Test C_S4CPB_2508 Simulator | Exam C_S4CPB_2508 Labs

If you are searching for an easy and rewarding study content to get through the C_S4CPB_2508 Exam, you are at the right place to get success. Our C_S4CPB_2508 exam questions can help you pass the exam and achieve the according certification with ease. If you study with our C_S4CPB_2508 Practice Guide for 20 to 30 hours, then you will be bound to pass the exam with confidence. And the price for our C_S4CPB_2508 training engine is quite favourable. What are you waiting for? Just come and buy it!

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q42-Q47):

NEW QUESTION # 42

What provides a foundation for the SAP Cloud ERP where integrations and extensions live?

- A. SAP Discovery Center
- B. SAP Business Accelerator Hub
- C. SAP Business Technology Platform
- D. SAP ABAP Environment

Answer: C

NEW QUESTION # 43

What provides a foundation for the SAP Cloud ERP where integrations and extensions live?

- A. SAP Discovery Center
- B. SAP Business Accelerator Hub
- **C. SAP Business Technology Platform**
- D. SAP ABAP Environment

Answer: C

Explanation:

SAP Business Technology Platform (BTP) provides a foundation for the SAP Cloud ERP where integrations and extensions live. SAP BTP is a cloud-based platform that offers a range of services and capabilities to extend, integrate, and orchestrate SAP and non-SAP applications. SAP BTP enables customers and partners to build extensions that are decoupled from the core SAP S/4HANA Cloud system, ensuring lifecycle stability and avoiding modification of SAP code. SAP BTP also leverages the huge library of free integration packages and extension templates available on the SAP Business Accelerator Hub, which can be consumed and customized according to the customer's needs. All services are listed in the SAP Discovery Center, where customers can explore, try, and buy SAP BTP services.

SAP ABAP Environment, SAP Discovery Center, and SAP Business Accelerator Hub are not the foundation for the SAP Cloud ERP, but rather components or tools that are related to SAP BTP. SAP ABAP Environment is a service on SAP BTP that allows customers and partners to develop and run ABAP code in the cloud. SAP Discovery Center is a portal that showcases the available services and solutions on SAP BTP and guides customers through the end-to-end journey of discovering, trying, buying, and implementing them.

SAP Business Accelerator Hub is a repository of ready-to-use integration packages and extension templates that can be deployed on SAP BTP to accelerate the implementation of SAP S/4HANA Cloud. NEW QUESTION # 44

What tools enable non-developers to create low/no-code extensions? Note: There are 2 correct answers to this question.

- A. SAP Cloud SDK
- B. SAP Fiori extensibility apps
- **C. SAP Business Application Studio**
- **D. SAP Build**

Answer: C,D

NEW QUESTION # 45

Based on the SAP Activate methodology, which activities must you perform in the Explore phase? Note: There are 2 correct answers to this question.

- A. Conduct the Digital Discovery Assessment to identify extension requirements.
- **B. Use the Test system to demonstrate SAP Best Practice processes.**
- **C. Conduct the Fit-to-Standard analysis to gather configuration values.**
- D. Define the organizational structure and chart of accounts.

Answer: B,C

Explanation:

Based on the SAP Activate methodology, the Explore phase is where consultants configure business processes based on the information gathered in the Fit-to-Standard workshops. The Fit-to-Standard analysis is conducted in a series of workshops and allows for validation of predefined scenarios agreed upon and to make room for enhancements or additional configuration required. To prepare for this workshop, it is recommended that teams get familiar with the SAP Best Practices content, including the process flows, test scripts with sample data, and other documentation available in SAP Best Practices Explorer. Consultants should also use the Test system to demonstrate SAP Best Practice processes and enable business users to run the end-to-end processes and identify any gaps. The other two activities, conducting the Digital Discovery Assessment and defining the organizational structure and chart of accounts, are part of the Prepare phase, not the Explore phase. References = SAP Activate - Explore Phase: Use Fit-to-Standard to confirm business process fit and identify gaps in your SAP S/4HANA Cloud Implementation, SAP Explore Phase Activities: Define Target BP and Architecture, SAP Activate Elements and Phases, Explaining the Explore Phase

NEW QUESTION # 46

Where are the manual test cases created for customer User Acceptance Testing?

- A. SAP Signavio Process Navigator
- B. Test Automation Tool
- C. SAP Solution Manager
- **D. SAP Cloud ALM**

Answer: D

Explanation:

Manual test cases for customer User Acceptance Testing are created in SAP Cloud ALM, a cloud-based application lifecycle management solution that supports SAP S/4HANA Cloud Public Edition implementations. SAP Cloud ALM provides test management apps that allow consultants to document and track all testing activities for both manual and automated test cases in one location. Manual test cases are created in the Test Preparation app based on the finalized solution scope (business processes) and assigned to test plans in the Test Plans app. SAP Cloud ALM also integrates with the SAP S/4HANA Cloud test system and third-party test providers to execute and monitor automated test cases.
