Moreover, it will lead you to a promising job and a good reputation within the Business Analysis field. Good luck!

IIBA Entry Certificate in Business Analysis (ECBA) Sample Questions (Q34-Q39):

NEW QUESTION # 34

In which task would the business analyst (BA) engage the stakeholders to help them support change?

- A. Conduct elicitation
- B. Plan change strategy
- **C. Manage stakeholder collaboration**
- D. Plan business analysis approach

Answer: C

Explanation:

Stakeholders are more likely to support change if business analysts collaborate with them and encourage the free flow of information, ideas, and innovations.

Genuine stakeholder engagement requires that all stakeholders involved feel that they are heard, their opinions matter, and their contributions are recognized.

NEW QUESTION # 35

Which technique would the business analyst (BA) consider to show the transformation of data?

- **A. Data flow diagram**
- B. Sequence diagram
- C. Data modelling
<https://www.fast2test.com/ECBA-practice-test.html> 13
- D. Flowchart

Valid Fast2test ECBA Exam PDF Dumps - New ECBA Real Exam Questions

Answer: A

Explanation:

A data flow diagram illustrates the movement and transformation of data between externals (entities) and processes. The output from one external or process is the input to another. The data flow diagram also illustrates the temporary or permanent repositories (referred to as data stores or terminators) where data is stored within a system or an organization. The data defined should be described in a data dictionary.

NEW QUESTION # 36

Which of the following tasks is used to ensure that requirements and designs at different levels are aligned to one another?

- A. Verify requirements
- B. Gather requirements
- C. Analyze requirements
- **D. Trace requirements**

Answer: D

Explanation:

The task Trace Requirements ensures that requirements and designs across different levels (business, stakeholder, solution) are consistently aligned with one another. This alignment supports scope management, impact analysis, verification and validation efforts, and change control.

Requirement tracing also:

Clarifies relationships between business needs and solution features.

Enables efficient scope monitoring and helps avoid scope creep.

Supports linking requirements to their source and derived components.

BABOK Guide v3 - Section 5.1: Trace Requirements:

"The purpose of Trace Requirements is to ensure that requirements and designs at different levels are aligned to one another and to support change analysis, coverage, and allocation."

NEW QUESTION # 37

What happens when either the number of requirements or level of formality increase?

- A. More time is required to complete the project.
- **B. More effort is needed to trace requirements.**

- C. Developing new requirements becomes difficult.
- D. Rejecting requirements is likely to increase.

Answer: B

Explanation:

When the number of requirements increases or the level of formality is raised, it becomes more challenging to manage and trace all the requirements. This is because each requirement needs to be documented, analyzed, and tracked throughout the project lifecycle to ensure it is met. As complexity grows, so does the effort required to maintain oversight and ensure that all requirements are accounted for and aligned with the project's goals.

NEW QUESTION # 38

Which core concept defines a specific way of satisfying one or more needs in a context?

- A. Solution
- B. Value
- C. Priority
- D. Change

Answer: A

Explanation:

A solution is a specific way of satisfying a need in a context.
