Microsoft Endpoint Administrator Sample Questions (Q266-Q271):

NEW QUESTION # 266

You have a Microsoft 365 subscription.

You have 10 computers that run Windows 10 and are enrolled in mobile device management (MDM).

You need to deploy the Microsoft 365 Apps for enterprise suite to all the computers.

What should you do?

- A. From Azure AD, add an enterprise application.
- B. From the Microsoft Intune admin center, add an app.**
- C. From Azure AD, add an app registration.
- D. From the Microsoft Intune admin center, create a Windows 10 device profile.

Answer: B

Explanation:

To deploy Microsoft 365 Apps for enterprise to Windows 10 devices that are enrolled in Intune, you need to add an app of type "Windows 10 app (Win32)" in the Microsoft Intune admin center and configure the app settings. You can then assign the app to groups of users or devices. References: <https://docs.microsoft.com/en-us/mem/intune/apps/apps-win32-app-management>

NEW QUESTION # 267

You implement the planned changes for Connection1 and Connection2

How many VPN connections will there be for User1 when the user signs in to Device 1 and Device2? To answer select the appropriate options in the answer area.

NOTE; Each correct selection is worth one point.

Answer Area

Device1:

1
2
3
4
5

Device2:

1
2
3
4
5

Device2:

1
2
3
4
5

Answer:

Explanation:

Answer Area

Device1: 1, 2, 3, 4, 5 (3 is selected)

Device2: 1, 2, 3, 4, 5 (4 is selected)

Microsoft

Explanation:

Device1: 1, 2, 3, 4, 5 (3 is selected)

Device2: 1, 2, 3, 4, 5 (4 is selected)

Microsoft

NEW QUESTION # 268

You have a Microsoft 365 E5 subscription that contains a user named User1.

You need to perform the following tasks for User1:

Set the Usage location to Canada.

Configure the Phone and Email authentication contact info for self-service password reset (SSPR).

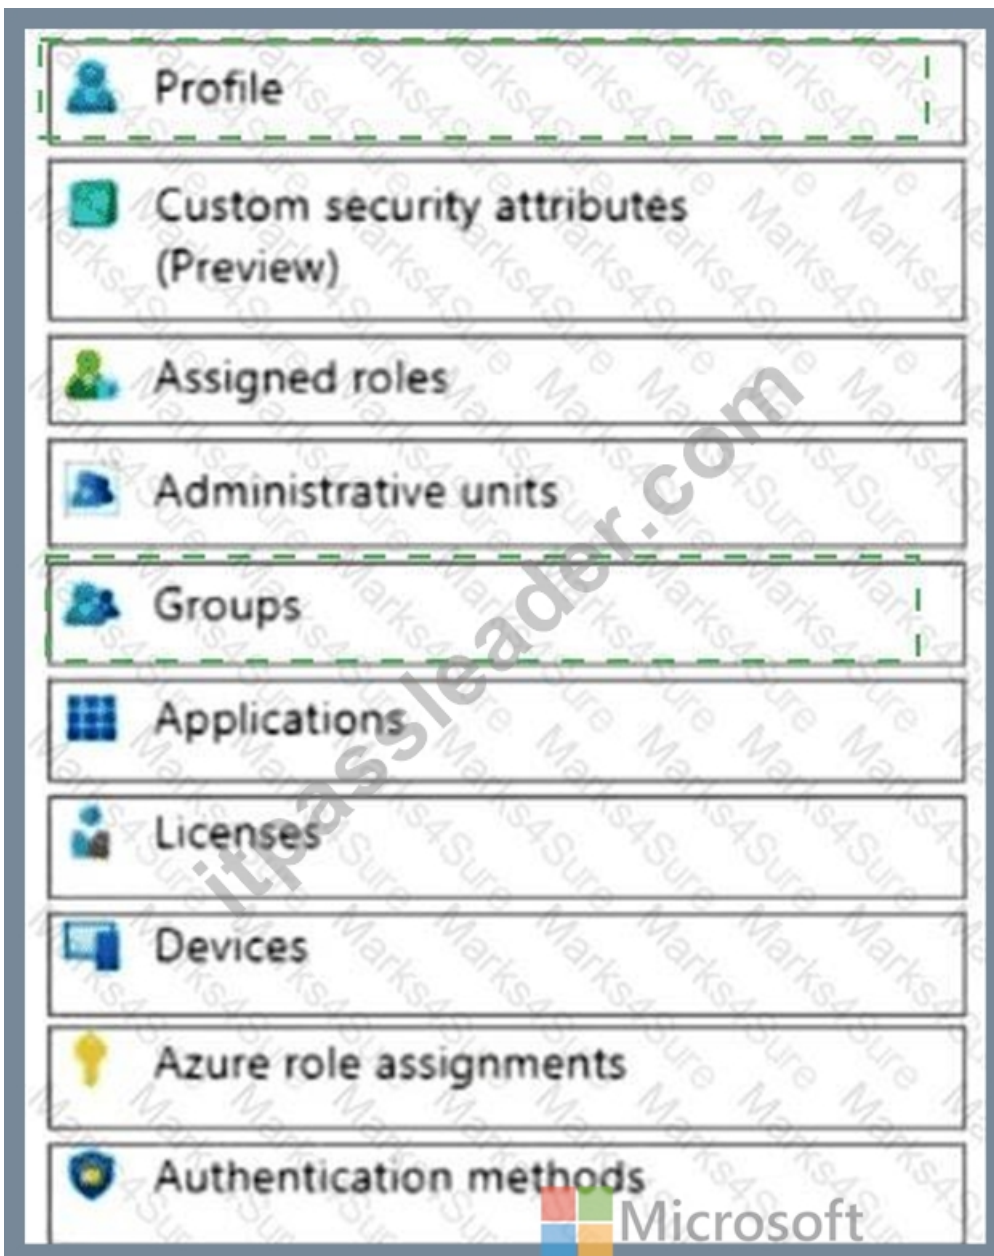

Which two settings should you configure in the Azure Active Directory admin center? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

-  Profile
-  Custom security attributes (Preview)
-  Assigned roles
-  Administrative units
-  Groups
-  Applications
-  Licenses
-  Devices
-  Microsoft Azure role assignments
-  Authentication methods

Answer:

Explanation:

Explanation:

NEW QUESTION # 269

You have a Microsoft Deployment Toolkit (MDT) solution that is used to manage Windows 11 deployment tasks. MDT contains the operating system images shown in the following table.

Name	Description
Image1.wim	Custom-built Windows 11 image that has preinstalled custom apps
Image2.wim	Custom-built Windows 11 image without apps
Install.wim	Default Windows 11 image

You need to perform a Windows 11 in-place upgrade on several computers that run Windows 10.

From the Deployment Workbench, you open the New Task Sequence Wizard.

You need to identify which task sequence template and which operating system image to use for the task sequence. The solution must minimize administrative effort.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Task sequence template:

Standard Client Task Sequence
Standard Client Replace Task Sequence
Standard Client Upgrade Task Sequence

Operating system image:

Image1.wim
Image2.wim
Install.wim

Answer:

Explanation:

Task sequence template:

Standard Client Task Sequence
Standard Client Replace Task Sequence
Standard Client Upgrade Task Sequence

Operating system image:

Image1.wim
Image2.wim
Install.wim

Explanation:

Box 1: Standard Client Upgrade Task Sequence

Use Template: Standard Client Upgrade Task Sequence

In-place upgrade is the preferred method to use when migrating from Windows 10 to a later release of Windows 10, and is also a preferred method for upgrading from Windows 7 or 8.1 if you do not plan to significantly change the device's configuration or applications. MDT includes an in-place upgrade task sequence template that makes the process really simple.

Box 2: Install.wim

In-place upgrade differs from computer refresh in that you cannot use a custom image to perform the in-place upgrade. I

NEW QUESTION # 270

You have a Microsoft 365 subscription.

You need to deploy Microsoft 365 Apps for enterprise applications to Windows 10 devices.

What should you do first?

- A. From the Endpoint Manager admin center, create an app.
- B. From Microsoft Azure Active Directory (Azure AD), create an app registration.
- C. From the Endpoint Manager admin center, enable Microsoft Store for Business synchronization.
- D. From the Endpoint Manager admin center, create an app configuration policy.

Answer: A

Explanation:

Before you can assign, monitor, configure, or protect apps, you must add them to Intune. One of the available app types is Microsoft 365 apps for Windows 10 devices. By selecting this app type in Intune, you can assign and install Microsoft 365 apps to devices you manage that run Windows 10.

Note: Review + create -
