1. Define resource groups, capacities, and calendars 2. Configure bill of materials and routes 3. Configure costing versions and valuation methods
		- Implement advanced product information management
Topic 3: Configure products	15-20%	1. Manage product variants and configurations 2. Configure product attributes and categories 3. Implement engineering change management
		- Configure and use different production types
Topic 4: Implement production methods	15-20%	1. Process manufacturing 2. Lean manufacturing 3. Discrete manufacturing

- Manage production lifecycle and operations

Topic 5: Configure production control

20-
25%

- 1. Production scheduling and capacity planning
- 2. Production costing and variance analysis
- 3. Subcontracting and outsourced operations
- 4. Manufacturing execution and shop floor control

MB-335日本語版受験参考書、MB-335赤本合格率

MB-335試験はIT業界でのあなたにとって重要です。あなたはMB-335試験に悩んでいますか？試験に合格できないことを心配していますか？我々の提供した一番新しくて全面的なMicrosoftのMB-335問題集はあなたのすべての需要を満たすことができます。資格をもらうのはあなたの発展の第一歩で、我々のMB-335日本語対策はあなたを助けて試験に合格して資格をもらうことができます。

Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert 認定 MB-335 試験問題 (Q214-Q219):

質問 # 214

A company that assembles packaging material uses Dynamics 365 Supply Chain Management.

The glue that is used in assembly has run out of stock and will not be back in stock as expected. Another adhesive must be substituted for the glue. This will affect orders in planning as well as production orders that have started.

You need to ensure that the substitute adhesive is used in production until the glue is back in stock.

Which configuration should you use for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Requirement

Include the adhesive in planning.

Update production orders with the adhesive.

Configuration

Alternative item

Alternative item

Plan group and priority

Validity dates on BOM lines

Production picking list

Where used

Production picking list

Validity dates on BOM lines

正解:

解説:

Production picking list

質問 # 215

A company uses Dynamics 365 Supply Chain Management for its accounts receivable and accounts payable operations.

The company must issue payments to customers based on the sales quantities invoiced over a specific period.

A record must be labeled as Pending review when it is generated before anything else is done to the record.

You need to configure the system to apply this labeling functionality to records.

Solution: Create a workflow status. Assign the first step as a review step with the second steps being to approve and post the status.

Does the solution meet the goal?

- A. Yes
- B. No

正解: B

質問 # 216

You need to configure the production requirements of the controller.

What should you configure? To answer, move the appropriate configurations to the correct requirements. You may use each configuration once, more than once, or not at all. You may need to move the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

The screenshot shows a configuration interface with three main panes. The left pane, titled 'Configurations', contains four items: 'Item group', 'Item and category', 'Item and resource', and 'Production group'. The middle pane, titled 'Production ledger posting', contains three items: 'Requirement', 'Prototype production postings', and 'Spare part ledger posting'. The right pane, titled 'Configuration', is empty. A watermark 'Microsoft' and 'Opexam.jp' are visible across the image.

正解:

解説:

This screenshot shows the same configuration interface as the previous one, but with the 'Item group' and 'Item and resource' configurations moved to the 'Configuration' pane. The 'Production ledger posting' pane remains unchanged. A watermark 'Microsoft' and 'Opexam.jp' are visible across the image.

Explanation:

This screenshot shows the same configuration interface as the previous one, but with the 'Item group' and 'Item and resource' configurations moved to the 'Configuration' pane. The 'Production ledger posting' pane remains unchanged. A watermark 'Microsoft' and 'Opexam.jp' are visible across the image.

質問 # 217

A company uses Dynamics 365 Supply Chain Management.

The marketing group needs to be able to view a manufacturer's suggested retail price (MSRP) for a new bill of materials (BOM) item when the cost of the BOM item is calculated.

You need to configure the functionality.

What should you do?

- A. Add a profit setting percentage to a calculation group.
- B. Add a profit setting percentage to a cost group.
- C. Use the category price rules to generate a trade agreement with the sales price.
- D. Set the sales price model field on the calculation group to item sales price.
- E. Add a profit setting percentage to the released BOM product.

正解: C

解説:

* To view the manufacturer's suggested retail price (MSRP) for a new bill of materials (BOM) item, you need to configure a calculation group with a profit setting percentage. A calculation group is a group of settings that determine how the cost and sales price of a BOM item are calculated 1 . A profit setting percentage is a percentage that is added to the cost of a BOM item to calculate the sales price 2 . You can specify a profit setting percentage for each calculation group on the Calculation groups page 3 .

* When you calculate the cost and sales price of a BOM item, you must select a calculation group on the Calculations page. The calculation group determines the cost model and sales price model that are used for the BOM calculation. The cost model defines how the cost of the BOM item is calculated based on the cost categories and cost groups of the components and operations. The sales price model defines how the sales price of the BOM item is calculated based on the profit setting percentage and the cost model.

* By using a calculation group with a profit setting percentage, you can view the MSRP for a new BOM item when you calculate its cost and sales price. The MSRP will be shown as the calculated sales price on the Calculate item cost page. You can also view the calculation details and see how the profit setting percentage is applied to the cost of the BOM item.

* The other options are not correct, because they do not allow you to view the MSRP for a new BOM item when you calculate its cost. Setting the sales price model field on the calculation group to item sales price would use the existing sales price of the BOM item from the Item price page, instead of calculating a new sales price based on a profit setting percentage. Using the category price rules to generate a trade agreement with the sales price would create a trade agreement line for the BOM item based on its category, but it would not show the MSRP when you calculate its cost. Adding a profit setting percentage to the released BOM product or to a cost group would have no effect, because these entities do not affect how the sales price of a BOM item is calculated.

1 : Calculation groups 2 : Profit settings 3 : Create or modify calculation groups : [BOM calculations] :

[Cost models and sales price models] : [Calculate costs and prices for manufactured items] : [Category pricing rules]

質問 # 218

You need to configure the requirements for metal fabrication equipment maintenance. What must you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Requirement

Maintenance technician assignment

Ensure maintenance for warranty schedule

Configuration

Assign a functional location to a worker.

Assign a functional location to a worker.

Create a site financial dimension.

Set limit to responsible to no.

Set limit to responsible to yes.

Time

Time

Counter

Capacity load
